Reading Problems A Multidisciplinary Perspective:

Reading problems Wayne Otto, Nathaniel Peters, Charles W. Peters, 1977 *Reading Problems* Margaret Ann Richek, Lynne K. List, Janet W. Lerner, 1983 **Theoretical Issues in Reading Comprehension** Rand J. Spiro, Bertram C. Bruce, William F. Brewer, 2017-11-03 Research in cognitive psychology linguistics and artificial intelligence the three disciplines that have the most direct application to an understanding of the mental processes in reading is presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines **Acts of Reading** Hiroshi Nara, Mari Noda, 2002-09-30 Students who have completed a year of German read Brecht in their second year those of Spanish read Cervantes Teachers of first and second year Japanese can often find nothing comparable Why aren't your students reading literature they are asked Why not Soseki Or Murakami What are instructors of Japanese doing wrong Nothing according to the authors of this volume Rather they argue such questions exemplify the gross misunderstandings and unreasonable expectations of teaching reading in Japanese In *Acts of Reading* the authors set out to explore what reading is for Japanese as a language and how instructors should teach it to students of Japanese They seek answers to two questions What are the aspects of reading in Japan as manifested in Japanese society What L2 second language reading problems are specific to Japanese In answering the first and related questions the authors conclude that reading is a socially motivated purposeful act that is savored and becomes a part of people's lives Reading instruction in Japanese therefore should include teaching students how to work with text as the Japanese do in Japanese society The second question relates more directly to traditional concerns in L2 reading The authors begin with a general theory of reading They then offer a welcome glimpse into the rich and complex perspectives sometimes conflicting other times symbiotic on what reading is and how it is performed in L1 and L2 and most importantly on the web of interconnections between the phenomenology of reading and the demands it places on teaching approaches to reading in Japanese With essays by Charles J Quinn Jr Fumiko Harada and Chris Brckett Foreword by J Marshall Unger **A Longitudinal Study of Dyslexia** Hans-Jörgen Gjessing, Bjørn Karlsen, 2012-12-06 Psychological and educational researchers in the Scandinavian countries have cooperated in a research effort relating to children's learning disabilities for more than a decade Support has come

from the federal governments and other funding agencies in Norway Sweden and Denmark through the Secretariat for Scandinavian Cultural Cooperation A number of independent studies have already been published dealing with various aspects of learning disabilities in the literacy skills of reading and writing The largest and most comprehensive study was the Bergen Project a longitudinal study of an entire cohort of children with special emphasis on those who developed specific learning disabilities in reading and writing dyslexia These dyslexic children were studied diagnosed and treated over a period of nine years along with various control and comparison groups which included a large subgroup with general learning disabilities retarded The Bergen Project involved the collection of voluminous data The children were identified by means of special diagnostic tests and treated using remedial materials and techniques that had been developed to deal with various types of dyslexia The ophthalmology team not only tested the children but they also prescribed and provided glasses and even performed surgery when necessary The pediatric neurologists did general pediatric and neurological examinations following up many of the cases with EEGs and CT computerized tomography brain x rays

Theoretical Models and Processes of Literacy Donna E. Alvermann, Norman J. Unrau, Misty Sailors, Robert B. Ruddell, 2018-10-03 The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars Two decades into the 21st century the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes and most notably contemporary literacy models and processes enhance and extend earlier theories of reading and writing Providing a tapestry of models and theories that have informed literacy research and instruction over the years this volume's strong historical grounding serves as a springboard from which new perspectives are presented The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them Some additional archival essays from previous editions are available on the book's eResource New to the Seventh Edition Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts New chapters reflect sweeping changes in how readers and writers communicate in a digital era Slimmer volume is complemented by some chapters from previous editions available online

Biological Perspectives on Language David Caplan, André Roch Lecours, Alan Smith, 1984 Profoundly influenced by the analyses of contemporary linguistics these original contributions bring a number of different views to bear on important issues in a controversial area of study The linguistic structures and language related processes the book deals with are for the most part central syntactic

structures phonological representations semantic readings rather than peripheral acousticphonetic structures and the perception and production of these structures aspects of language Each section contains a summarizing introduction Section I takes up issues at the interface of linguistics and neurology The Concept of a Mental Organ for Language Neural Mechanisms Aphasia and Theories of Language Brain based and Non brain based Models of Language Vocal Learning and Its Relation to Replaceable Synapses and Neurons Section II presents linguistic and psycholinguistic issues Aspects of Infant Competence and the Acquisition of Language the Linguistic Analysis of Aphasic Syndromes the Clinical Description of Aphasia Linguistic Aspects The Psycholinguistic Interpretation of Aphasias The Organization of Processing Structure for Language Production and The Neuropsychology of Bilingualism Section III deals with neural issues Where is the Speech Area and Who has Seen It Determinants of Recovery from Aphasia Anatomy of Language Lessons from Comparative Anatomy Event Related Potentials and Language Neural Models and Very Little About Language David Caplan M D edited Biological Studies of Mental Processes MIT Press 1980 and is a member of the editorial staff of two prestigious journals Cognition and Brain Roch Lecours is Professor of Neurology and Allan Smith Professor of Physiology both at the University of Montreal The book is in the series Studies in Neuropsychology and Neurolinguistics **Content Area Reading** Anthony V. Manzo, Ula Casale Manzo, 1990 A content reading methods text that takes a quick start heuristic approach to imparting the skills future teachers need to improve their pupils reading ability in essential content areas Coverage of current theories and practices in comprehension assessment and heuristics is organized around pre reading guided silent reading and post reading
