Road Kill Usa:

American Roadkill Don H. Corrigan, 2021-10-25 Slaughtered along our highways roadkill may be observed regularly but aren't likely to be given much thought. Research scientists, animal rights activists, roadkill artists, writers, ethicists, and lyricists however are increasingly sounding the alarm. They report that we are killing the very animals we love and are driving many of them to the brink of extinction. Detailing the death and destruction of mammals, reptiles, amphibians, and insect pollinators, this study examines the ways in which we are thus jeopardizing our own futures. Beginning in the Model T era, biologists counted the common carnage of the time: cottontails, woodchucks, and squirrels mostly. That record keeping continues today. Beyond the bleak statistics, zoologists are rerouting migratory paths of animals and are advocating for cat and dog companions. This book illuminates both our successes and failures in keeping animals out of harm's way and what those efforts reflect about ourselves and our capacity to care enough to alter the road ahead.

Move over, Rachael Ray! Smash car driver and redneck culinary authority Buck Peterson follows up *The Original Road Kill Cookbook* with more than fifty new roadkill recipes inside *Quick Fix Cooking with Roadkill*. Created for culinary cruisers on the go, each recipe can be prepared in less than thirty minutes after its roadside procurement. Consider ditch-divining recipes such as Perky Jerky, Corned Carnage, and Cabbage Freeway Frittata. Backed over baby back ribs, pavement panini, and tar tare. Also included are sample tasting menus for breakfasts, lunches, appetizers, dinners, and holiday meals, as well as entertaining tips on where to shop, how to tell when an animal has given up the ghost, and how to pair your roadkill with wine. Nothing is left to chance except your next culinary roadkill junction. So when there's a fork in the road, why not pick it up and eat what's found nearby?

Biting the Hands that Feed Us Baylen Linnekin, 2016-09-15 Today in the United States, laws exist at all levels of government that exacerbate problems such as food waste, hunger, inhumane livestock conditions, and disappearing fish stocks. Baylen Linnekin argues that government rules often handcuff America's most sustainable farmers, producers, sellers, and consumers while rewarding those whose practices are anything but sustainable. *Biting the Hands that Feed Us* introduces readers to the perverse consequences of many food rules, from crippling organic farms to subsidizing monocrops. Linnekin also explores what makes for a good law; often he explains these emphasize good outcomes over rigid processes. But he urges readers to reconsider efforts to regulate our way to a greener food system, calling instead for empowerment of those working to feed us and themselves sustainably.

Displaying Death and Animating Life Jane C. Desmond, 2016-08-18 The number of ways in which humans interact with animals is almost incalculable. From beloved household pets to the steak on our dinner tables, the fur in our closets to the Babar books on our shelves, taxidermy exhibits to local zoos, humans have complex, deep, and dependent relationships with the animals in our ecosystems. In *Displaying Death and Animating Life*, Jane C. Desmond puts

those human animal relationships under a multidisciplinary lens focusing on the less obvious and revealing the individualities and subjectivities of the real animals in our everyday lives Desmond a pioneer in the field of animal studies builds the book on a number of case studies She conducts research on site at major museums taxidermy conventions pet cemeteries and even at a professional conference for writers of obituaries She goes behind the scenes at zoos wildlife clinics and meetings of pet cemetery professionals We journey with her as she meets Kanzi the bonobo artist and a host of other animal artists all of whom are preparing their artwork for auction Throughout Desmond moves from a consideration of the visual display of unindividuated animals to mourning for known animals and finally to the marketing of artwork by individual animals The first book in the new Animal Lives series *Displaying Death and Animating Life* is a landmark study bridging disciplines and reaching across divisions from the humanities and social sciences to chart new territories of investigation

Roads and Ecological Infrastructure Kimberly M. Andrews, Priya Nanjappa, Seth P. D. Riley, 2015-06-01 A practical guide that explains how we can design roads that are compatible with populations of small wildlife Few of us think twice about driving on roads Yet the very presence of roads and the act of driving on them can impact the ecological infrastructure that supports an animal s daily life What chance does a turtle have of successfully laying its eggs when it needs to traverse a busy highway Is it realistic to expect small mammals to breed when an interstate thoroughfare subdivides their population These are the sorts of challenges faced by small often slow moving animals challenges that road engineers and ecologists are trying to address For countless small species vehicles traveling at high speeds are nothing less than missiles shooting across migration pathways For too many animals the danger can lead to the loss of populations in part because they simply are not programmed to react to traffic Salamanders faced with a two lane road between the forest and their aquatic breeding site for example will typically cross that road regardless of the congestion The result can be hundreds of flattened animals in a single night *Roads and Ecological Infrastructure* is the first book to focus on reducing conflict between roads and small animals Highlighting habitat connections and the challenges and

solutions from both transportation and ecological perspectives the volume covers various themes including animal behavior related to roads and design approaches to mitigate the negative effects of roads on wildlife The chapter authors from transportation experts to university researchers each promote a goal of realistic problem solving Conceptual and practical this book will influence the next decade or more of road design in ecologically sensitive areas and should prevent countless unnecessary wildlife fatalities Published in association with The Wildlife Society *U.S. Highway 89, Browning to Hudson Bay Divide, Section 4(f) Evaluation*, 2004 *The Psychotronic Video Guide To Film* Michael Weldon, 1996 The bible of B movies is back and better than ever From Abby to Zontar this book covers more than 9 000 amazing movies from the turn of the century right up to today s Golden Age of Video all described with Michael Weldon s dry wit More than 450 rare and wonderful illustrations round out this treasure trove of cinematic lore an essential reference for every bad film fan

Mourning Animals Margo DeMello, 2016-08-01 We live more intimately with nonhuman animals than ever before in history The change in the way we cohabitate with animals can be seen in the way we treat them when they die There is an almost infinite variety of ways to help us cope with the loss of our nonhuman friends from burial cremation and taxidermy to wearing or displaying the remains ashes fur or other parts of our deceased animals in jewelry tattoos or other artwork to counselors who specialize in helping people mourn pets to classes for veterinarians to tips to help the surviving animals who are grieving their animal friends to pet psychics and memorial websites But the reality is that these practices and related beliefs about animal souls or animal afterlife generally only extend with very few exceptions to certain kinds of animals pets Most animals in most cultures are not mourned and the question of an animal afterlife is not contemplated at all Mourning Animals investigates how we mourn animal deaths which animals are grievable and what the implications are for all animals
