Cristina Berna,Eric Thomsen, Vincent Van Gogh 1853 1890 is often mentioned as one of the best examples of Japonism Western art inspired by Japanese art Van Gogh was infatuated with a vision of Japanese art He experienced this mainly from Japanese woodblock prints which became widely available after Commodore Matthew Perry forced Japan to open with the Convention of Kanagawa in 1854 after abt 250 years of seclusion Van Gogh and his brother Theo dealt in these prints for a

while and Van Gogh's studio was literally plastered with them Van Gogh's vision of Japan was a mythical fantasy an ideal for the artist and he even tried to establish an artist's colony to live out this dream Japan on the other hand and especially the woodblock print artists were inspired by earlier Dutch engraved prints which had a profound influence on artists like Katsushika Hokusai from abt 1800 It was from these prints Western perspective entered into Japanese art In the period from abt 1800 to 1850 Japanese prints evolved with Hokusai's 36 Views of Mt Fuji and became the inspiration that met painters like van Gogh In a way what these Western artists saw was a Japanese mirror of their own processed artistic tradition

The Passions of Vincent van Gogh B. Ione Mutchler Ph. D., 2014-04-16 Vincent van Gogh's life was driven by passions from the religious to the romantic These passions illuminated his work as an artist but also led to his many disappointments in life Whether attempting to be a missionary falling in love with his cousin sheltering a prostitute and her children proposing to his neighbor's spinster daughter or establishing an art colony with Paul Gauguin failure haunted him Although his uniquely vibrant colors and dramatic brushstrokes redefined impressionist painting success eluded him Only after his tragic death was his artwork finally recognized for its intensity appeal and enduring impact

Childs,John House,Richard Thomson,St. Louis Art Museum,2001 **The Virgin and the Mousetrap** Chet Raymo,1991 The essays in this collection attempt to frame a broad humanist context for various current and historical scientific topics Subjects range from an astronomical interpretation of Van Gogh s Starry Night to popular misconceptions about Neanderthal humans to the risk factors that are inherent in the development of any new technology Editorial review **Musems Discovered** ,1965 **Essential Van Gogh** Josephine Cutts,James Smith,2001 This book looks at all aspects of Vincent van Gogh s painting in detail with commentary on 120 of his works **Aesthetics and Innovation** Leonid Dorfman,Colin Martindale,Vladimir Petrov,2007 In this book we attempted to gather together a set of chapters that describe new ways of approaching questions about aesthetics and innovation Rather than going over old ground the chapters describe attempts to break out in new directions The book begins with a description of von Ehrenfel TM s development of a Gestalt theory of aesthetics so evocative of the Vienna of 1900 that readers will wish that they had been there to experience the intellectual excitement and ends with a survey the very latest research on brain scan research on perception of art In between we encounter chapters as diverse as a description of cognitive effects on art perception and on the analogies between oscillations in art history and waves in the physical world About half of the book contains chapters by well known western psychological aestheticians and half chapters by Russian scholars many of whom will be new to western readers As well as describing new methods and results the chapters by Russian scholars will be novel to most western readers because the Russian perspective on aesthetics and innovation is rather different than the traditional western perspectives Looking at phenomena from new viewpoints never hurts and very often helps in science *Catalogue of 272 Works by Vincent Van Gogh Belonging to the Collection of the*
