Makin The Grade:

Making the Grade Howard S. Becker, 2017-07-05 Based on three years of detailed anthropological observation this account of undergraduate culture portrays students academic relations to faculty and administration as one of subjection With rare intervals in crisis moments student life has always been dominated by grades and grade point averages The authors of Making the Grade maintain that though it has taken different forms from time to time the emphasis on grades has persisted in academic life From this premise they argue that the social organization giving rise to this emphasis has remained remarkably stable throughout the century Becker Geer and Hughes discuss various aspects of college life and examine the degree of autonomy students have over each facet of their lives Students negotiate with authorities the conditions of campus political and organizational life the student government independent student organizations and the student newspaper and preserve substantial areas of autonomous action for themselves Those same authorities leave them to run such aspects of their private lives as friendships and dating as they wish But when it comes to academic matters students are subject to the decisions of college faculties and administrators Becker deals with this continuing lack of autonomy in student life in his new introduction He also examines new phenomena such as the impact of grade inflation and how the world of real adult work has increasingly made professional and technical expertise in addition to high grades the necessary condition for success Making the Grade continues to be an unparalleled contribution to the studies of academics students and college life It will be of interest to university administrators professors students and sociologists *Making the Grade* Martin V.

Covington, 1992-04-24 Achievement behaviour in schools can best be understood in terms of attempts by students to maintain a positive self image For many students trying hard is frightening because a combination of effort and failure implies low ability which is often equated with worthlessness Thus many students described as unmotivated are in actuality highly motivated not to learn but to avoid failure Students have a variety of techniques for avoiding failure ranging from cheating to setting low goals which are easily achieved In Making the Grade Martin Covington extracts powerful educational implications from self worth theory and other contemporary views of motivation that will be useful for everyone concerned with the educational dilemmas we face He provides a comprehensive insightful review of research and theory both contemporary and historical on the topic of achievement motivation and arranges this knowledge in ways that lead to imminently practical recommendations for restructuring schools Making the Grade William A. Fischel, 2009-11-15 A significant factor for many

people deciding where to live is the quality of the local school district with superior schools creating a price premium for housing The result is a race to the top as all school districts attempt to improve their performance in order to attract homebuyers Given the importance of school districts to the daily lives of children and families it is surprising that their evolution has not received much attention In this provocative book William Fischel argues that the historical development of school districts reflects Americans desire to make their communities attractive to outsiders The result has been a

standardized interchangeable system of education not overly demanding for either students or teachers one that involved parents and local voters in its governance and finance Innovative in its focus on bottom up processes generated by individual behaviors rather than top down decisions by bureaucrats Making the Grade provides a new perspective on education reform that emphasizes how public schools form the basis for the localized social capital in American towns and cities *Making the Grade* Charles Virgil Mosby,1917 **Colby and Me** H. L. Wegley,2009-11-12 Colby and Me is a collection of true adventure stories drawn from the extraordinary lives of two best friends who believe that they grew up in the finest place at the greatest time ever to be kids in southern Oregon during the 1950s and early 1960s By the time H L was six years old he and Colby had become best buddies who shared a love of the outdoors as well as all things that exploded burned or shot H L shares both humorous and heartfelt stories as he chronicles many of their hair raising adventures beginning in the little country church where Colbys shameless hound Pal entered one Sunday morning and walked the aisle seemingly to receive his penance but in reality just wanting to sit next to his beloved master In a time when kids were free to simply be kids H L details how the boys explored mountaintop limestone caves built a rocket that went awry and viewed a meteorite that they were sure indicated the arrival of aliens The amusing tales of two rambunctious boys in Colby and Me highlight a time in history when children learned valuable life lessons simply by experiencing one amazing adventure after another **Makin' Paper** ,1919 *Decisions and Orders of the National Labor Relations Board* United States.
