## River And Canal:

River and Canal Engineering E S Bellasis,1913      *Black River Canal* Edward P. Fynmore,Harney J. Corwin,2005-07  
Black River Canal documents in images how a manmade river transformed a region This upper New York State canal was an improbable engineering success In 1825 DeWitt Clinton proposed construction of a canal that would link the Erie Canal at Rome with the Black River at Lyons Falls The idea was well received but the obstacles were great The canal would have to run uphill In the end the 35 mile overland canal required a record 109 locks to negotiate a rise and fall of 1 079 feet Construction was authorized in 1836 and against all odds the Black River Canal was fully operational in 1855 The canal brought a measure of prosperity to an isolated region of the state and promoted development of a wood products industry that continues to this day      *In the Matter of Lake Superior and Mississippi Canal* Minnesota. the next thing is to estimate the probable maximum intensity of the rainfall during that time over the whole catchment area  
The only figures immediately available will be the mean annual rainfall or perhaps the maximum fall in twenty four hours but  
it has been shown chap II Art 5 how the probable maximum fall over a shorter period      **Canals for a Nation** Ronald E.
