Real Analysis And Probability Contemporary Issues In Crime And Justice Series:

Crime and Justice, Volume 42: Crime and Justice in America Michael Tonry, 2013-10-06 For the American criminal justice system 1975 was a watershed year Offender rehabilitation and individualized sentencing fell from favor The partisan politics of law and order took over Among the results four decades later are the world's harshest punishments and highest imprisonment rate Policymakers interest in what science could tell them plummeted just when scientific work on crime recidivism and the justice system began to blossom Some policy areas sentencing gun violence drugs youth violence became evidence free zones In others developmental crime prevention policing recidivism studies evidence mattered **Crime and Justice in America 1975 2025** tells how policy and knowledge did and did not interact over time and charts prospects for the future What accounts for the timing of particular issues and research advances What did science learn or reveal about crime and justice and how did that knowledge influence policy Where are we now and perhaps even more important where are we going The contributors to this volume the leading scholars in their fields bring unsurpassed breadth and depth of knowledge to bear in answering these questions They include Philip J Cook Francis T Cullen Jeffrey Fagan David Farrington Daniel S Nagin Peter Reuter Lawrence W Sherman and Franklin E Zimring For thirty five years the Crime and Justice series has provided a platform for the work of sociologists psychologists criminal lawyers justice scholars and political scientists as it explores the full range of issues concerning crime its causes and its remedies **Crime, Drugs and Social Theory** Chris Allen, 2017-03-02 Do criminal cultures generate drug use **Crime Drugs and Social Theory** critiques conventional academic and policy thinking concerning the relationship between urban deprivation crime and drug use Chris Allen outlines an innovative constructionist phenomenological perspective to explore these relationships in a new light He discusses how people living in deprived urban areas develop natural attitudes towards activities such as crime and drug use that are prevalent in the social worlds they inhabit and shows that this produces forms of articulation such as I don't know why I take drugs I just take them and drugs come naturally to me He then draws on his constructionist phenomenology to help understand the natural attitude towards crime and drugs that emerge from conditions of urban deprivation as well as the non-reasoned forms of articulation that emerge from this attitude The book argues that understanding the conditions in which drug users deviate from their natural attitude can help effective intervention in the lives of drug users **Contemporary Criminological Issues** Carolyn Côté-Lussier, David Moffette, Justin Piché, 2020-05-05 **Contemporary Criminological Issues Moving Beyond Insecurity and Exclusion** tackles some of today's most pressing social issues from the criminalization of Indigenous peoples to interpersonal violence border control and armed conflicts advances cutting edge theories and methods to make sense of these issues and proposes policy responses that promote social inclusion and security This book advances cutting edge theories and methods with the aim of moving beyond the scholarship that reproduces insecurity and exclusion The breadth of approaches encompasses much of the current critical criminological scholarship serving as a counterpoint to

the growth of managerial and administrative criminologist and the rise of explicitly exclusionary and punitive state policies and practices with respect to crime and security This edited collection featuring two books one in English and one in French includes important contributions to knowledge and public policy by eminent experts and emerging scholars Published in English Also available in French *Enjeux criminologiques contemporains Au del de l inclusion et de l exclusion* [A Theory of Legal Punishment](#) Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state s punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions According to the two tiered model the institution of punishment and statutory penalties as set by the legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The courts express the community s collective sense of resentment at being wronged This book supports the two tiered model by showing that it accords with our moral intuitions commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations It engages classic and contemporary work in the philosophy of law and explains the theory s advantages over competing approaches from retributivists and other mixed theorists The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt Drawing on recent criminological research the two tiered model can help us to address some of our most pressing social issues including the death penalty drug policy and mass incarceration This book will be of interest to philosophers legal scholars policymakers and social scientists especially criminologists economists and political scientists *Federal Probation* ,1994

Predictive Policing and Artificial Intelligence John McDaniel, Ken Pease, 2021-02-25 This edited text draws together the insights of numerous worldwide eminent academics to evaluate the condition of predictive policing and artificial intelligence AI as interlocked policy areas Predictive and AI technologies are growing in prominence and at an unprecedented rate Powerful digital crime mapping tools are being used to identify crime hotspots in real time as pattern matching and search algorithms are sorting through huge police databases populated by growing volumes of data in an effort to identify people liable to experience or commit crime places likely to host it and variables associated with its solvability Facial and vehicle recognition cameras are locating criminals as they move while police services develop strategies informed by machine learning and other kinds of predictive analytics Many of these innovations are features of modern policing in the UK the US and Australia among other jurisdictions AI promises to reduce unnecessary labour speed up various forms of police work encourage police forces to more efficiently apportion their resources and enable police officers to prevent crime

and protect people from a variety of future harms However the promises of predictive and AI technologies and innovations do not always match reality They often have significant weaknesses come at a considerable cost and require challenging trade off s to be made Focusing on the UK the US and Australia this book explores themes of choice architecture decision making human rights accountability and the rule of law as well as future uses of AI and predictive technologies in various policing contexts The text contributes to ongoing debates on the benefits and biases of predictive algorithms big data sets machine learning systems and broader policing strategies and challenges Written in a clear and direct style this book will appeal to students and scholars of policing criminology crime science sociology computer science cognitive psychology and all those interested in the emergence of AI as a feature of contemporary policing
