**The Power of a Woman's Voice in Medieval and Early Modern Literatures** Albrecht Classen, 2012-02-13 The study takes the received view among scholars that women in the Middle Ages were faced with sustained misogyny and that their voices were seldom heard in public and subjects it to a critical analysis The ten chapters deal with various aspects of the question and the voices of a variety of authors both female and male are heard The study opens with an enquiry into violence against women including in texts by male writers Hartmann von Aue Gottfried von Straßburg Wolfram von Eschenbach which indeed describe instances of violence but adopt an extremely critical stance towards them It then proceeds to show how women were able to develop an independent identity in various genres and could present themselves as authorities in the public eye Mystic texts by Hildegard of Bingen Marie de France and Margery Kempe the medieval conduct poem known as *Die Winsbeckin* the Devout Books of Sisters composed in convents in South West Germany but also quasi historical documents such as the memoirs of Helene Kottaner or Anna Weckerin's cookery book demonstrate that far more women were in the public gaze than had hitherto been assumed and that they possessed the self confidence to establish their positions with their intellectual and their literary achievements

leading Catholic biblical scholar Henry Wansbrough charts the use and abuse of scripture throughout the ages. It ranges from the evangelists' engagement with the Hebrew Scriptures to the use of the Bible in present-day politics, perhaps most pertinently in the Israeli-Palestinian conflict. Wansbrough takes as his starting point Frances Young's *The Art of Performance*. This enables him to creatively display how the Bible is performed differently in different ages. Wansbrough demonstrates the variety of these performances and their different emphases in the history of Christianity to glimpse the different ways in which great figures within the Christian tradition have used and abused the Bible. Indirectly, therefore, it attacks the ever-present danger of fundamentalism and single-minded interpretation of the Bible. Viewing the interpretation of the Bible against the background of various historical periods gives a valuable insight into the long and rich history of the Church. A final chapter provides a worked example of *Lectio Divina*, providing a window into the author's personal life of praying the Bible.

*Medieval English Travel* Anthony Bale, Sebastian Sobiechowski, 2019. *Medieval English Travel: A Critical Anthology* is a comprehensive volume that consists of three sections: concise introductory essays written by leading specialists; an anthology of important and less well-known texts grouped by destination; and a selection of supporting bibliographies organised by type of voyage. This anthology presents some texts for the first time in a modern edition. The first section consists of six companion essays on Places, Real and Imagined; Maps; the Organisation of Space; Encounters; Languages and Codes; Trade and Exchange; and Politics and Diplomacy. The organising principle for the anthology is one of expansive geography. Starting with local English narratives, the section moves to France, en route to destinations: the Holy Land and the Far East. In total, the anthology contains 26 texts or extracts, including new editions of Floris Blanchefleur, The Stations of Rome, The Libelle of Englyshe Polycye, and Chaucer's *Squire's Tale*, in addition to less familiar texts such as Osborn Bokenham's *Mappula Angliae*, John Kay's *Siege of Rhodes* (1480), and Richard Torkington's *Diaries of Englysshe Travell*. The supporting bibliographies, in turn, take a functional approach to travel and support the texts by elucidating contexts for travel and travellers in five areas: commercial voyages; diplomatic and military travel; maps; rutters and charts; practical needs; and religious voyages.

**Cultural Histories of Noise, Sound and Listening in Europe, 1300-1918** Kirsten Gibson, Ian Biddle, 2016-11-18. *Cultural Histories of Noise, Sound and Listening in Europe, 1300-1918* presents a range of historical case studies on the sounding worlds of the European past. The chapters in this volume explore ways of thinking about sound historically and seek to understand how people have understood and negotiated their relationships with the sounding world in Europe from the Middle Ages through to the early twentieth century. They consider, in particular, sound and music in the later Middle Ages; the politics of sound in the early modern period; the history of the body and perception during the Ancien Régime; and the sounds of the city in the nineteenth century and sound and colonial rule at the fin de siècle. The case studies also range in geographical orientation to include considerations

not only of Britain and France the countries most considered in European historical sound studies in English language scholarship to date but also Bosnia Herzegovina British Colonial India Germany Italy and Portugal Out of this diverse group of case studies emerge significant themes that recur time and again varying according to time and place sound power and identity sound as a marker of power or violence and sound physiology and sensory perception and technologies of sound consumption and meaning
