The Digital Transformation of the European Border Regime Paul Trauttmansdorff, 2024-05-30 This book offers an in depth investigation into the digitisation processes of Europe's border regime It shows how sociotechnical imaginations of future borders drive forward the expansion of databases in the European governance of mobility With a focus on the European Union Agency eu LISA one of the most significant and rapidly advancing actors in the digital border regime the book serves as a gateway to understanding the key agents' visions technologies and practices at work Asking broader questions about exclusion discrimination violence and mobility rights this is an original contribution to our understanding of future borders in Europe [European Heritage, Dialogue and Digital Practices](#) Areti Galani, Rhianon Mason, Gabi Arrigoni, 2019-07-09 European Heritage Dialogue and Digital Practices focuses on the intersection of heritage dialogue and digital culture in the context of Europe Responding to the increased emphasis on the potential for heritage and digital technologies to foster dialogue and engender communitarian identities in Europe the book explores what kind of role digital tools platforms and practices play in supporting and challenging dialogue about heritage in the region Drawing on fieldwork involving several European museums and heritage organisations the chapters in this volume critically engage with the role of digital technology in heritage work and its association with ideas of democratisation multivocality and possibilities for feedback and dialogic engagement in the emerging digital public sphere The book also provides a framework for understanding dialogue in relation to other commonly used approaches in heritage institutions such as participation engagement and intercultural exchange The authors map out the complex landscape of digitally mediated heritage practices in Europe both official and unofficial by capturing three distinct areas of practice perceptions and applications of digitally mediated dialogues around heritage within European museums and cultural policy facilitation of dialogue between European museums and communities through participatory design approaches and non official mobilisation of heritage on social media European Heritage Dialogue and Digital Practices will be of interest to both scholars and students in the fields of heritage and museum studies digital heritage media studies and communication the digital humanities sociology and memory studies The book will also appeal to policy makers and professionals working in a

variety of different fields Overcoming Fragmentation in Southeast Europe Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration

Beyond Territoriality Gunther Handl, Joachim Zekoll, Peer Zumbansen, 2012-10-23 Taking extraterritoriality the traditional touchstone for the state centered allocation of transnational legal authority as its conceptual starting point the book traces the evolution of transnational legal authority in the course of globalization It examines various representative transnational legal scenarios covering issues of inter alia the environment foreign trade and investment corporate governance criminal justice cyberspace and arms control The end result is a complex yet nuanced picture of today's global governance architecture in which transnational legal authority may be exercised unilaterally or multilaterally be minimally coordinated internationally or formally institutionalized reflect a traditional state centered a supra national or privatized approach and be rooted in a single or a multiple layered normative system *Planning Cultures in Europe* Frank Othengrafen, 2016-12-05 Bringing together an interdisciplinary team from across the EU this book connects elements of cultural and planning theories to explain differences and peculiarities among EU member states A culturized planning model is introduced to consider the rules of the game how culture affects planning practices not only on an explicit surface but also on a hidden implicit level The model consists of three analytical dimensions planning artifacts planning environment and societal environment This book adopts these dimensions to compare planning cultures of different European countries This sheds light not only on the organizational or institutional structure of planning but also the influence of deeper cultural values and layers on planning and implementation processes **Routledge International Handbook of Contemporary Social and Political Theory**

Gerard Delanty, Stephen P. Turner, 2021-09-20 The triangular relationship between the social the political and the cultural has opened up social and political theory to new challenges The social can no longer be reduced to the category of society and the political extends beyond the traditional concerns of the nature of the state and political authority This Handbook will address a range of issues that have recently emerged from the disciplines of social and political theory focusing on key themes as opposed to schools of thought or major theorists It is divided into three sections which address the most influential theoretical traditions that have emerged from the legacy of the twentieth century the most important new and emerging

frameworks of analysis today the major theoretical problems in recent social and political theory The Second edition is an enlarged revised and updated version of the first edition which was published in 2011 and comprised 42 chapters The new edition consists of 50 chapters of which seventeen are entirely new chapters covering topics that have become increasingly prominent in social and political theory in recent years such as populism the new materialism postcolonialism Deleuzian theory post humanism post capitalism as well as older topics that were not covered in the first edition such as Arendt the gift critical realism anarchism All chapters retained from the first edition have been thoroughly revised and updated The Routledge International Handbook of Contemporary Social and Political Theory encompasses the most up to date developments in contemporary social and political theory and as such is an essential research tool for both undergraduate and postgraduate students as well as researchers working in the fields of political theory social and political philosophy contemporary social theory and cultural theory

Europe's Changing Geography Nicola Bellini, Ulrich Hilpert, 2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe s new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe s Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners

Mobilising Place Management Claus Lassen, Lea Holst Laursen, 2020-11-12 Mobilising Place Management makes an important contribution to the mobilities field by arguing for the need to rethink place management It takes a point of departure in the mobilities turn and relational place thinking while exploring the relationship between place and mobility In a world of increasing mobility and global competition between nations cities and urban regions the managing of places seems more relevant than ever before By examining various examples of place and mobilities that range from the airport rural village tourist site port city to the city region this book argues that the management of places can be informed and enhanced by installing a greater awareness and understanding of mobility This insight could potentially improve the ability of current

place management to translate a relational and mobilities orientated thinking into concrete actions instructions interventions designs plans policies and management control systems The book will be essential reading for researchers practitioners and students in the field of place management and across urban studies planning design geography sociology tourism transport and history

The Routledge Handbook of Regional Design Michael Neuman, Wil Zonneveld, 2021-04-15 The Routledge Handbook of Regional Design explores contemporary research policy and practice that highlight critical aspects of strategy making planning and designing for contemporary regions including city regions bioregions delta regions and their hybrids As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment capital migration and innovation they yield cities that are expanding over ever larger territories Moreover these polycentric city regions themselves are agglomerating with one another to create new territorial mega regions The processes that beget these novel regional forms produce numerous and significant effects positive and negative that call for new modes of design and management so that the urban places and the lives and well being of their inhabitants and businesses thrive sustainably into the future With international case studies from leading scholars and practitioners this book is an important resource not just for students researchers and practitioners of urban planning but also policy makers developers architects engineers and anyone interested in the broader issues of urbanism

Staging the New Berlin Claire Colomb, 2013-06-17 This book explores the politics of place marketing and the process of urban reinvention in Berlin between 1989 and 2011 In the context of the dramatic socio economic restructuring processes changes in urban governance and physical transformation of the city following the Fall of the Wall the new Berlin was not only being built physically but staged for visitors and Berliners and marketed to the world through events and image campaigns which featured the iconic architecture of large scale urban redevelopment sites Public private partnerships were set up specifically to market the new Berlin to potential investors tourists Germans and the Berliners themselves The book analyzes the images of the city and the narrative of urban change which were produced over two decades In the 1990s three key sites were turned into icons of the new Berlin the new Postdamer Platz the new government quarter and the redeveloped historical core of the Friedrichstadt Eventually the entire inner city was staged through a series of events which turned construction sites into tourist attractions New sites and spaces gradually became part of the 2000s place marketing imagery and narrative as urban leaders sought to promote the creative city By combining urban political economy and cultural approaches from the disciplines of urban politics geography sociology and planning the book contributes to a better understanding of the interplay between the symbolic politics of representation through place marketing and the politics of urban development and place making in contemporary urban governance

'Whither regional studies?' Andy Pike, 2013-09-13 Regional studies are at a vibrant conjuncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain

an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of Regional Studies [Handbook of Urban Mobilities](#) Ole B. Jensen, Claus Lassen, Vincent Kaufmann, Malene Freudendal-Pedersen, Ida Sofie Gøtzsche Lange, 2020-05-18 This book offers the reader a comprehensive understanding and the multitude of methods utilized in the research of urban mobilities with cities and the urban as its pivotal axis It covers theories and concepts for scholars and researchers to understand observe and analyse the world of urban mobilities The Handbook of Urban Mobilities facilitates the understanding of urban mobilities within a historic conscience of societal transformation It explores key concepts and theories within the mobilities turn with a particular urban framework as well as the methods and tools at play when empirical urban mobilities research is undertaken This book also explores the urban mobilities practices related to commutes particular modes of moving the exploration of everyday life and embodied practices as they manifest themselves within urban mobilities and the themes of power conflict and social exclusion A discussion of urban planning public control and governance is also undertaken in the book wherein the themes of infrastructures technologies and design are duly considered With chapters written in an accessible style this handbook carries timely contributions within the contemporary state of the art of urban mobilities research It will thus be useful for academics and students of graduate programmes and post graduate studies within disciplines such as urban geography political science sociology anthropology urban planning traffic and transportation planning and architecture and urban design

A Planner's Encounter with Complexity Elisabete A. Silva, 2016-03-16 Spatial planning is about dealing with our everyday environment In A Planner's Encounter with Complexity we present various understandings of complexity and how the environment is considered accordingly One of these considerations is the environment as subject to processes of continuous change being either progressive or destructive evolving non linearly and alternating between stable and dynamic

periods If the environment that is subject to change is adaptive self organizing robust and flexible in relation to this change a process of evolution and co evolution can be expected This understanding of an evolving environment is not mainstream to every planner However in *A Planner's Encounter with Complexity* we argue that environments confronted with discontinuous non linear evolving processes might be more real than the idea that an environment is simply a planner's creation Above all we argue that recognizing the complexity of our environment offers an entirely new perspective on our world and our environment on planning theory and practice and on the raison d'être of the planners that we are *A Planner's Encounter with Complexity* is organized into 17 chapters It begins with the interplay of planning and complexity from the perspective of contemporary planning theory It continues by critically assessing planning theory and practice in the light of the interdisciplinary debate regarding complexity thinking As the book progresses it positions itself ever closer to the perspective of complexity thinking looking at the planning discipline from the outside in clarifying the facets of complexity and its importance in planning Finally conceptual and theoretical developments towards more applied examples are identified in order to see the interplay of planning and complexity in practice This book emphasizes the importance of complexity in planning clarifies many of the concepts and theories presents examples on planning and complexity and proposes new ideas and methods for planning

Post-structuralist Geography Jon Murdoch, 2006 *Post-structuralist Geography* is a highly accessible introduction to post-structuralist theory that critically assesses how post-structuralism can be used to study space and place Key Features Offers a thorough appraisal of the work of key post-structuralist thinkers including Gilles Deleuze Michel Foucault and Bruno Latour Provides case studies to elucidate illustrate and apply the theory Presents boxed summaries of complex arguments which with the engaging writing style provide a clear overview of post-structuralist approaches to the study of space and place Comprehensive and comprehensible communicating a new and exciting agenda for human geography *Post-structuralist Geography* is the students essential guide to the theoretical literature

Cosmopolitan Spaces Chris Rumford, 2008-06-30 1 Global and European social science is a growing area of university work 2 The author has a major reputation in this field 3 There are other books dealing with the same topic but this book has a unique theoretical and substantive standpoint

Europe Since 1989 William Outhwaite, 2015-10-05 *Europe Since 1989* charts the development of Europe east and west since the 1989 revolutions It analyses the emergent European society the development of a European public sphere and civil society Most books on Europe are heavily biased to the West and *Europe Since 1989* takes the opposite approach It argues that the transformation of the postcommunist world has implications for the whole of Europe and explores the interplay between long term fundamental tendencies and chance events and the possible futures which confront contemporary Europe With close attention to political economic and other social transformations and an appendix which gives special attention to European macro regions Nordic Baltic Europe Mediterranean Europe it offers a sociology of Europe with a strong interdisciplinary emphasis

Borderland Phil

Hubbard, 2022-06-28 Over recent years the issues of Brexit COVID and the migrant crisis put Kent in the headlines like never before Images of asylum seekers on Kent beaches lorries queued on motorways and the crumbling white cliffs of Dover all spoke to national anxieties and were used to support ideas that severing ties with the EU was the best or worst thing the UK has ever done In this coastal driftwork Phil Hubbard an exiled man of Kent considers the past present and future of this corner of England alighting on a number of key sites which symbolise the changing relationship between the UK and its continental neighbours Moving from the geopolitics of the Channel Tunnel to the cultivation of oysters at Whitstable from Derek Jarman's feted cottage at Dungeness to the art fuelled gentrification of Margate Borderland bridges geography history and archaeology to pose important questions about the way that national identities emerge from contested local landscapes
