*The Documentary Impulse in French Literature*, 2021-12-28      Film Sequels Carolyn Jess-Cooke, 2009-02-02 The film sequel has been maligned in popular culture as a vampirish corporative exercise in profit making and narrative regurgitation Drawing upon a wide range of examples from early cinema to the twenty first century this volume reveals the increasing popularity of and experimentation with film sequels as a central dynamic of Hollywood cinema Now creeping into world cinemas and independent film festivals the sequel is persistently employed as a vehicle for cross cultural dialogue and as a structure by which memories and cultural narratives can be circulated across geographical and historical locations This book aims to account for some of the major critical contexts within which sequelisation operates by exploring sequel production beyond box office figures Its account ranges from sequels in recent mainstream cinema art house and indie sequels non Hollywood sequels the effects of the domestic market on sequelisation and the impact of the video game industry on Hollywood

*The Importance of Non-Christian Religions in the Philosophy of Pierre Bayle* Marta García-Alonso, John Christian Laursen, 2025-01-22 This book offers a fresh perspective on early modern philosophy by highlighting Pierre Bayle's engagement with non-Christian sources. If our major political, ethical, and epistemic doctrines were solely rooted in Christian genealogies, it would seem necessary to include Christianity in the European Constitution. However, this book reveals a different story. The anthropological insights gained from encounters with other lands not only enriched the ethical and political discussions of philosophers, historians, and literati but also paralleled the incorporation of empirical data from these regions into fields like medicine, botany, or navigation. These accounts became the building blocks for ethical and political thought, a wellspring of new ideas, thereby making the understanding of other cultures and religions pivotal in reflecting upon the specificities of Europe. Pierre Bayle's work exemplifies this transformative influence.

*Oceanic Encounters* Margaret Jolly, Serge Tchekézo, Darrell Tryon, 2009-07-01 This volume, the result of ongoing collaborations between Australian and French anthropologists, historians, and linguists, explores encounters between Pacific peoples and foreigners during the long duration of European exploration, colonisation, and settlement from the sixteenth century to the twentieth century. It deploys the concept of encounter rather than the more common idea of first contact for several reasons. Encounters with Europeans occurred in the context of extensive prior encounters and exchanges between Pacific peoples, manifest in the distribution of languages and objects and in patterns of human settlement and movement. The concept of encounter highlights the mutuality in such meetings of bodies and minds, whereby preconceptions from both sides were brought into confrontation, dialogue, mutual influence, and ultimately mutual transformation. It stresses not so much prior visions of strangers or others but the contingencies in events of encounter and how senses other than vision were crucial in shaping reciprocal appraisals. But a stress on mutual meanings and interdependent agencies in such cross-cultural encounters should not occlude the tumultuous misunderstandings, political contests, and extreme violence which also characterised Indigenous-European interactions over this period.
