Making High School Work Thomas B. Gregory,1993 Public Schools That Work Gregory A. Smith,2014-02-04 Public Schools That Work addresses the efforts of teachers administrators and parents to develop alternative educational models capable of overcoming the alienation and intellectual disengagement that have become so common in American schools Educators working in some of the best alternative elementary and secondary schools across the country recount their attempts to create systems which will educate diverse populations in their customs and heritages involve parents and community leaders in decisions related to the life of their schools and involve students in their communities by encouraging participation in a variety of civic projects By being rooted in their local social environment these schools demonstrate the transformative potential of education to return power and authority to those individuals attempting to reconstruct and humanize the institutions within which they must learn and teach *Resources in Education* ,2001 *10 Great Curricula* Thomas S. Poetter,2012-01-01 With Susan L M Bartow Lara A Chatman Daniel Ciamarra Christopher L Cox Dawn Mann Kevin J Smith Kevin M Talbert Mary A Webb and Amy Fisher Young 10 Great Curricula is a collection of stories written by educators who have come to understand curricula differently as a result of their engagement with a graduate course and its instructor The book represents the best of what can be found in teaching and learning in general and in the quest for meaningful ways to understand curricula in particular The co authors of this volume on 10 Great Curricula framed their inquiries into progressive democratic curricula at least initially through Marsh and Willis 2007 notions of planned enacted and lived curricula These frames helped the writers think about how to engage a curriculum as it is developed delivered and lived by its participants and for the inquirers to actually become participantinquirers in the curriculum at hand The chapters depict the power the possibility and the transformational potential of great progressive curricula today by locating them in schools and in the community by making them come alive to the reader and by suggesting means through which the reader can adopt a more progressive democratic stance to curriculum despite the seemingly overwhelming nature of the conservative traditionalist instrumentalist movements in curriculum teaching and assessment today The book is intended for students of education teaching and curriculum undergraduates graduates and practicing educational professionals especially those looking for examples in the world in which progressive democratic ideals are nurtured and practiced The Five Practices in Practice [High School] Margaret (Peg) Smith,Michael D. Learning to work : making the transition from school to work. ,1995 Over the past decade public attention has been drawn to the difficulties that many young adults are having in finding their way in the changing economy and earning a decent living A broad movement is emerging across the country to better connect school with career opportunities and further education to help these young adults succeed In 1994 Congress responded by passing the School to Work Opportunities Act STWOA which assists states and localities in establishing comprehensive school to work transition systems Soon after the school to work legislation was passed by Congress OTA was asked by the Senate Committee on Labor and Human Resources and the House Committee on Education and Labor to assess the potential and problems of work based learning as a component of school to work As the report shows work based learning has considerable promise but will be difficult to implement Work based learning can potentially help students see the relevance of their academic studies later in life allow students to explore career options and help them develop needed occupational skills But the implementation of good work based learning programs will require considerable effort on the part of schools and participating businesses Whether many businesses can be recruited to participate remains to be seen

Literacy Matters Robert Yagelski,2000 Literacy can empower students but it may also limit their understanding if taught without regard for the context of their lives Using his encounters with students in high school college and state prison classrooms as well as his own experience Robert Yagelski looks at the sometimes ambiguous role of literacy in our lives and examines the mismatch between conventional approaches to teaching literacy and the literacy needs of students in a rapidly changing increasingly technological world He asserts that ultimately the most important job of the English teacher is to reveal to students ways they can participate in the discourse that shapes their lives and he offers a timely look at how technology has influenced the way we write and read The scope of this fascinating book reaches beyond the classroom and offers insight about what it means to be literate in an economically driven dynamic society Addressing earlier works on the subject of literacy as well as the ideas of theorists such as Foucault this perceptive work has much to offer educators and anyone seeking to understand the nature of literacy itself

schools into self directed learning environments *Open Up, Education!* Adam Haigler, Ben Owens, 2018-12-07 Would you rather people saw you as open or closed minded The answer should be obvious Why is it then that we tend to allow our legacy systems in education to be closed when they clearly don t enable the same level of performance as open ones This phenomena is well established in education where many educators tend towards isolation in fighting and hoarding resources from each other Meanwhile students often have lack a clarity of purpose in terms of how what they are working on relates to things they care about in the wider world Stuck inside an unengaging status quo many students see doing school as irrelevant to their interests and ambitions This book is the antidote to this closure from the classroom to system wide policy It is a call to action for educators who want to become relentless collaborators networked with professionals in and outside the school They are then poised to quicken the pace of innovation through accessing the endless supply of free knowledge available to them This is the definitive resource on how to create an Open Way Learning ecosystem in your school district or region
