consciousness the changing relationship between love and morality the cultural roots of humour as well as the relevance of various individual writers and philosophers from Pushkin to Brodsky to the construction of Russian irrationalism

Translating Institutions Kaisa Koskinen, 2014-06-03 Translating Institutions outlines a framework for research on translation in institutional settings using the Finnish translation unit at the European Commission as a case study Because of their foundational multilingualism the institutions of the European Union could be described as both translating and translated institutions The European Commission alone employs nearly two thousand translators and it is translators who draft the vast majority of outgoing EU messages Translating Institutions sets out to explore the organizational role and professional identity of this group of cultural mediators a group that has remained relatively invisible despite its size and central institutional role and to use the analysis of this data to elaborate broader methodological and theoretical issues Translating Institutions adopts an ethnographic

approach to explore the life and work of the translators at the centre of this study In practice this entails employing a number of different methods and interrogating various types of data The three level research design used covers the study of the institutional framework the study of translators working in specific institutional settings and the study of translated documents and their source texts This is therefore a study of both texts and people in their institutional habitat Given the methodological focus of the volume the different methods and data are outlined in independent chapters the institutional framework of translation institutional ethnography the physical location of the unit observation translators own views of their role focus group discussions and a sociologically oriented text analysis of a sample document shifts analysis Translating Institutions constitutes a valuable contribution to the sociology of translation It opens up new avenues for research and offers a detailed framework for the study of institutional translation

Pictures of the month Johann Widmer,2022-08-17

Already a well known representative of the Arte Povera movement in the late 1990s Johann Widmer began to explore the field of abstract informal painting His credo was that all the arts including music and literature are important pillars of our civilisation and should therefore be made accessible to everyone by various means In addition to his extensive artistic output Johann Widmer has always written short stories for young and old But he avoids the term writer He sees himself more as an art mediator and is happy when his books are read Starting in August 2009 he dedicated a picture to each month which he accompanied with a matching text This book is therefore a compilation of the artistic work and the short stories and shows the monthly pictures as a collected work The texts are not intended to influence the viewer s own imagination when looking at the pictures but they may suggest a way of looking at the picture
