Dalal, Eduardo Salas, 2013-09-05 Employees are constantly making decisions and judgments that have the potential to affect themselves their families their work organizations and on some occasion even the broader societies in which they live A few examples include deciding which job applicant to hire setting a production goal judging one's level of job satisfaction deciding to steal from the cash register agreeing to help organize the company's holiday party forecasting corporate tax rates two years later deciding to report a coworker for sexual harassment and predicting the level of risk inherent in a new business venture In other words a great many topics of interest to organizational researchers ultimately reduce to decisions made by employees Yet numerous entreaties notwithstanding industrial and organizational psychologists typically have not incorporated a judgment and decision making perspective in their research The current book begins to remedy the situation by facilitating cross pollination between the disciplines of organizational psychology and decision making The book describes both laboratory and more naturalistic field research on judgment and decision making and applies it to core topics of interest to industrial and organizational psychologists performance appraisal employee selection individual differences goals leadership teams and stress among others The book also suggests ways in which industrial and organizational psychology research can benefit the discipline of judgment and decision making The authors of the chapters in this book conduct research at the intersection of organizational psychology and decision making and consequently are uniquely positioned to bridging the divide between the two disciplines **The Secret Life of Decisions** Meena Thuraisingham, 2017-03-02 Making decisions is a critical part of every executive's job However we know so little about the often subliminal processes that shape the decisions we make The Secret Life of Decisions exposes the unchallenged myths and distortions that impact our reasoning ability raising our awareness of the many traps we can fall into Meena Thuraisingham and her collaborator Wolfgang Lehmacher have drawn from decades of work with leaders showing that even the most talented leaders and teams can end up making sub optimal decisions This is rarely because they had poor critical thinking faculties but rather because they did not pay enough attention to the often invisible traps hardwired into our thinking processes letting through only information that conforms with our current beliefs mental models and expectations This leaves many leaders and businesses exposed Rather than being the rational output of

our reasoning abilities the authors show decision making to be a highly imprecise process As decision makers we come to the table armed with our own perspectives preferences filters heuristics and biases influenced by a broad range of social influences many operating subliminally The Secret Life of Decisions is an essential read for developing and seasoned executives who have to work through increasingly complex and high stakes decisions It treats choosing wisely and the thinking involved as a skill which as with many other skills can be improved with the guided practice and supporting tools provided here The journey however starts with awareness that comes from outing the secret forces that can sabotage the quality of our decisions *Research on Judgment and Decision Making* William M. Development of Judgment and Decision Making in Children and Adolescents Janis E. Jacobs, Paul A. Klaczynski, 2006-04-21 This book focuses on adolescent decision making This book has both basic and applied dimensions and cuts across developmental social cognitive and educational psychology Because of these components it will be of interest to the professional market **Theories of Choice** Stefan Grundmann, Philipp Hacker, 2021-01-14 Choice is a key concept of our time It is a foundational mechanism for every legal order in societies that are politically constituted as democracies and economically built on the market mechanism Thus choice can be understood as an atomic structure that grounds core societal processes In recent years however the debate over the right way to theorize choice for example as a rational or a behavioral type of decision making has intensified This collection provides an in depth discussion of the promises and perils of specific types of theories of choice It shows how the selection of a specific theory of choice can make a difference for concrete legal questions in particular in the regulation of the digital economy or in choosing between market firm or network In its first part the volume provides an accessible overview of the current debates about rational versus behavioral approaches to theories of choice The remainder of the book structures the vast landscape of theories of choice along with three main types individual collective and organizational decision making As theories of choice proliferate and become ever more sophisticated however the process of choosing an adequate theory of choice becomes increasingly intricate This volume

addresses this selection problem for the various legal arenas in which individual organizational and collective decisions matter. By drawing on economic, technological, political, and legal points of view, the volume shows which theories of choice are at the disposal of the legally relevant decision maker and how they can be operationalized for the solution of concrete legal problems. The editors acknowledge the kind support of the Fritz Thyssen Foundation for an exploratory conference on the subject of the book.

Critique of Everyday Life Henri Lefebvre, 2014-05-06 Henri Lefebvre's magnum opus is a monumental exploration of contemporary society. Henri Lefebvre's three-volume *Critique of Everyday Life* is perhaps the richest, most prescient work by one of the twentieth century's greatest philosophers. Written at the birth of post-war consumerism, the *Critique* was a philosophical inspiration for the 1968 student revolution in France and is considered to be the founding text of all that we know as cultural studies, as well as a major influence on the fields of contemporary philosophy, geography, sociology, architecture, political theory, and urbanism. A work of enormous range and subtlety, Lefebvre takes as his starting point and guide the trivial details of quotidian experience, an experience colonized by the commodity, shadowed by inauthenticity, yet one which remains the only source of resistance and change. This is an enduringly radical text, untimely today only in its intransigence and optimism.

Social Judgment and Decision Making Joachim I. Krueger, 2012-05-04 This volume brings together classic key concepts and innovative theoretical ideas in the psychology of judgment and decision making in social contexts. The chapters of the first section address the basic psychological processes underlying judgment and decision making. The guiding question is: What information comes to mind and how is it transformed? The second section poses the question of how social judgments and decisions are to be evaluated. The chapters in this section present new quantitative models that help separate various forms of accuracy and bias. The third section shows how judgments and decisions are shaped by ecological constraints. These chapters show how many seemingly complex configurations of social information are tractable by relatively simple statistical heuristics. The fourth section explores the relevance of research on judgment and decision making for specific tasks of personal or social relevance. These chapters explore how individuals can efficiently select mates, form and maintain friendship alliances, judiciously integrate their attitudes with those of a group, and help shape policies that are rational and morally sound. The book is intended as an essential resource for senior undergraduates.
