Readings In Urban Analysis Perspectives On Urban Form And Structure:

Readings in Urban Analysis Robert W. Lake, 2017-07-05 This important work brings together a range of perspectives in contemporary urban analysis. The field of urban analysis is characterized by the multiplicity of approaches, philosophies, and methodologies employed in the examination of urban structure and urban problems. This fragmentation of perspectives is not simply a reflection of the multifaceted and complex nature of the city as subject matter. Nor is it a function of the variety of disciplines such as geography, planning, economics, history, and sociology. Cross-cutting all of these issues and allegiances has been the emergence in recent years of a debate on fundamental issues of philosophy, ideology, and basic assumptions underlying the analysis of urban form and structure. The notion of urban analysis, Robert W. Lake discusses, focuses on the spatial structure of the city, its causes, and its consequences. At issue is the city as a spatial fact, a built environment with explicit characteristics and spatial dimensions, a spatial distribution of population and land, uses, a nexus of locational decisions, an interconnected system of locational advantages and disadvantages, amenities and disamenities. Beginning with landmark articles in neo-classical and ecological theory, the reader covers the latest departures and developments. Separate sections cover political approaches to locational conflict, institutional influences on urban form, and recent Marxist approaches to urban analysis. Among the topics included are community strategies in locational conflict, the political economy of place, the role of government and the courts, institutional influences in the housing market, and the relationship between urban form and capitalist development. This is a valuable introductory text for courses in urban planning, urban geography, and urban sociology.

Community as Urban Practice Talja Blokland,2017-05-11 Community is a central idea in urban studies but remains conceptually vague and empirically difficult to work with Building on existing theories of community Talja Blokland offers an important contribution to defining and understanding this key theme Blokland argues that there has been too much focus on community as a stable construct formed by durable relationships with kin friends social groups or neighbours She draws attention to the non durable fluid encounters that constitute community theorizing communities as shared urban practices in a globalizing world The book proposes two core ways of thinking about community the dimension of familiarity defined by our ability to construct identities and the dimension of access defined by our freedom to enter and leave urban spaces These dimensions form various urban configurations which enable us to experience and practise community in diverse ways As this book maintains community is after all an urban practice not a fixed state of affairs

Analysis and Development of Sustainable Urban Production Systems Max Juraschek,2021-07-23 Manufacturing of products in urban production sites is connected to unique potentials yet also to specific challenges Urban factories can provide functional diversity and contribute positive impacts to a city The concept of urban production receives rising attention in research and industry and it is recognized in its interdisciplinary nature With a holistic approach from both the urban perspective and the factory perspective negative impacts can be minimized positive effects enabled and mutually beneficial symbiotic combinations created The presented framework and methods for the evaluation and implementation of sustainable urban production systems allow the assessment of impacts and provide the means to control and utilize the unique strengths of urban factories for cities and industry This will allow a structured derivation of methods and measures from the concept of urban production for producing enterprises and the urban stakeholders
