## **Rivers For Life Managing Water For People And Nature:**

**Rivers for Life** Sandra Postel, Brian Richter, 2012-06-22 The conventional approach to river protection has focused on water quality and maintaining some minimum flow that was thought necessary to ensure the viability of a river. In recent years, however, scientific research has underscored the idea that the ecological health of a river system depends not on a minimum amount of water at any one time but on the naturally variable quantity and timing of flows throughout the year. In *Rivers for Life*, leading water experts Sandra Postel and Brian Richter explain why restoring and preserving more natural river flows are key to sustaining freshwater biodiversity and healthy river systems and describe innovative policies, scientific approaches, and management reforms for achieving those goals. Sandra Postel and Brian Richter explain the value of healthy rivers to human and ecosystem health, describe the ecological processes that support river ecosystems, and how they have been disrupted by dams, diversions, and other alterations. They consider the scientific basis for determining how much water a river needs, examine new management paradigms focused on restoring flow patterns and sustaining ecological health, assess the policy options available for managing rivers and other freshwater systems, explore building blocks for better river governance. Sandra Postel and Brian Richter offer case studies of river management from the United States, the San Pedro Green and Missouri, Australia, the Brisbane, and South Africa, the Sabie, along with numerous examples of new and innovative policy approaches that are being implemented in those and other countries. *Rivers for Life* presents a global perspective on the challenges of managing water for people and nature with a concise yet comprehensive overview of the relevant science, policy, and management issues. It presents exciting and inspirational information for anyone concerned with water policy, planning, and management, river conservation, freshwater biodiversity, or related topics.

### **River Discharge to the Coastal Ocean**

John D. Milliman, Katherine L. Farnsworth, 2013-03-28 Rivers provide the primary link between land and sea. Utilizing the world's largest database, this book presents a detailed analysis and synthesis of the processes affecting fluvial discharge of water, sediment, and dissolved solids. It also discusses the ways in which climatic variation, episodic events, and anthropogenic activities past, present, and future affect the quantity and quality of river discharge. The book contains more than 165 figures, many in full color, including global and regional maps. An extensive appendix presents the 1534 river database as a series of 44 tables that provide quantitative data regarding the discharge of water, sediment, and dissolved solids. The complete database is also presented within a GIS-based package available online at [www.cambridge.org/milliman](http://www.cambridge.org/milliman). Now available in paperback, reprinted with corrections, this is an invaluable resource for researchers, professionals, and graduate students in hydrology, oceanography, geology, geomorphology, and environmental policy.

### **Climate, Energy and Water**

Jamie Pittock, Karen Hussey, Stephen Dovers, 2015-03-19 With the global population expected to reach nine billion by 2050, our capacity to provide enough food, water, and energy relies on our understanding and management of the complex interdependencies in the climate-energy-water nexus. This book presents a comprehensive and up-to-date analysis of the

interdependencies between these sectors and the knock on consequences of those interactions for other sectors such as food production and biodiversity conservation The interdisciplinary nature of the book across the three sectors of climate energy and water means that it will be valuable for advanced students researchers and policymakers across a broad range of fields including environmental energy water climate policy environmental economics climate science hydrology ecology and geography

**Finding the Voice of the River** Gary J. Brierley, 2019-09-27 This book addresses societal relationships to river systems highlighting many unexplored possibilities in how we know and manage our rivers Brierley contends that although we have good scientific understanding of rivers with remarkable prospect for profound improvements to river condition management applications greatly under deliver He conceptualizes approaches to river repair in two very different ways Medean competitive and Gaian cooperative Rather than managing rivers to achieve particular anthropogenic goals the former option this book adopts a more than human approach to living with living rivers the latter option applying a river rights framework that conceptualizes rivers as sentient entities Chapters build on significant experience across many parts of the world emphasizing the diverse array of river attributes and relationships to be protected and the wide range of problems to be addressed Although the book has an environmental focus it is framed as an argument in popular philosophy contemplating the agency of rivers as place beings It will be of great value to academics students and general readers interested in protecting river systems

Keeping God's Earth Noah Toly, Noah J. Toly, Daniel I. Block, 2010-05-26 Diversity of life Water resources Global climate change Cities and global environmental issues We all know being a Christian involves ethical responsibility But what exactly are our environmental obligations This unique volume teams up scientists with biblical scholars to help us discern just not that question What does the Lord require of us

*Water Ethics* David Groenfeldt, 2019-02-21 Fully revised and updated this second edition of Water Ethics continues to consolidate water ethics as a key dimension of water related decisions The book introduces the idea that ethics are an

intrinsic dimension of any water policy program or practice and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management Alongside updated references and the introduction of discussion questions and recommended further reading this new edition discusses in depth three significant developments since the publication of the first edition in 2013 The first is the growing awareness of the climate crisis as an existential threat and associated concern about adaptive strategies for sustainable water management and ways of using water management for climate mitigation e g practically through agricultural soil management and conceptually through ethics awareness Second there has been increased clarity among the religious community Indigenous leaders and progressive academics that ethics needs to become an arena for application and action e g the Vatican encyclical Laudato Si protests at Standing Rock and Flint Michigan in the US and climate demonstrations worldwide Thirdly there have been new normative water standards ranging from water stewardship industry initiative water charters Berlin and the on going initiative to develop a global water ethics charter Drawing on case studies from countries including Australia India the Philippines South Africa and the United States this textbook is essential reading for students of environmental ethics and water governance and management

**Conservation is not Enough** Janine Schipper, 2025-04-15 Conservation Is Not Enough reconsiders the most basic assumptions about water issues in the Southwest revealing why conservation alone will not lead to a sustainable water future The book undertakes a thorough examination of the prevailing conservation ethos deeply ingrained in the culture critically analyzing its historical roots and shedding light on its problems and inherent limitations Additionally it explores deep ecology and an Indigenous water ethos offering radically different ways of understanding and experiencing water Using an exploratory and qualitative approach the book draws on more than ninety five interviews conducted over three years revealing the complex relationships people have with water in the Southwest and prominently features the voices of participants effectively illustrating multiple perspectives and diverse ways of thinking about and relating to water Schipper highlights various perspectives including a water manager making conservation decisions a Hopi elder emphasizing our connection to the water cycle and a ski instructor reflecting on human made snow and interweaves personal experiences and reflections on her own relationship with water and conservation efforts Conservation Is Not Enough encourages readers to reflect on their personal connections to water and consider new possibilities and it also urges readers to think beyond conventional conservation approaches This book helps to transform the collective approach to water and cultivate fresh ways of engaging with and relating to water and is of great interest to scholars students and residents concerned with water issues in the Colorado River Basin

**Liquid Assets** Sandra Postel, Lisa Mastny, 2005 Deep Blue Sylvie Shaw, Andrew Francis, 2014-12-05 Nature religions look to rivers lakes and oceans for inspiration and spiritual transformation Deep Blue brings together the work of influential scholars in the field of nature religion ranging across anthropology mythology sociology and psychology The essays examine the interrelationship

between spiritual practice critical thinking and environmental concern Tracing the ancient history of humanity's close relationship with both salt and fresh water the book calls for a sustainable relationship with water in contemporary western culture Deep Blue will be of interest to students of paganism and religion environmental researchers and activists and all those involved in the intersection between religion and ecology

**Handbook of Water Resources Management: Discourses, Concepts and Examples** Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12 This book provides an overview of facts theories and methods from hydrology geology geophysics law ethics economics ecology engineering sociology diplomacy and many other disciplines with relevance for concepts and practice of water resources management It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates The book refers to case studies in the form of boxes sections or as entire chapters They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes Based on consolidated state of the art knowledge it has been conceived and written to attract a multidisciplinary audience The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi level decision making processes Knowing more about water but also about concepts methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making

**Water for the Environment** Avril Horne, Angus Webb, Michael Stewardson, Brian Richter, Mike Acreman, 2017-08-16 Water for the Environment From Policy and Science to Implementation and Management provides a holistic view of environmental water management offering clear links across disciplines that allow water managers to face mounting challenges The book highlights current challenges and potential solutions helping define the future direction for environmental water management In addition it includes a significant review of current literature and state of knowledge providing a one stop resource for environmental water managers Presents a multidisciplinary approach that allows water managers to make connections across related disciplines such as hydrology ecology law and economics Links science to practice for environmental flow researchers and those that implement and manage environmental water on a daily basis Includes case studies to demonstrate key points and address implementation issues

**Global Challenges in Water Governance** Jeremy J. Schmidt, Nathaniel Matthews, 2017-07-24 This book presents a historically situated explanation of the rise of global water governance and the contemporary challenges that global water governance seeks to address It is particularly concerned with connecting what are often technical issues in water management with the social and political structures that affect how technical and scientific advice affects decisions Schmidt and Matthews are careful to avoid the pitfalls of setting up opposing binaries such as nature versus culture or private versus public thereby allowing readers to understand how contests over water governance have been shaped over time and why they will continue to be so Co written by an academic and a practitioner Global Challenges in Water Governance combines

the dual concerns for both analytical clarity and practical applicability in a way that is particularly valuable both for educators researchers decision makers and newcomers to the complexities of water use decisions *Land Use Effects on Streamflow and Water Quality in the Northeastern United States* Avril L. de la Cretaz, Paul K. Barten, 2007-06-01 Filling a long standing need for a desk reference that synthesizes current research *Land Use Effects on Streamflow and Water Quality in the Northeastern United States* reviews and discusses the impact of forest management agriculture and urbanization The book provides a gateway to the diverse scientific literature that is urgently needed Soil Water and Agronomic Productivity Rattan Lal, B.A. Stewart, 2012-06-19 Crop water use can be increased by management of surface runoff groundwater irrigation and soil water Technological innovations to enhance availability of water for agricultural crops depend on soil and site specific conditions Devoted to the principles and practices of enhancing water use efficiency *Soil Water and Agronomic Productivity* addr **Investing in Nature** William Ginn, 2013-04-10 In 2004 U S consumers spent 52 billion purchasing bottled water while the government only invested 5 percent of that amount to purchase critical watersheds parks and wildlife refuges systems vital to clean water and healthy environments How can we reverse the direction of such powerful economic forces A group of dedicated business people turned environmental entrepreneurs is pioneering a new set of tools for land conservation deals and other market based strategies These pragmatic visionaries have already used these methods to protect millions of acres of land and to transform the practices of entire industries They are transforming the very nature of conservation by making it profitable Drawing on his vast experience in both business and land conservation at The Nature Conservancy TNC William Ginn offers a practical guide to these innovative methods and a road map to the most effective way to implement them From conservation investment banking to emerging markets for nature s goods and services to new tax incentives that encourage companies to do the right thing Ginn goes beyond the theories to present real world applications and strategies And just as importantly he looks at the lessons learned from what has not worked including his own failed efforts in Papua New Guinea and TNC s controversial compatible development approach in Virginia In an era of dwindling public resources and scarce charitable dollars these tools reveal a new and perhaps the only pathway to achieving biodiversity goals and protecting our lands Conservation professionals students of land conservation and entrepreneurs interested in green business will find Ginn s tales of high finance deals involving vast tracts of pristine land both informative and exciting More than just talk *Investing in Nature* will teach you how to think big about land conservation **Property Rights and Sustainability** David Grinlinton, Prue Taylor, 2011-04-11 Published with the support of The New Zealand Law Foundation As collapses and crises involving ecological systems economic and financial management and international governance increase the need for bold alternatives to traditional economic and legal responses has never been more urgent Property concepts are an important element in the interaction between humans and the natural environment An important driver of ecological harm property concepts can also become a powerful tool for responding to ecological problems in ways

that have so far eluded both government regulators and markets Going beyond the traditional critiques of liberal property theories Property Rights and Sustainability takes on the challenge of fundamentally reconceptualising property rights and systems It makes a significant contribution to rebalancing the legal framework in a way that recognises humanity as a member of a larger ecological order the health and integrity of which is of primary importance to the long term viability of our planet Property Rights and Sustainability will be an indispensable resource for those interested in the relationship between property law and the environment and the ways in which property law can be reshaped to respond to the ecological challenges of our time

**Progress in Water Footprint Assessment** Arjen Y. Hoekstra, Ashok K. Chapagain, Pieter Van Oel, 2019-06-24 Water Footprint Assessment is a young research field that considers how freshwater use scarcity and pollution relate to consumption production and trade patterns This book presents a wide range of studies within this new field It is argued that collective and coordinated action at different scale levels and along all stages of commodity supply chains is necessary to bring about more sustainable efficient and equitable water use The presented studies range from farm to catchment and country level and show how different actors along the supply chain of final commodities can contribute to more sustainable water use in the chain

**The Status and Distribution of Freshwater Biodiversity in Central Africa** E. G. E. Brooks, W. R. T. Darwall, 2011 One of the main reasons cited for inadequate representation of biodiversity in the development processes is a lack of readily available information on inland water taxa In response to this need for basic information on species the IUCN Species Programme conducted a regional assessment of the status and distribution of 2 261 taxa of freshwater fishes molluscs odonates crabs and selected families of aquatic plants from throughout central Africa This study is based on the collation and analysis of existing information and the knowledge of regional experts
