#### **Corporate Aviation Management**

**Raoul Castro**, 2011-03-22. In this comprehensive aviation manual, Raoul Castro provides a source of invaluable corporate aviation management information. He begins by giving an overview of corporate aviation from its inception, then focuses on the management principles and functions that specifically target corporate aviation. Through the utilization of these sound management principles, Castro facilitates the acceptance of corporate aircraft as indispensable tools of industry. As Castro notes, few companies know how to use corporate aircraft to maximum advantage. Drawing on his expertise and experience, Castro designs a plan by which a company can achieve maximum utilization of an airplane or helicopter fleet. He gives specific instructions on how to facilitate the efficient use of the aviation department of a company, select appropriate aircraft, plan for disasters, and establish security measures, fulfill legal requirements of the governmental agencies that regulate the use of aircraft, and manage the maintenance and repair of aircraft. Castro also discusses the scores of details involved in the management of a professional corporate aviation branch and how these details can be handled in a positive, productive manner. After thoroughly examining the overall managerial functions involved in planning, organizing, controlling, and implementing an aviation arm, Castro concludes by discussing the future of corporate aviation. This book is a practical and valuable guide for the executive in charge of an aviation department, an aviation department manager, or chief pilot aspirants to aviation management positions, and both students and teachers of aviation management.

**Henrik Breitenbach, André Ken Jakobsson**, 2020-06-04. Defence Planning as Strategic Fact provides and elaborates on an upstream focus on the variegated organizational, political, and conceptual practices of military, civilian, administrative, and political leaderships involved in defence planning, offering an important security and strategic studies supplement to the traditional downstream focus on the use of force. The book enables the reader to engage with the role of ideas in defence planning, of organizational processes and biases, path dependencies, and administrative dynamics under the pressures of continuously changing domestic and international constraints. The chapters show how defence planning must be seen as a constitutive element of defence and strategic studies, that it is a strategic fact of its own which merits particular practical and scholarly attention. As defence planning creates the conditions behind every peace upheld or broken and every war won or lost, Defence Planning as Strategic Fact will be of great use to scholars of defence studies, strategic studies, and military studies. This book was originally published as a special issue of *Defence Studies*.
