## **Making Equity Planning Work:**

Making Equity Planning Work Norman Krumholz, John Forester, 1990-05-18 From 1969 to 1979 Cleveland's city planning staff under Norman Krumholz's leadership conducted a unique experiment in equity oriented planning. Fighting to defend the public welfare while also assisting the city's poorest citizens, these planners combined professional competence and political judgment to bring pressing urban issues to the public's attention. Although frequently embroiled in controversy while serving three different mayors, the Cleveland planners not only survived but accomplished impressive equity objectives. In this book, Norman Krumholz and John Forester provide the first detailed personal account of a sustained and effective equity planning practice that influenced urban policy. Krumholz describes the pragmatic equity planning agenda that his staff pursued during the mayoral administrations of Carl B. Stokes, Ralph J. Perk, and Dennis J. Kucinich. He presents case studies illuminated with rich personal experience of the Euclid Beach development, the Clark Freeway, and the tax delinquency and land banking project that resulted in a change in the State of Ohio's property law, among others. In the second part of the book, John Forester explores the implications of this experience and the lessons that can be drawn for planning, public management, and administrative practice more generally.

This is truly a handbook, a book you will want to keep on hand for frequent reference and to which GIS professors should direct students entering our field. Selection of a few of the chapters for individual attention is difficult because each one contributes meaningfully to the overall message of this volume. An important collection of articles that will set the tone for the next two decades of discourse and research about GIS and society. *Journal of Geographical Analysis*. Over the past twenty years, research on the evolving relationship between GIS and Society has been expanding into a wide variety of topical areas, becoming in the process an increasingly challenging and multifaceted endeavour. The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field. Emphasizing the theoretical, methodological, and substantive diversity within GIS and Society research, the book highlights the distinctiveness and intellectual coherence of the subject as a field of study while also examining its resonances with and between key themes and among disciplines ranging from geography and computer science to sociology, anthropology, and the health and environmental sciences. Comprising 27 chapters, often with an international focus, the book is organized into six sections: Foundations of Geographic

Information and Society Geographical Information and Modern Life Alternative Representations of Geographic Information and Society Organizations and Institutions Participation and Community Issues Value Fairness and Privacy Aimed at academics researchers postgraduates and GIS practitioners this Handbook will be the basic reference for any inquiry applying GIS to societal issues

Policy, Planning, and People Naomi Carmon, Susan S. Fainstein, 2013-05-31  
 The contributors of Policy Planning and People argue for the promotion of social equity and quality of life by designing and evaluating urban policies and plans. Edited by Naomi Carmon and Susan S. Fainstein, the volume features original essays by leading authorities in the field of urban planning and policy, mainly from the United States but also from Canada, Hungary, Italy, and Israel. The contributors discuss goal setting and ethics in planning, illuminate paradigm shifts, make policy recommendations, and arrive at best practices for future planning. Policy Planning and People includes theoretical as well as practice-based essays on a wide range of planning issues: housing and neighborhood transportation, surveillance and safety, the network society, regional development, and community development. Several essays are devoted to disadvantaged and excluded groups such as senior citizens, the poor, and migrant workers. The unifying themes of this volume are the values of equity, diversity, and democratic participation. The contributors discuss and draw conclusions related to the planning process and its outcomes. They demonstrate the need to look beyond efficiency to determine who benefits from urban policies and plans.

Compromise Planning : A Theoretical Approach from a Distant Corner of Europe Louis C. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional
