Miller,2013-10-15 Just a few days after she gives birth alone in the Northwoods a recently widowed young Chippewa woman stumbles into a nearby lumber camp in search of refuge and sustenance Come summer the camp owner sends Skypilot his most trusted friend to accompany Moon Song and her baby on the long and treacherous journey back to her people But when tragedy strikes off the shore of Michigan's Upper Peninsula wilderness Moon Song and Skypilot must depend on each other for survival With every step they take into the forbidding woods they are drawn closer together until the tough questions must be asked Will she leave her culture to enter his Will he leave his world to enter hers Or will they walk away from a love that seems too complicated to last With evocative descriptions of a breathtaking landscape Under a Blackberry Moon will sweep readers into a wild realm where beauty masks danger and only the truly courageous survive even as the sweet love story along the way tightly grips their hearts

Who's Asking?

Douglas L. Medin,Megan Bang,2014-01-03 Analysis and case studies show that including different orientations toward the natural world makes for more effective scientific practice and science education The answers to scientific questions depend on who's asking because the questions asked and the answers sought reflect the cultural values and orientations of the questioner These values and orientations are most often those of Western science In Who's Asking Douglas Medin and Megan Bang argue that despite the widely held view that science is objective value neutral and acultural scientists do not shed their cultures at the laboratory or classroom door their practices reflect their values belief systems and worldviews Medin and Bang argue further that scientist diversity the participation of researchers and educators with different cultural

orientations provides new perspectives and leads to more effective science and better science education. Medin and Bang compare Native American and European American orientations toward the natural world and apply these findings to science education. The European American model they find sees humans as separated from nature; the Native American model sees humans as part of a natural ecosystem. Medin and Bang then report on the development of ecologically oriented and community based science education programs on the Menominee reservation in Wisconsin and at the American Indian Center of Chicago. Medin and Bang's novel argument for scientist diversity also has important implications for questions of minority underrepresentation in science.

Here with Me Christina Pickett, 2023-06-08 Each of us face various challenges every day. When one obstacle is resolved, it is almost always replaced by another one of equal or greater value. This leaves us wondering: Does God really have a plan for my life? This is a valid question that is asked by more people than we may realize. Christina Pickett shares personal stories, inspiring lessons, biblical wisdom, and reflective questions that lead believers on an introspective journey of hope intended to help them discover their God-designed purpose and see how He works in every aspect of their lives. While reflecting upon God's kindness and goodness, Pickett reminds believers that He has a divine plan for their lives and that all they need to do is trust Him to move forward into becoming everything He wants them to be. Included is advice on how to write a personal mission statement using scriptures as a guide. **Here with Me** shares a spiritual journey of hope, reflective questions, and biblical wisdom to shine an inspiring light on God's word and reveal truths about His divine plan for all of us.
