Edited by Professor Imtiaz Ahmed the contributors of this book from India Nepal and Pakistan are leading readers on a journey through the transboundary rivers of South Asia where rivers are vital for the life and living The book explains why the region needs a framework for cooperation on the wellbeing of these rivers River management is the key to sustaining healthy river systems The authors stress that right of the rivers must be codified and guaranteed by the state and the people in South Asia However the statist approach to the transboundary rivers in South Asia actually conceives them as national rivers This volume contributes to the current campaign of overcoming the water dystopias in South Asia

Smelter Smoke in North America John D. Wirth, 2000 Air pollution challenges nations sharing common borders to balance economic needs with protecting citizens and the environment across jurisdictions By examining landmark cases on the two borders John Wirth shows how environmental diplomacy citizen action at the grassroots level and the role of science industry and the law converged bringing Canada the United States and Mexico to the threshold of today's continental approaches to pollutant pathways Wirth first examines the famous Trail smelter conflict of 1927 1941 This precedent setting case which pitted U S farmers against the Canadian smelter resulted in the doctrine that in cases of transborder damage the polluter must pay Although the farmers were modestly compensated and the British Columbia based smelter cooperated to control pollution Wirth reveals the real significance of the decision U S industries shared with the Canadians a common interest to resolve the case in a manner that would allow them to continue to pollute freely across international borders with minimal regulation Wirth then turns to the Gray Triangle confrontations of the 1980s in which the new instruments of the Clean Air Act and cooperative policies developed by the Mexican and U S governments established an entirely new climate for citizen action resulting in the closing of an American smelter in Arizona and the imposition of stricter standards on two Mexican smelters in Sonora Although the Trail precedent favored industry the Gray Triangle resolution signaled that the needs of industry and the public interest were now in better balance Drawing on extensive interviews and previously untapped archives *Smelter Smoke in North America* provides new analysis of the development of a North American institutional response to continental air pollution It chronicles how industry developed a continental perspective in a shared regional space the mineralized West and how successful efforts of governments and citizens to protect the environment evolved

[The Natural West](#) Dan Flores, 2003-03-30 The Natural West offers essays reflecting the natural history of the American West as written by one of its most respected environmental historians Developing a provocative theme Dan Flores asserts that Western environmental history cannot be explained by examining place culture or policy alone but should be understood within the context of a universal human nature The Natural West entertains the notion that we all have a biological nature that helps explain some of our attitudes towards the environment FLores also explains

the ways in which various cultures including the Comanches New Mexico Hispanos Mormons Texans and Montanans interact with the environment of the West Gracefully moving between the personal and the objective Flores intersperses his writings with literature scientific theory and personal reflection The topics cover a wide range from historical human nature regarding animals and exploration to the environmental histories of particular Western bioregions and finally to Western restoration as the great environmental theme of the twenty first century
