O'Neill, 1965 *Epistemology* Michael Huemer, 2002 This is a comprehensive anthology that draws together leading philosophers writing on major themes in epistemology Each section is prefaced by an introductory essay which guides students gently into each topic **Readings in Epistemology** Reginald F O'Neill, 1979

Knowledge and Inquiry K. Brad Wray, 2022 **Readings in Epistemology**, 1993 A companion volume to *On Understanding Understanding* this second edition incorporates corrections to the previous text and includes new readings The works collected in this volume are mainly from the British Empiricists The breadth of the selection is not so diverse that the pieces cannot be readily understood by a newcomer to Epistemology they have a logical progression of development from Locke to Berkeley to Hume and all of the philosophers whose work is represented have had great influence on contemporary Anglo American philosophy In the Introduction Potter sets the selections in their historical context and urges the readers to form their own viewpoint in terms of the period's contribution to the advancement of culture politics and society He gives a concise summary of the Enlightenment period demonstrating how and why Rationalism and Empiricism came about and challenges the reader not to simply note the points of disparity between the two schools but to notice the similarities of their common assumptions both substantive and methodological *Readings in Epistemology* Second Edition is an excellent classroom tool A biographical note on the philosopher and list of suggested books for further study heads each of the readings Study Questions which stimulate discussion are at the end of each piece *Readings in Epistemology* Vincent G. Runes,1962 **Social Epistemology** Alvin Goldman,Dennis Whitcomb,2011-02-11 What if anything justifies us in believing the testimony of others How should we react to disagreement between ourselves and our peers and to disagreement among the experts when we ourselves are novices Can beliefs be held by groups of people in addition to the people composing those groups And if so how should groups go about forming their beliefs How should we design social systems such as legal juries and scientific research sharing schemes to promote knowledge among the people who engage in them When different groups of people judge different beliefs to be justified how can we tell which groups are correct These questions are at the heart of the vital discipline of social epistemology The classic articles in this volume address these questions in ways that are both cutting edge and easy to understand This volume will be of great interest to scholars and students in epistemology
