

A Butterfly's Life

Linda Ruggieri

Butterflies are beautiful insects. You often see them around colorful flowers.

A butterfly's life begins in a special way. First, a mother butterfly lays an egg on a leaf. A caterpillar hatches from the egg. The caterpillar eats leaves and grows bigger.

Next, the caterpillar spins a covering around itself. The covering is called a chrysalis (KRIS-a-liss). Inside the chrysalis, the caterpillar slowly changes. The parts of a butterfly begin to form, like the wings, legs, and antennae.

About two weeks later, a new creature pops out of the chrysalis. It has become a butterfly! The butterfly flutters its wings and flies away.
