Dorland's Illustrated Medical Dictionary and Mosby's Drug Reference W. A. Newman Dorland, 2003-11-01 *Medical Dictionary*, 1997

The American Illustrated Medical Dictionary William Alexander Newman Dorland, 1900 [A Concise Dictionary of Novel Medical and General Hebrew Terminology from the Middle Ages](#) Gerrit Bos, 2019-07-08 The terminology in medieval Hebrew medical literature original works and translations has been sorely neglected by modern research Medical terminology is virtually missing from the standard dictionaries of the Hebrew language including Ha Millon he adash composed by Abraham Even Shoshan Ben Yehuda's dictionary is the only one that contains a significant number of medical terms Unfortunately Ben Yehuda's use of the medieval medical texts listed in the dictionary's introduction is inconsistent at best The only dictionary exclusively devoted to medical terms both medieval and modern is that by A M Masie entitled Dictionary of Medicine and Allied Sciences However like the dictionary by Ben Yehuda it only makes occasional use of the sources registered in the introduction and only rarely differentiates between the various medieval translators Further since Masie's work is

alphabetized according to the Latin or English term it cannot be consulted for Hebrew terms The Historical Dictionary of the Hebrew Language which is currently being created by the Academy of the Hebrew Language has not been taken into account consistently as it is not a dictionary in the proper sense of the word Moreover consultation of this resource suggests that it is generally deficient in medieval medical terminology The Bar Ilan Responsa Project has also been excluded as a source despite the fact that it contains a larger number of medieval medical terms than the Historical Dictionary The present dictionary has two major objectives 1 to map the medical terminology featured in medieval Hebrew medical works in order to facilitate study of medical terms especially those terms that do not appear in the existing dictionaries and terms that are inadequately represented 2 to identify the medical terminology used by specific authors and translators to enable the identification of anonymous medical material
