obvious in superhero fantasies yet dramas like Roma also rely on computer generated imagery to enhance the verisimilitude of scenes But the realism of digital effects is not actually true to life It is a realism invented by Hollywood by one company specifically Industrial Light Magic The Empire of Effects shows how the effects company known for the puppets and space battles of the original Star Wars went on to develop the dominant aesthetic of digital realism Julie A Turnock finds that ILM borrowed its technique from the New Hollywood of the 1970s incorporating lens flares wobbly camerawork haphazard framing and other cinematography that called attention to the person behind the camera In the context of digital imagery however these aesthetic strategies had the opposite effect heightening the sense of realism by calling on tropes suggesting the authenticity to which viewers were accustomed ILM s style on display in the most successful films of the 1980s and beyond was so convincing that other studios were forced to follow suit and today ILM is a victim of its own success having fostered a cinematic monoculture in which it is but one player among many
