translation and they address the core of pragmatics as the study of language use with phenomena ranging from irony and emphasis to literacy and mass media and with approaches to the function of language like rhetoric stylistics corpus analysis and general semantics The volume contains chapters not only on the spoken and written modes of communication but also on signed language pragmatics and on computer mediated communication The impact and usefulness of taking a pragmatic perspective on language for a deeper understanding of clinical and rehabilitation practices has recently received ever more focus in this volume aspects of this direction of research are dealt with in the chapter on clinical pragmatics In most of the chapters in the volume ethics has a core role to play not only in issues of authenticity in general in relation to research on language use but also in issues that have a direct influence on the linguistic culture and society we live in irrespective of whether we are part of a linguistic majority or a minority or a minority within a minority language policy and language planning language ecology and language in relation to legal matters In all of these fields we see the importance of research within pragmatics as a discipline dealing with how language influences our everyday lives All in all the volume presents different perspectives on how research in pragmatics not only can be put to practice but how pragmatics is used as a tool to gain a better understanding of the world we live in

Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk,1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture
