resource uniquely offers preservice and inservice teachers templates for using quality children's literature to implement six themes across grades K-8. The themes are based on national curriculum standards and text sets are carefully selected to facilitate discussion, analysis, and problem solving across the grades. *Using Children's Literature Across the Curriculum* provides teachers with a guide to using multilayered texts to facilitate students' attainment of critical literacy. It is designed to be a supplemental text to guide teachers in designing literacy instruction. The instructional sequence includes collaborative inquiry activities across the curriculum to extend each theme to math, science, technology, and social studies. Teachers are shown how to incorporate family literacy with a component entitled *Home School Connections* and to differentiate instruction for individual learners with a section entitled *On Your Own Activities*. The theme concludes with a critical literacy activity that applies the content knowledge of the theme with collaborative inquiry. A unique feature of the handbook is the emphasis on performance-based assessment with each instructional sequence containing two rubrics for the teacher to implement. The instructional sequences are meant as models for teachers to use in developing their own themes in order to facilitate critical literacy. These models can be adjusted to fit the reading level of the students as teachers become more familiar with the text's structure and their students' needs.

The Maya has long been established as the best most readable introduction to the ancient Maya on the market today. This classic book has been updated by distilling the latest scholarship for the general reader and student. This tenth edition incorporates the most recent archaeological and epigraphic findings which continue to proceed at a fast pace along with full colour illustrations. The new material includes evidence of the earliest human occupants of the Maya region and the beginnings of agriculture and settled life, analysis from lidar on swampy areas such as Usumacinta that show enormous rectangular earthworks including Aguada Fénix dating from 1050 to 750 BC and recent advances in decoding Maya writing and imagery. It also expands on information on the roles of women, courtiers, and outsiders, covers novel research about Maya cities including research into water quality, marketplaces, fortifications, and integrated road systems, and features coverage of more recent Maya history including the displacement and mistreatment of the Maya people along with growing affirmations of their cultural identity and rights.
