Reading Narrative Joseph Hillis Miller, 1998 Reading Narrative is in the author's words a book about how to make sense of stories or how to identify the ways they may fail to make sense Hillis Miller presents discussions of narratives and dialogues in the Western European tradition the works of such writers as Sophocles Plato Shakespeare Henry James Kierkegaard Laurence Sterne Proust Balzac and Elizabeth Gaskell Miller's new readings of Aristotle's Poetics Sophocles Oedipus the King Gaskell's Cranford Pater's Apollo in Picardy and many other works generate a comprehensive and original theory of narrative as he addresses questions about the ends beginnings and middles of the narrative line Miller demonstrates the uses of multiple narrators abrupt shifts in syntax anacoluthon indirect discourse interwoven plots and figures of speech including irony the master trope that is not a trope His narrative analysis in which line images function as salient examples draws the reader's attention in the same way that a master storyteller holds an audience

Narrative and Cognition in Literature and Science Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and narrative shape one another Narrative is a principle of cognition and cognition is fundamental to narrative This duality enables a deeper mapping of the feedback between story and the natural sciences Science as a culturally organized and systematic mode of knowing the world may seem opposed to narrative thinking Yet they are deeply interwoven Scientists tell many kinds of stories across genres and media In thought experiments lab experiments written arguments and histories and philosophies of fields they recount and interpret unfoldings of events at often uncanny scales from particle collisions to the evolution of life to cosmic expansion Science stories go beyond science Early science is entwined with myth religion and magic We still mythologize beneficent or evil geniuses the promises and perils of technology Teachers journalists politicians and lawyers all tell science stories for their own purposes Literary artists use scientific ideas and forms reimagining physical forces causality and time in storyworlds themes and figures This is the first cognition focused multi disciplinary analysis of these narrative science relations

Narrative as Rhetoric James Phelan, 1996 The rhetorical theory of narrative that emerges from these investigations emphasizes the recursive relationships between authorial agency, textual phenomena, and reader response, even as it remains open to insights from a range of critical approaches including feminism, psychoanalysis, Bakhtinian linguistics, and cultural studies. The rhetorical criticism Phelan advocates and employs seeks above all to attend carefully to the multiple demands of reading sophisticated narrative; for that reason, his rhetorical theory moves less toward predictions about the relationships between techniques, ethics, and ideologies and more toward developing some principles and concepts that allow us to recognize the complex diversity of narrative art.

Children Reading Print and Television Narrative Dr Muriel Robinson, Muriel Robinson, 2020-04-14 Contrary to the popular assumption that television viewing is a very different process from book reading and inhibits reading in a variety of ways, the author argues that in fact the two activities can be mutually supportive and involve many of the same strategies. It may have implications for teachers as the book offers a research based view and calls for a new emphasis in school practice which will include television as text and which supports children's developing abilities to make meaning from a range of texts. The author highlights the need for teachers to consider television in the same way as print media.

Reading Narrative Fiction Seymour Benjamin Chatman, 1993 This short fiction anthology offers a more precise and extensive treatment of narrative technique than other books of its kind. Targeting the needs and interests of today's readers, the author uses down to earth language and builds on readers' familiarity with narrative devices in film, television, and other popular media to teach this new approach to literary analysis. While offering more technical depth, Chatman never overwhelms. He provides unusually clear and exact definitions of such terms as characterization and point of view, along with many illustrations of how these techniques actually operate in short stories. His explanations and examples enable readers to read narratives with a new awareness of how they are constructed.

Narrative Medicine James Phelan, 2022-10-27 Narrative Medicine: A Rhetorical Rx rests on the principles that storytelling is central to medical encounters between caregivers and patients and that narrative competence enhances

medical competence Thus the book's goal is to develop the narrative competence of its reader Grounded in the rhetorical theory of narrative that Phelan has been constructing over the course of his career this volume utilizes a three step method Offering a jargon free explication of core concepts of narrative such as character progression perspective time and space Demonstrating how to use those concepts to interpret a diverse group of medical narratives including two graphic memoirs Pointing to the relevance of those demonstrations for caregiver patient interactions Narrative Medicine A Rhetorical Rx is the ideal volume for undergraduate students interested in pursuing careers in healthcare students in medical and allied health professional schools and graduate students in the health humanities and social sciences

Interpreting New Testament Narratives Eric J. Douglass, 2018-10-02 Narratives are the concrete manifestation of an author's subjectivity They function as that person's voice and should be treated with the same respect that is granted to all voices In *Interpreting New Testament Narratives* Eric Douglass develops this ethical perspective so that narratives are treated as communication and the author's voice is regarded as a valued perspective Employing a cross disciplinary approach Douglass shows how readers engage narratives as mental simulations creating a temporary possible world that readers enter and experience To recover communication readers locate the events of this world in the culture of the intended audience and translate this meaning into the modern reader's worldview Using a staged reading design this initial reading is followed by readings of critique

The Travelling Concepts of Narrative Mari Hatavara, Lars-Christer Hydén, Matti Hyvärinen, 2013-06-15 Narrative is a pioneer concept in our trans disciplinary age For decades it has been one of the most successful catchwords in literature history cultural studies philosophy and health studies While the expansion of narrative studies has led to significant advances across a number of fields the travels for the concept itself have been a somewhat more complex Has the concept of narrative passed intact from literature to sociology from structuralism to therapeutic practice or to the study of everyday storytelling In this volume philosophers psychologists literary theorists sociolinguists and sociologists use methodologically challenging test cases to scrutinize the types transformations and trajectories of the concept and theory of narrative The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts Nonetheless it emphasizes the vast contextual differences and contradictions in the use of the concept
