Sleeter,1996-07-03 Connecting multicultural education with political issues of power and struggle this book explores what multicultural education means to white people given the unequal racial power relations in the U S and worldwide It examines connections between race gender and social class particularly as these connections play out for white women While taking a feminist perspective the author is also wary of the power white middle class women exercise in defining what counts as gender issues Throughout the book Sleeter argues that multicultural education was born in political struggle and can never meaningfully be disconnected from politics Ultimately the quest for schooling for social justice is a political quest rather than a technical issue

Bartolomé,2008 Exposes the invisible yet pervasive nature of oppressive dominant ideologies the urgent need to articulate their existence and the harmful impact they have on education The solutions to many of the educational challenges facing subordinated students are not purely technical or methodological in nature but are instead rooted in commonly unacknowledged discriminatory ideologies and practices The invisible

foundation hegemonic ideologies that inform our perceptions and treatment of subordinated students needs to be made explicit and studied critically in order to comprehend the challenges presented in minority education and possible solutions more accurately Confronts the continuing existence and vigorous resurgence of not easily named discriminatory perspectives toward students from subordinated cultural groups as well as their numerous manifestations in schools and identifies the measures necessary to neutralize unequal material conditions and biased beliefs From publisher description **History of Multicultural Education Volume 2** Carl A. domains **Intersectionality and Urban Education** Carl A. Grant,Elisabeth Zwier,2014-08-01 In urban education urban is a floating signifier that is imbued with meaning positive or negative by its users Urban can be used to refer to both the geographical context of a city and a sense of less than most often in relation to race and or socioeconomic status Watson 2011 For Noblit and Pink 2007 Urban rather is a generalization as much about geography as it is about the idea that urban centers have problems problems of too many people too much poverty too much crime and violence and ultimately too little hope p xv Recently urban education scholars such as Anyon 2005 Pink and Noblit 2007 Blanchett Klinger and Harry 2009 and Lipman 2013 have elucidated the social construction of oppression and privilege for urban students teachers schools families and communities using intersectionality theories Building on their work we see the need for an edited collection that would look across the different realms of urban education theorizing identity markers in urban education education in urban schools and communities thinking intersectionally in teacher education higher education educational policies urban spaces seeking to better understand each topic using an intersectional lens Such a collection might serve to conceptually frame or provide methodological tools or act as a reference point for scholars and educators who are trying to address urban educational issues in light of identities and power Secondly we argue that education questions and or problems beg to be conceptualized and analyzed through more than one identity axis Policies and practices that do not take into account urban students intertwining identity markers risk reproducing patterns of privilege and oppression perpetuating stereotypes and failing at the task we care most deeply about supporting all students learning across a holistic range of academic personal and justice oriented outcomes Can educational policies and practices address the social justice issues faced in urban schools and communities today We argue that doing intersectional research and implementing educational policies and practices guided by these frameworks can help improve the fit Particular attention needs to be paid to intersectionality as a lens for educational theory policy and practice As urban educators we would be wise to consider the intertwining of these identity axes in order to better analyze educational issues and engage in teaching learning research and policymaking that are better tuned to the needs of diverse students families and communities *History of Multicultural Education Volume 5* Carl A.
