

An aerial photograph of a beach at sunset or sunrise. The ocean waves are breaking onto the shore, creating white foam. The sand is a warm, golden-brown color. There are some dark rocks scattered along the beach. The overall mood is peaceful and inspiring.

Neuro-linguistic Programming: Affirmations Keith Gilbert,2014-09-13 neuro linguistic programming Affirmations shows you how to design your own affirmations that are relevant to YOUR life Until we give our unconscious minds new ideas to play with they will do what they have always done If you are aware of habits of thinking or behaviours that you don t like then you might want to give yourself new ideas to change those old habits This is where affirmations can be invaluable and neuro linguistic programming Affirmations is the state of the art in affirmations Keith Gilbert author of my favourite parenting book gets to the heart of the problem with affirmations as they re conventionally presented and offers an alternative way of looking at them that s more respectful of our individuality This is a book written by a thinker and for me this author s perspective is always a mentally stimulating change from that of the hacks and parrots I so frequently encounter in this particular genre Bob Collier Creator of the Parental Intelligence Newslette

The State of the American Mind: Stupor and Pathetic Docility Volume Ii Amechi Okolo,2010-06-11 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the fi rst Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues

that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Harvard educated President Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

Clio's Bastards Curtis R. McManus, 2016-06-22 Clio's Bastards uses an examination of the discipline of history in Canadian universities as the point of entry for a much larger exploration of the intellectual spiritual and moral crisis confronting Western civilization today Over the past four decades academic history was slowly perverted as historians adopted new sociological approaches to the study of the past Historians altered the content purpose and goals of the discipline as they sought not Truth but Justice as part of a larger ideological program of radical social change And today the pervasive sociological way of seeing understanding and explaining our world has become the new common sense right across the Western world both inside and outside the academy Sociological thought however is neither new nor advanced nor is it progressive as its adherents claim it is simply recrudescence Sophistry and Cynicism destructive philosophies which ruined and fouled ancient Athens the source and inspiration for Western civilization

Hanson,2014-07-21 Twelve in depth case studies of the EU and countries across the globe written by the leading country specialists and combining insights of cutting edge institutional analysis and deep study of national histories explore how the concepts of interests identities and institutions shape the politics of nations and regions The country studies trace the global and historical contexts of political development and examine the diverse pathways that countries have taken in their quest to adapt to the competitive pressures of twenty first century globalization These country studies constitute the overarching framework of the text addressing the larger question why are countries ruled and governed so differently Free of heavy handed jargon *Comparative Politics* inspires thought provoking debate among introductory students and specialists alike and encourages students to engage in real comparative analysis In this new edition all twelve country studies have been rewritten and the first two theory chapters have been updated to reflect the latest research in the field **Novel-Poetry** Emily Allen,Dino Franco Felluga,2024-09-05 *Novel Poetry* examines the verse novel a hybrid genre that emerged in the middle decades of Britain's nineteenth century to make a larger claim about the nature of genre and formal structures for time action and identity that cross genres The volume uncovers trajectories of literary influence that structure our approach to literature and affect how we shape our lives lives which are often constrained by cause and effect and narrative driven ways of approaching time and possibility *Novel Poetry* tracks an alternative way of thinking about time and event that was inspired by the French Revolution popularized by Lord Byron and explored by experimental Victorian poets such as Elizabeth Barrett Browning Robert Browning Arthur Hugh Clough and George Meredith The volume turns to the work of philosophers Alain Badiou Jean Pierre Dupuy and Slavoj Žižek to theorize this alternative mode which it aligns with the futuristic The temporality of the future anterior disrupts both the novel's realist chronologies and the expressionist lyric's cult of the moment thus liberating possibilities for collective action Ranging widely across romantic lyric poetry Victorian novels and nineteenth century and contemporary literary theory *Novel Poetry* asks what alternative structures and temporalities does a focus on either realistic narrative or the lyric moment

occlude Are there ways of thinking about lived experience and personal or collective agency that do not conform to traditional models ways that the verse novel might help us to explore What might be gained today from trying to think about ourselves and our world outside of established frameworks that are now so naturalized as to feel almost inescapable This is an open access title available under the terms of a CC BY NC ND 4 0 licence
