Alternating Narratives in Fiction for Young Readers Perry Nodelman, 2017-04-17 This book is about the implications of novels for young readers that tell their stories by alternating between different narrative lines focused on different characters It asks if you make sense of fiction by identifying with one main character how do you handle two or more of them Do novels with alternating narratives diverge from longstanding conventions and represent a significant change in literature for young readers If not how do these novels manage to operate within the parameters of those conventions This book considers answers to these questions by means of a series of close readings that explore the structural educational and ideological implications of a variety of American British Canadian and Australian novels for children and for young adults

Toward a More Visual Literacy Jennifer S. Dail, Shelbie Witte, Steven T. Bickmore, 2018-05-04 Technology and multimodal texts must be included as part of the literacies we teach in 21st century schools Implementing multiple modes of literacy requires that teachers shift their focus toward multiple genres and modes of text This shift to the visual requires that teachers consider how students read images in the classroom address visual literacy and engage students in constructing visual texts Students already live and communicate in a virtual world connected by expansive networks and many also read young adult literature Given this researchers and practitioners in the field examine ways texts written for students can be combined with digital tools to craft more critical conversations around literary response and digital media consumption and production This book explores ways adolescents read engage and construct meaning within the world around them and examines how teachers can leverage the use of young adult literature with digital practices within their classrooms

Crossing Textual Boundaries in International Children's Literature Lance Weldy, 2011-01-18 As the first part of the title indicates my interest in looking at intertextuality and transformation still maintains a prominent place throughout this book as well If we believe that no text is an island then we will understand that the relationships between and within texts across the years become a fascinating place for academic inquiry I included the word boundaries into the title because we never get tired of voicing our opinions about texts which traverse relegated boundaries such as genre or medium Not only am I interested in discussing what these changes across boundaries mean socially historically and culturally but also what they mean geographically which accounts for the second part of my title I am very excited that this book will be placing even more emphasis on children s literature in an international scene than my first book did in the sense that I have added more scholars on an international level I hesitate to list the nationalities of all of the contributors here because quite a few have themselves crossed international boundaries in different ways by either studying abroad or finding permanent residency in foreign countries Nevertheless the writers have lived extensively in or identify as being from Australia Canada England Finland Germany Greece Iceland Ireland Israel Norway Spain Sweden Turkey the United States of America and Wales
