River Colin Fletcher, 2014-10-15 At age sixty seven Colin Fletcher the guru of backpacking in America undertook a rigorous six month raft expedition down the full length of the Colorado River alone He needed something to pare the fat off my soul to make me grateful again for being alive The 1 700 miles between the Colorado s source in Wyoming and its conclusion at Mexico s Gulf of California contain some of the most spectacular vistas on earth and Fletcher is the ideal guide for the terrain As his privileged companions we travel to places like Disaster Falls and Desolation Canyon observe beaver and elk experience sandstorms and whitewater rapids and share Fletcher s thoughts on the human race the environment and the joys of solitude

Border Oasis Evan R. Ward, 2016-12-15 The environmental history of the Colorado River delta during the past century is one of the most important and most neglected stories of the U S Mexico Borderlands Thanks to entrepreneurs such as William E Smythe the surrounding desert in Arizona California Sonora and Baja California has been transformed into an agricultural oasis but not without significant ecological political economic and social consequences Evan Ward explores the rapid development of this region examining the ways in which regional politics and international relations created a garden in the Mexicali Yuma and Imperial Valleys while simultaneously threatening the life of the Colorado River Tracing the transformation of the delta by irrigated agribusiness through the twentieth century he draws on untapped archival resources from both sides of the border to offer a new look at one of the world s most contested landscapes Border Oasis tells how two very different nations developed the delta into an agricultural oasis at enormous environmental cost Focusing on the years 1940 to 1975 including the disastrous salinity crisis of the 1960s and 1970s it combines Mexican Native American and U S perspectives to demonstrate that the political and diplomatic influences on the delta played as much a part in the region s transformation as did irrigation Ward reveals how mistrust among political and economic participants has been fueled by conflict between national and local officials on both sides of the border by Mexican nationalism and by a mutual recognition that water is the critical ingredient for regional

economic development With overemphasis on development in both nations leading to an ecological breaking point Ward demonstrates that conflicting interests have made sound binational management of the delta nearly impossible By weaving together all of these threads that have produced the fabric of today s lower Colorado his study shows that the environmental history of the delta must be understood as a whole not from the standpoint of only one of many competing interests

**Restoring Colorado River Ecosystems** Robert W. Adler, 2012-06-22 Over the past century humans have molded the Colorado River to serve their own needs resulting in significant impacts to the river and its ecosystems Today many scientists public officials and citizens hope to restore some of the lost resources in portions of the river and its surrounding lands Environmental restoration on the scale of the Colorado River basin is immensely challenging in addition to an almost overwhelming array of technical difficulties it is fraught with perplexing questions about the appropriate goals of restoration and the extent to which environmental restoration must be balanced against environmental changes designed to promote and sustain human economic development *Restoring Colorado River Ecosystems* explores the many questions and challenges surrounding the issue of large scale restoration of the Colorado River basin and of large scale restoration in general Robert W Adler evaluates the relationships among the laws policies and institutions governing use and management of the Colorado River for human benefit and those designed to protect and restore the river and its environment He examines and critiques the often challenging interactions among law science economics and politics within which restoration efforts must operate Ultimately he suggests that a broad concept of restoration is needed to navigate those uncertain waters and to strike an appropriate balance between human and environmental needs While the book is primarily about restoration of Colorado River ecosystems it is also about uncertainty conflict competing values and the nature pace and implications of environmental change It is about our place in the natural environment and whether there are limits to that presence we ought to respect And it is about our responsibility to the ecosystems we live in and use

**River** Robert Edward Smith, 2024-11-08 Rapture River Robert Edward Smith s first novel tracks the relationship of two lovers who are as unpredictable as Michigan s weather Josh a Catholic priest and Joyce a Native American meet at St Peter The Fisherman Catholic Church on the banks of the Black River a premier brook trout stream for fly fishing Each embraces their own spiritual heritage but struggles with an inner sensual demon They must prove strong enough to bridge that spiritual gap and assuage his guilt and her anguish over their coupling Their relationship is facilitated by Josh s 89 year old fly fishing mentor Ted and his Labrador Retriever Molly The Black River is the mainstream in their story but the novel is not mainstream The River and wilderness are presented as seen through the eyes of Joyce and Josh whose emotional attachment to their environs pulls the reader into their quest The author describes the wrenching action they encounter with captivating prose as this example when they are in the middle of the river in their waders For a long time they were alone until startled by a swish and loud flapping A hawk angled down directly above and dove with its wings held tight piercing the water like an arrow and disappearing under the surface then bursting up in a gush of spray with a large trout hooked in its talons The trout thrashed about fiercely slapping the river with its tail splashing a shower of water The hawk twisting to shake off the droplets let out a shrill scream and hovered momentarily just above water pounding its drenched wings and rising the trout clamped in its black claws The novel slips into fantasy fable and the enchantment of nature A murder a gambling casino a mission church of serpent handlers and accidental oil spills steal into the story seamlessly The author deftly manipulates these genres He inserts the thoughts of his characters through italicized stream of consciousness paragraphs and introduces each by a black silhouette image of an animal which represents that character as a butterfly or a hawk rendering the novel more reader friendly The novel fits into the little publicized genre of slipstream probably exemplified best by the writings of Jorge Luis Borges But there is no slipstream section at our current bookstores Even the main character the River is unpredictable sometimes harsh yet comforting even obedient Through a Kangaroo Court a medium of last resort the author deftly convinces his readers that this is the only fair trial available for the guilty party His readers will be intrigued and drawn into the story as if it were true Rapture River is a Romance a Murder Mystery an escapist Fable but above all a magical quest for fulfillment in our strange times **America** Fred Setterberg, 1999 A portrait of the nation through tales of

Jacobson,2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer s *Into Thin Air* and Aron Ralston s *Between a Rock and a Hard Place* and lesser known texts such as Patricia C McCairen s *Canyon Solitude* Eddy L Harris s *Mississippi Solo* and Stacy Allison s *Beyond the Limits* She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination s connection to masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention
