potential development of artificial materials that mimic wood's measurable acoustic properties offering new possibilities for instrument construction. This book is specifically tailored for luthiers in the stringed instrument industry. It focuses on acoustic wood science and excludes instrument assembly processes, providing valuable insights for luthiers seeking to craft instruments with exceptional tonal qualities.

*Making Music Indigenous* Joshua Tucker, 2019-02-22

When thinking of indigenous music, many people may imagine acoustic instruments and pastoral settings far removed from the whirl of modern life. But in contemporary Peru, indigenous chimaycha music has become a wildly popular genre that is even heard in the nightclubs of Lima. In *Making Music Indigenous*, Joshua Tucker traces the history of this music and its key performers over fifty years to show that there is no single way to sound indigenous. The musicians Tucker follows make indigenous culture and identity visible in contemporary society by establishing a cultural and political presence for Peru's indigenous peoples through activism, artisanship, and performance. This musical representation of indigeneity not only helps shape contemporary culture; it also provides a lens through which to reflect on the country's past. Tucker argues that by following the musicians that have championed chimaycha music in its many forms, we can trace shifting meanings of indigeneity and indeed uncover the ways it is constructed, transformed, and ultimately recreated through music.
