Chicana/o Struggles for Education Guadalupe San Miguel, 2013-04-29 Much of the history of Mexican American educational reform efforts has focused on campaigns to eliminate discrimination in public schools However as historian Guadalupe San Miguel demonstrates in *Chicana o Struggles for Education Activism in the Community* the story is much broader and more varied than that While activists certainly challenged discrimination they also worked for specific public school reforms and sought private schooling opportunities utilizing new patterns of contestation and advocacy In documenting and reviewing these additional strategies San Miguel s nuanced overview and analysis offers enhanced insight into the quest for equal educational opportunity to new generations of students San Miguel addresses questions such as what factors led to change in the 1960s and in later years who the individuals and organizations were that led the movements in this period and what motivated them to get involved and what strategies were pursued how they were chosen and how successful they were He argues that while Chicana o activists continued to challenge school segregation in the 1960s as earlier generations had they broadened their efforts to address new concerns such as school funding testing English only curricula the exclusion of undocumented immigrants and school closings They also advocated cultural pride and memory inclusion of the Mexican American community in school governance and opportunities to seek educational excellence in private religious nationalist and secular schools The profusion of strategies has not erased patterns of de facto segregation and unequal academic achievement San Miguel concludes but it has played a key role in expanding educational opportunities The actions he describes have expanded extended and diversified the historic struggle for Mexican American education

not reflect Australia's culturally diverse population Australia's increasingly complex society can no longer be confined to essentialised or traditional definitions of ethnic communities While this diversity and its emerging complexity can be celebrated as a source of creativity and innovation it can also give rise to social political and creative challenges A key challenge that remains for the arts sector is its ability to support the creative expression of cultural difference One measure of inclusive creative production is to look at the participation of artists of non English speaking backgrounds NESBs a problematic term discussed in the book There are half as many NESB artists compared to those of other professions participating in the workforce and while under representation is an issue for management in the arts sector the question of representation also benefits from being understood more broadly beyond the narrow sense of multiculturalism as a tool to manage cultural difference This book explores the crucial role of creative leaders and how they work with the mainstream while maintaining their creative integrity and independence to generate a virtuous circle of change Creative Frictions argues that it is the NESB artists who lead change in the arts sector and that creative and organisational leadership working in partnership make creative use of friction and develop the necessary trust to generate the traction for a supportive multicultural arts milieu
