Services In The Global Market:

Services in the Global Market Jacques A.E. Nusbaumer, 2012-12-06 Service activities are at the heart of a major economic revolution taking place all around us This new economic revolution is equivalent to the Industrial Revolution in the eighteenth century the rise of the guilds in the Middle Ages and the shift from a hunter gatherer economy to an agricultural pastoral economy at the dawn of recorded history when organized agriculture first led to the development of towns and the invention of writing In this new revolution computers factory robots and completely automated factories are rapidly reducing the need for physical labor in production At the same time sophisticated agricultural machinery fertilizers pesticides and biogenetic engineering have reduced and will continue to reduce the physical labor involved in growing food In the new economy that will emerge from this revolution most people will earn their living by working in services Like all revolutions the new economic revolution is troublesome because it brings with it major changes in everyday life both at home and in the workplace Change creates uncertainty about the future and ambiguity in the interpretation of economic trends The new revolution is also troublesome because it adds to the complexity of economic organization and removes more people from the direct production of physical goods In the new economy more and more jobs will be based on the application of specialized knowledge and the manipulation of information with computers a long step away from real jobs like growing wheat and assembling cars

Logistic Services: An Overview of the Global Market and Potential Effects of Removing Trade Impediments, Inv. 332-463, *Clearing Services Global Markets* Tina P. Hasenpusch, Clearing forms the core part of a smooth and efficiently functioning financial market infrastructure Traditionally it has been provided by clearing houses most of which today act as a central counterparty CCP between the two sides of a trade The rapid growth of cross border trading has sparked discussion on the most efficient industry structure particularly in Europe and the US At the heart of this discussion lies the question of whether the implementation of a single clearing house creates greater benefits than a more competitive but interlinked market structure This is the starting point for this book which analyses the efficiency of clearing and clearing industry structure Along with clear cut definitions and a concise characterisation and descriptive analysis of the clearing industry the book determines the efficiency impact of various cross border integration and harmonisation initiatives between CCPs This serves to identify the most preferable future structure for the clearing industry
