Lost In Space The Reagan Years:

Lost in Space Tony Auth,1988-01-01 *Lost in Space* Greg Klerkx,2005-01-11 The daring revolutionary NASA that sent Neil Armstrong to the moon has lost its meteoric vision says journalist and space enthusiast Greg Klerkx NASA he contends has devolved from a pioneer of space exploration into a factionalized bureaucracy focused primarily on its own survival And as a result humans haven't ventured beyond Earth orbit for three decades Klerkx argues that after its wildly successful Apollo program NASA clung fiercely to the spotlight by creating a government sheltered monopoly with a few Big Aerospace companies Although committed in theory to supporting commercial spaceflight in practice it smothered vital private sector innovation In striking descriptions of space milestones spanning the golden 1960s Space Age and the 2003 Columbia tragedy Klerkx exposes the real NASA and envisions exciting public private cooperation that could send humans back to the moon and beyond *Lost in Space* Marleen S. Barr,2017-11-01 Archaeologists and anthropologists discover other civilizations science fiction writers invent them In this collection of her major essays Marleen Barr argues that feminist science fiction writers contribute to postmodern literary canons with radical alternatives to mainstream patriarchal society Because feminist science fiction challenges male centered social imperatives it has been marginalized and dismissed from the canon thus lost in space Moving beyond feminist science fiction itself Barr goes on to examine other literary genres from the perspective of feminist fabulation a term she has coined to encompass science fiction fantasy utopian literature and mainstream literature that critiques patriarchal fictions Discussing the works of such writers as Margaret Atwood Joanna Russ Salman Rushdie Paul Theroux Ursula Le Guin Herman Melville Saul Bellow Edgar Allan Poe and Marge Piercy Barr illuminates feminist science fiction's connections to other literary traditions and contemporary canons Her critical analysis yields a new and expanded understanding of feminist creativity *Lost in Space* Gerald M. Steinberg,1988 **Way Out There In the Blue** Frances FitzGerald,2001-02-21 *Way Out There in the Blue* is a major work of history by the Pulitzer Prize winning author of *Fire in the Lake* Using the Star Wars missile defense program as a magnifying glass on his presidency Frances FitzGerald gives us a wholly original portrait of Ronald Reagan the most puzzling president of the last half of the twentieth century Reagan's presidency and the man himself have always been difficult to fathom His influence was enormous and the few powerful ideas he espoused remain with us still yet he seemed nothing more than a charming simple minded inattentive actor FitzGerald shows us a Reagan far more complex than the man we thought we knew A master of the American language and of self presentation the greatest storyteller ever to occupy the Oval Office Reagan created a compelling public persona that bore little relationship to himself The real Ronald Reagan the Reagan who emerges from FitzGerald's book was a gifted politician with a deep understanding of the American national psyche and at the same time an executive almost totally disengaged from the policies of his administration and from the people who surrounded him The idea that America should have an impregnable shield against nuclear weapons was Reagan's invention His famous Star Wars speech in which he

promised us such a shield and called upon scientists to produce it gave rise to the Strategic Defense Initiative Reagan used his sure understanding of American mythology history and politics to persuade the country that a perfect defense against Soviet nuclear weapons would be possible even though the technology did not exist and was not remotely feasible His idea turned into a multibillion dollar research program SDI played a central role in U S Soviet relations at a crucial juncture in the Cold War and in a different form it survives to this day Drawing on prodigious research including interviews with the participants FitzGerald offers new insights into American foreign policy in the Reagan era She gives us revealing portraits of major players in Reagan s administration including George Shultz Caspar Weinberger Donald Regan and Paul Nitze and she provides a radically new view of what happened at the Reagan Gorbachev summits in Geneva Reykjavik Washington and Moscow FitzGerald describes the fierce battles among Reagan s advisers and the frightening increase of Cold War tensions during Reagan s first term She shows how the president who presided over the greatest peacetime military buildup came to espouse the elimination of nuclear weapons and how the man who insisted that the Soviet Union was an evil empire came to embrace the Soviet leader Mikhail Gorbachev and to proclaim an end to the Cold War long before most in Washington understood that it had ended Way Out There in the Blue is a ground breaking history of the American side of the end of the Cold War Both appalling and funny it is a black comedy in which Reagan playing the role he wrote for himself is the hero

One More 'Lost Peace'? Raffaele D'Agata, Lawrence Gray, 2011 Were there any missed chances to build a more peaceful world than the present one after the Cold War Were there any attempts at working out a more comprehensive and more cooperative way to overcome it What was precisely at stake during the Cold War What was really at stake for the losers and what stakes did the winners gain if there are any winners at all Those questions were raised during a seminar where some outstanding scholars were invited to discuss them plainly before an audience of young students in an ancient yet peripheral Italian university The result may be seen as a readable concentration of basic and meaningful insights that often defy a noticeable amount of conventional wisdom on the ground of careful and authoritative scholarly research Writing

Presidents of the United States--their Written Measure James Sayler, 1996 **The Lost Decade? The 1950s in European History, Politics, Society and Culture** Heiko Feldner, Claire Gorrara, Kevin Passmore, 2010-10-12 This volume of essays explores the social political and cultural legacies of a decade which has until relatively recently received scant scholarly attention Sandwiched uncomfortably between the traumatic events of the Second World War and the dramatic changes of the 1960s the 1950s appeared as seemingly transitional years while they were in fact an astonishingly fecund period of reassessment and experimentation when traditional models were re evaluated and new models were road tested to be either developed or rejected An important intervention in the dynamic scholarly re

examination of the 1950s this volume analyzes these years in relation to three broadly defined areas historiography politics and society and culture What emerges from all three parts of the volume is a vision of the 1950s as a decade which was to have a profound impact on post war European identities in two key respects as a time of accelerated European intellectual exchange and as a time of fertile receptivity to the new variously formulated and contested across and within national borders Written by experts in the field the contributions to this volume represent some of the most exciting work on the 1950s currently being undertaken in Europe and the US They combine high intellectual standards with accessibility and will appeal to academics students and the general reader alike *Editorial Cartooning and Caricature* Paul Somers,1998-02-18 This reference traces the historical background of editorial cartooning and presents works that chronicle the history and criticize the aesthetics of the art It also describes anthologies and exhibition catalogs that reprint editorial cartoons and provides a list of libraries museums and historical societies which house originals and photocopies or clippings of editorial cartoons This expansive volume examines the American editorial cartoon from its beginnings in 1747 into the second Clinton administration It fills a gap in the literature providing comprehensive information on a field of growing interest to scholars and collectors This reference guide studies the evolution of editorial cartooning and places it in its historical context and provides appreciation and criticism of the cartoons presented In addition to political cartoons underground radical and propaganda cartoons are also discussed in this volume The appendixes offer important cross reference tools such as a chronology and include listings of selected historical periodicals theses and dissertations covering political cartoons This work will be of value to a broad spectrum of readers from collectors to scholars and is suitable for many fields of study

Lost to Eternity Greg Cox,2024-07-23 A thrilling new Star Trek movie era novel from New York Times bestselling author Greg Cox Three Eras Three Mysteries One Ancient Enemy 2024 Almost forty years ago marine biologist Gillian Taylor stormed away from her dream job at Sausalito s Cetacean Institute and was never seen or heard from again Now a new true crime podcast has reopened that cold case but investigator Melinda Silver has no idea that her search for the truth about Gillian s disappearance will ultimately stretch across time and space and attract the attention of a ruthless obsessive with his own secret agenda 2268 The U S S Enterprise s five year mission is interrupted when Captain James T Kirk and his crew set out to recover an abducted Federation scientist whose classified secrets are being sought by the Klingons as well The trail leads to a barbaric world off limits to both Starfleet and the Klingon Empire and an ageless mastermind on a quest for eternity 2292 The Osori an ancient alien species has finally agreed to establish relations with its much younger neighbors the Federation the Klingons and the Romulans A joint mission involving ships from all three powers including the Enterprise A turns explosive when one of the Osori envoys is apparently killed Each side blames the others but the truth lies buried deep nearly three hundred years in the past TM 2023 CBS Studios Inc Star Trek and related marks and logos are trademarks of CBS Studios Inc All Rights Reserved **Weapons in Space** Aaron Bateman,2024-05-07 A new and provocative take on the

formerly classified history of accelerating superpower military competition in space in the late Cold War and beyond In March 1983 President Ronald Reagan shocked the world when he established the Strategic Defense Initiative SDI derisively known as Star Wars a space based missile defense program that aimed to protect the US from nuclear attack In *Weapons in Space* Aaron Bateman draws from recently declassified American European and Soviet documents to give an insightful account of SDI situating it within a new phase in the militarization of space after the superpower d tente fell apart in the 1970s In doing so Bateman reveals the largely secret role of military space technologies in late Cold War US defense strategy and foreign relations In contrast to existing narratives *Weapons in Space* shows how tension over the role of military space technologies in American statecraft was a central source of SDI s controversy even more so than questions of technical feasibility By detailing the participation of Western European countries in SDI research and development Bateman reframes space militarization in the 1970s and 1980s as an international phenomenon He further reveals that even though SDI did not come to fruition it obstructed diplomatic efforts to create new arms control limits in space Consequently *Weapons in Space* carries the legacy of SDI into the post Cold War era and shows how this controversial program continues to shape the global discourse about instability in space and the growing anxieties about a twenty first century space arms race

The Lost Frontier Mark Asquith,2014-06-19 The success of *The Shipping News* and the film of *Brokeback Mountain* brought Proulx international recognition but their success merely confirms what literary critics have known for some time Proulx is one of the most provocative and stylistically innovative writers in America today She is at her best in the short story format and the best of these are to be found in her Wyoming trilogy in which she turns her eye on America s West both past and present Yet despite the vast amount of print expended reviewing her books there has been nothing published on the Wyoming Stories There is appetite for such a work the plethora of critical work on McCarthy s Border Trilogy indicates that the reinvention of the West is a subject for serious academic study Annie Proulx s Wyoming Stories fills this critical void by offering a detailed examination of the key stories in the trilogy *Close Range* 1999 *Bad Dirt* 2004 *Fine Just the Way it Is* 2008 The chapters are arranged according to western archetypes the Pioneer Rancher Cowboy Indian and arguably the most important character of them all in Proulx s fiction Landscape Annie Proulx s Wyoming Stories offers students a clear sense of the novelist s early life and work stylistic influences and the characteristics of her fiction and an understanding of where the Wyoming Stories and Annie Proulx s work as a whole fits into traditional and contemporary writing about the American West

Ronald Reagan and the Space Frontier John M. Logsdon,2018-11-26 When Ronald Reagan was elected in 1980 limits on NASA funding and the lack of direction under the Nixon and Carter administrations had left the U S space program at a crossroads In contrast to his predecessors Reagan saw outer space as humanity s final frontier and as an opportunity for global leadership His optimism and belief in American exceptionalism guided a decade of U S activities in space including bringing the space shuttle into operation dealing with the 1986 Challenger accident and its aftermath committing to a permanently crewed

space station encouraging private sector space efforts and fostering international space partnerships with both U S allies and with the Soviet Union Drawing from a trove of declassified primary source materials and oral history interviews John M Logsdon provides the first comprehensive account of Reagan s civilian and commercial space policies during his eight years in the White House Even as a fiscal conservative who was hesitant to increase NASA s budget Reagan s enthusiasm for the space program made him perhaps the most pro space president in American history **Lost in Space** Jon Schiller,2009 The US Space Shuttle delivering supplies to the US Space Station has a mechanical breakdown that prevents its return to the Earth The remaining two US Space Shuttles are launched as quickly as possible to carry the needed supplies to the Space Station before the people there run out of expendables air water etc Both aging Shuttles suffer breakdowns one explodes on the launch pad and the other has a breakdown in orbit near the Space Station This second Shuttle is close enough to the Space Station to be secured by a cable and then winched up to the Space Station docking gate The hero Dr Donald Richards devises two options for rescuing the stranded astronauts use the new European Space Station Shuttle or use the Soviet Space Shuttle The US President over rules NASA s recommendation to use the Soviet Space Shuttle for the rescue so Richards negotiates an agreement with the European Space Agency to use their Shuttle to rescue the astronauts **The Greenwood Guide to American Popular Culture: Editorial cartoons through Illustration** M. Thomas Inge,Dennis Hall,2002 **Current Biography Yearbook** ,2006 *Current Biography Yearbook* H.W. Wilson Company,2006 Outer Space Development, International Relations and Space Law Edythe Weeks,2013-02-21 It is the eve of outer space development but few people are aware of this In the absence of awareness people cannot prepare for the opportunities that will arise and so the vast wealth likely to flow to Earth from outer space will cause ever greater inequality and instability in our already unequal and unstable world This book is a call to educators to factor equality and diversity into the process of outer space development by creating a widespread movement to teach outer space development studies to all students especially those who study social and behavioral sciences In calling for this the author is also putting out a call to visionary thinkers to increase public awareness that outer space is already in the process of being developed Her objective is to provide a pedagogical approach aimed at mending the knowledge gap If we fail in this objective we are more likely than ever before to witness ever widening gaps of social and financial inequality The first question that will arise as we embark on this process of course will be Why outer space development People often ask where the money will come from to develop outer space Platinum group metals such as iridium and osmium and various other valuable untapped natural resources have been discovered in abundant quantities and are likely to be mined by companies The discovery of natural resources has sparked development projects in the past These historical patterns of human behavior are occurring again today as companies speed up the process of private spaceship development A myriad of space laws and policies are already in place to support space commercialization Recently the 2010 NASA Authorization Act and various other laws and policies initiated by the US

government have placed on the agenda plans to build advanced space transportation systems to privatize spacecraft development to create commercial space habitats space stations and space settlements to initiate commercial space mining to investigate spacecraft trajectory optimization for landing on near Earth asteroids to engage in commercial spaceport construction and interstellar interplanetary international telecommunications and to launch space exploration missions to near Earth asteroids the Moon Mars and Mars's moons US initiatives have in the past been mirrored by the international community and we can expect to see similar patterns arising on a global scale indeed as this book will demonstrate they already are The global community is experiencing economic recession natural disasters lack of opportunity employment anxiety failing K 12 programs widening inequality gaps uprisings revolutions revolts unmet educational goals and a general failure to uplift inspire and provide meaningful opportunities for significant portions of our population People need something that will allow them to focus anew their talents energies abilities and gifts and use this bleak climate as an opportunity for positive change Outer space development is emerging as an answer to this state of crisis The question is To whom will the benefits accrue Many strategic decisions have already been taken regarding space development of which the global general public is unaware Once legal rights to space resources are granted only those with the capital to take advantage of new laws and policies will be in a position to profit from the new space industries Only those who are in a position to know about outer space development will be in position to take advantage of the opportunities It is important to remember that the global general public has for several decades been paying the start up costs for space exploration research science and technology It's not too late to factor in equality before an infrastructure of inequality is forever with us as we venture to establish the final frontier
