Lost Railways of the World Nigel Welbourn, 2023-02-16 Many readers will be familiar with Nigel Welbourn's long running series of books covering lost railways in Britain and Ireland. This new book *Lost Railways of the World* is the latest by this author on the subject of disused railways. The material for this volume has been collected and researched over a period of almost fifty years of world travel by the author. Informative text records the fortunes of the world's lost railways and every country with significant disused railways is included. Lost railways are a unifying theme being found throughout the world from the hottest African desert to the coldest steppes of Russia. The book has a surprisingly British flavor as historically many railways throughout the world used British equipment and operating practices. On his first trip in the 1970s the author discovered British signaling equipment in Europe. In 2020 he discovered the same firm's equipment in South America. The world's top ten lost lines are listed from the seven mile long sea bridge on a line that ran through the Florida Keys to the rugged mountain splendor of the Khyber Pass Railway. Some of the oldest, largest, longest, most northerly, southerly, expensive, crookedest, steepest, highest, lowest and most notorious lost railways are included. Quirky and other unique tales from lost railways are included such as the disappearing phantom bridge, a line destroyed by molten lava to one that sank under the sea, another that conveyed giant turtles to a memorial to a brave railway elephant. The author also visited remote areas of Argentina and provides more information on the mysterious disappearance of the ex Lynton Barnstaple Railway locomotive Lew A. A large number of the 300 color illustrations have not been published before. Maps and stories from around the world will delight not only the railway enthusiast but appeal to a wider cadre of readers with an interest in nostalgia, history, geography and travel. To some the book will be an informative source of information to others it is written in a way that highlights the most amazing lost railways in the world but either way it is a fascinating and unique book.

Lost Lines Tom Ferris, 2020-07-05 Take a nostalgic steam powered journey back in time on the long closed line between Aberystwyth and Carmarthen. Built by the ill fated Manchester and Milford Railway, the fact that it didn't go to either only adds to the romance of this once popular route which fell victim to the Beeching cuts of the 1960s. Includes an essay on the history of the line and photographs of its locomotives, trains and stations.

Modelling Narrow Gauge Railways in Small Scales Chris Ford, 2015-05-31 This invaluable book is essential reading for all those who wish to build a small narrow gauge model railway layout to a high standard. Comprehensive in its coverage, the book begins with a useful summary of the history and development of narrow gauge railways in the British Isles and this is followed by a detailed but easily digestible consideration of the complex and wide choice of scales available to the modeller. In subsequent chapters the author covers all aspects of construction including materials and tools, skills and techniques, layout design, laying the track, scenic modelling, painting, soldering and wiring as well as the construction of narrow gauge stock and appropriate buildings. The author provides clear step by step instructions and photographs to show

the reader how to build a straightforward narrow gauge model of a fictitious late 19th to early 20th century light railway in 4mm scale on 9mm track He also suggests how the methods he has used can be adapted to other scales and briefly explains by way of example how they can be transferred directly to 7mm scale Fully illustrated with 223 colour photographs and also included are several working sketches **Narrow Gauge in the Ypres Sector** Martin J B Farebrother, Joan S

Farebrother, 2024-06-06 The Ypres sector of the Western Front was held predominantly by the British and Dominions Armies from 1914 to 1918 The Ypres Salient at the centre of this sector was one of the most intensively fought over single locations of the First World War By the end of 1917 the sector was full of railways dumps camps and other facilities Much was lost in the German advance in April 1918 but from September 1918 the German Army was driven eastwards until the Armistice Although Ypres and most of the forward areas are in Belgium much of the support area is in northern France In this book the meter gauge networks of both countries established before the First World War are examined with their uses and extensions during the War The build up of light 60cm gauge railways from 1916 to 1918 is described with an assessment of the contribution of both narrow gauges to the war effort After the war the light railways in this sector were generally used only for short term clearing up and salvage The meter gauge railways in Belgium were rebuilt or repaired Those in France had been less affected The story is followed to the closure of the last of these railways This book is a companion volume to those on the Arras Sector 2015 and the Somme Sector 2018 It refers to other previous works on British French and Belgian railways especially during the First World War but contains sufficient information to stand alone **The Railway Magazine**
