## **Roadmap To Professions Future The Millis Study Commission On Pharmacy:**

**The Millis Study Commission on Pharmacy** Dennis B. Worthen, 2006-02-17 A book for today's student of pharmacy as well as the pharmacy professional. There were several surveys and conferences on pharmacy during the twentieth century but few had the impact of the Millis Study Commission on Pharmacy. The Millis Study Commission on Pharmacy A Road Map to a Profession's Future is an insightful look at the report and its effects on today's pharmacy profession. The book chronicles the educational surveys of the twentieth century, reviews the study's impact on the profession, and then presents Pharmacists for the Future, the actual Millis Study Commission's 1975 report. This source provides a multi-perspective look at pharmacy, its place in society, and its direction for the future. The Millis Commission is seen as the turning point for pharmacy as a profession, calling for a shift in focus from being product-centered to being patient-centered. One reason the study has remained so effectual was that the study commission's views came from a membership that included not only pharmacy professionals but also educators and other health professionals who provided a depth of knowledge beyond but still interconnected with pharmacy. The Millis Study Commission on Pharmacy A Road Map to a Profession's Future reviews pharmacy's forces of change, educational recommendations, and credentialing issues, past and present. The book also traces the Minnesota Program and Kellogg Program, direct applications of the study's suggestions. Helpful tables and a thorough bibliography are included to provide full clarity of thought. The Millis Study Commission on Pharmacy A Road Map to a Profession's Future discusses the history of pharmacy in the twentieth century, differences between other studies, and the Millis study, the Health Manpower Act of 1968, evolving educational standards and recommendations, changing roles of pharmacists, pharmacist activities beyond distribution, the future of pharmacy. The Millis Study Commission on Pharmacy A Road Map to a Profession's Future is an essential resource for educators, graduate students, pharmaceutical professionals, pharmacists, health professionals, and anyone interested in the history of pharmacy.

**A Brief History of Pharmacy** Bob Zebroski, 2015-08-20 Pharmacy has become an integral part of our lives. Nearly half of all 300 million Americans take at least one prescription drug daily, accounting for 250 billion per year in sales in the US alone. And this number doesn't even include the over-the-counter medications or health aids that are taken. How did this practice become such an essential part of our lives and our health? A Brief History of Pharmacy: Humanity's Search for Wellness aims to answer that question. As this short overview of the practice shows, the search for well-being through the ingestion or application of natural products and artificially derived compounds is as old as humanity itself. From the Mesopotamians to the corner drug store, Bob Zebroski describes how treatments were sought, highlights some of the main victories of each time period, and shows how we came to be people who rely on drugs to feel better, to live longer, and look younger. This accessible survey of pharmaceutical history is essential reading for all students of pharmacy.
