Roadblocks On The Information Highway The It Revolution In Japanese Education:

Roadblocks on the Information Highway Jane Bachnik, 2003-01-01 Although Japanese universities have relied on information technology to resolve numerous problems their high expectations are undermined by lags in implementing that technology This innovative edited volume argues that lags in IT implementation in Japanese education are created by contradictory and challenging responses of the social environment If this dialectic can be visualized as having hands the right avidly promotes IT while the left hand simultaneously blocks it The result of course is an impasse The issues central to this stalemate are significant because they point beyond the schools to a broader set of problem areas in Japanese society The contributors to Roadblocks on the Information Highway discover and discuss the contradictions inherent in Japanese society and culture as they are played out in the social contexts of IT service providers web masters and classroom teachers who implement IT They then show how these contradictions indicate broader structural problems that pervade the dynamic between Japanese education and the state and business sectors Ultimately in a reach that goes beyond Japan this book examines relationships between technology and society persuasively convincing readers that the modern age has created an inextricable link between the two *English-Medium Instruction in Japanese Higher Education* Annette Bradford, Howard Brown, 2017-11-07 English Medium Instruction in Japanese Higher Education provides a touchstone for higher education practitioners researchers and policy makers It enables readers to more clearly understand why policies concerning English medium instruction EMI are in place in Japan how EMI is being implemented what challenges are being addressed and what the impacts of EMI may be The volume situates EMI within Japan s current policy context and examines the experiences of its stakeholders The chapters are written by scholars and practitioners who have direct involvement with EMI in Japanese higher education They look at EMI from perspectives that include policy planning program design marketing and classroom practice *Contemporary Task-Based Language Teaching in Asia* Michael Thomas, Hayo Reinders, 2015-02-26 Over the last decade task based approaches to language learning and teaching TBLT have become a global focus of increased levels of research Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result This book focuses on Asia where this shift has been particularly in evidence TBLT has often been implemented in top down approaches to curriculum development which presents a huge range of challenges at the cultural as well as the pedagogic level Contemporary Task Based Language Teaching in Asia looks at the drivers stakeholders and obstacles across the region Some countries have adapted TBLT to deal with the local constraints others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts This collection is important to all involved in language development from curriculum reform to materials development It assists from programme evaluation to the setting of assessment standards The chapters cover all aspects of language education across Asia from primary to tertiary private and public

education as well as innovations at local regional and national levels Internationalization and Imprints of the Pandemic on Higher Education Worldwide Alexander W. Wiseman, Cheryl Matherly, Max Crumley-Effinger, 2023-06-27 This volume chronicles changes and issues facing institutional and individual academic activities and norms following the Covid 19 pandemic forecasting their impacts on the ways in which internationalization at the post secondary level has responded in practice to new realities exigencies and possibilities

The Japanese Professor Gregory S. Poole, 2010-01-01 This monograph is a substantial contribution to our knowledge of the internal workings of a Japanese university focussing on the world view of the professor In this anthropological case study of a private university in urban Tokyo conducted through extended participant observation Gregory Poole at once both an insider and outsider tells an ethnographic story that explicates a professoriate's working world The author addresses one basic problem how do Japanese professors configure their working world In answering this research question he demonstrates how the present climate of competition and restructuring means that faculty members in Japan are faced with the challenge of culturally translating largely western concepts of the university while steadfastly preserving their own local culture of higher education

Integrating Content and Language in Multilingual Universities Slobodanka Dimova, Joyce Kling, 2020-07-06 This volume provides conceptual syntheses of diverging multilingual contexts research findings and practical applications of integrating content and language ICL in higher education in order to generate a new understanding of the cross contextual variation With contributions from leading authors based in Asia the Middle East and Europe the volume offers comparison of contextualized overviews of the status of ICL across the geographic areas and allows us to identify patterns and advance the scholarship in the field ICL in teaching and learning has become an important consideration in the endeavors to address linguistic diversity at universities which has resulted from the growing teacher and student mobility around the world

The Organisational Dynamics of University Reform in Japan Jeremy Breaden, 2012-12-07 For several decades internationalisation has been a cornerstone of both Japanese government higher education policy and approaches to reform at an institutional level but Japan has still not managed to lose its reputation as a somewhat reclusive member of the global academic community Consensus on the potential of internationalisation to reinvigorate Japanese higher education is matched by the depth of recognition that universities have to date failed to internationalise successfully This book offers a new approach to Japan's internationalisation conundrum by proceeding from the inside out It presents an extended case study one university organisation that has been changed through its adoption of a radical program of internationalisation Through this case study Jeremy Breaden identifies patterns by which internationalisation is situated in administrative discourse and individual action and determines how these patterns in turn shape organisational practice The result is a multi dimensional narrative of organisational change that advances our understanding of both the dynamics of university reform and the concept of internationalisation one of the most durable yet contentious themes in the study of contemporary Japanese society With
