Reading Putnam

Maria Baghramian

Reading Putnam:

Reading Putnam Maria Baghramian, 2013 Hilary Putnam is one of the world's leading philosophers. His highly original and often provocative ideas have set the agenda for a variety of debates in philosophy of science, philosophy of mind, and philosophy of language. His now famous philosophical thought experiments such as the Twin earth and the brains in the vat have become part of the established canon in philosophy and cognitive science. *Reading Putnam* is an outstanding overview and assessment of Hilary Putnam's work by a team of international contributors and includes replies by Putnam himself. Divided into clear sections, it contains chapters on key aspects of Putnam's large body of writing, including Scientific realism and the changes that Putnam's thought has undergone on this topic, analyticity and ontology, including the important interconnections between the views of Putnam and Quine. Putnam's arguments concerning externalist views of meaning and reference, questions of conceptual relativity, and his preoccupation with ethics through a denial of the fact-value dichotomy. Putnam's developing views on perception. Offering an excellent survey of Putnam's work, *Reading Putnam* is essential for those studying philosophy of mind, philosophy of language, and philosophy of science, as well as for anyone interested in contemporary philosophy.

Following Putnam's Trail, 2015-06-29 *Following Putnam's Trail* addresses Putnam's path through important philosophical problems. One outstanding feature of Putnam's philosophy has been his contribution to the development of American pragmatism, as well as his many changes of mind when thinking about realism. Realism and pragmatism are indeed the central focus of the contributions to the volume. The book includes a defence of pragmatism by Putnam himself and several commentaries on it. This volume should be of interest both to scholars who specialize in analytical philosophy, as well as to those who have a wider interest in philosophy.

Putnam's Library Companion, 1878 **Quine**, 2022-06-08 From the contents: Naturalistic epistemology, murder and suicide. But what about the promises? Ton Derksen: Naturalism and rationality. Christopher Hookway: Quine's hypothetical theory of language learning: a comparison of different conceptual schemes of their logic. Mia Gosselin: Quine and innate similarity spaces. Jaap van Brakel: Quine and Davidson on the structure of empirical knowledge. Dirk Koppelberg: Empathy and charity. Eva Picardi: Quine, indeterminacy, robust realism, and truth. Sandra Laugier: Quine and Putnam on conceptual relativity and reference. Theft or honest toil? Roger Vergauwen.

Catalogue of Books ... Boston Public Library, Roxbury Branch, 1876 *On Truth and the Representation of Reality* Dan Nesher, 2002 In *On Truth and the Representation of Reality* Dan Nesher develops a new theory of truth in the framework of pragmatist theory of representation. Using the pragmatist theory of perception for the basis of his epistemological explanation of our confrontation with external Reality and how it's represented, Nesher shows that in our perceptual operations we quasi-prove the truth of our perceptual judgments.

Time, Space, Matter in Translation Pamela Beattie, Simona Bertacco, Tatjana Soldat-Jaffe, 2022-09-28 *Time Space Matter in Translation* considers time, space, and materiality as legitimate habitats of translation. By offering a linked series of interdisciplinary case studies that show

translation in action beyond languages and texts this book provides a capacious and innovative understanding of what translation is what it does how and where The volume uses translation as a means through which to interrogate processes of knowledge transfer and creation interpretation and reading communication and relationship building but it does so in ways that refuse to privilege one discipline over another denying any one of them an entitled perspective The result is a book that is grounded in the disciplines of the authors and simultaneously groundbreaking in how its contributors incorporate translation studies into their work This is key reading for students in comparative literature and in the humanities at large and for scholars interested in seeing how expanding intellectual conversations can develop beyond traditional questions and methods

Central Works of Philosophy, Volume 5 John Shand, 2006-06-12 Ranging over 2 500 years of philosophical writing this five volume collection of essays is an unrivalled companion to the study and reading of philosophy Central Works of Philosophy provides both an overview of particular works and clear and authoritative expositions of their central ideas giving readers the resources and confidence to read the works themselves These books offer remarkable insights into the ideas out of which our present ways of thinking emerged and without which they cannot fully be understood
