## Marie Stopes A Checklist Of Her Writings:

**Marie Stopes** Peter Eaton, Marilyn Warnick, 1977      Marie Stopes' Sexual Revolution and the Birth Control Movement Clare Debenham, 2018-03-06 This book examines the life work and contraversial achievements of Marie Stopes author and pioneer of the birth control movement in the interwar period As the centenary of the ground breaking publication of *Married Love* approaches this study traces and reassesses Marie s remarkable achievements considering the literary scientific and political themes of her life s work Clare Debenham analyses how Stope s personal life led her to turn away from palaeobotany to concentrate on transforming the country s sexual relationships by writing *Married Love* Utilising extensive unpublished archive research biographies letters and interviews with her friends and relatives Debenham demonstrates that Stopes s work on sexual relationships has overshadowed her considerable achievements including her scientific career as a paleaobotantist her literary success in the interwar period and her work with help from suffragists in establishing the first British birth control clinic

**Performing the Self** Katie Barclay, Sarah Richardson, 2016-04-14 That the self is performed created through action rather than having a prior existence has been an important methodological intervention in our understanding of human experience It has been particularly significant for studies of gender helping to destabilise models of selfhood where women were usually defined in opposition to a male norm In this multidisciplinary collection scholars apply this approach to a wide array of historical sources from literature to art to letters to museum exhibitions which survive from the medieval to modern periods In doing so they explore the extent that using a model of performativity can open up our understanding of women s lives and sense of self in the past They highlight the way that this method provides a significant critique of power relationships within society that offers greater agency to women as historical actors and offers a challenge to traditional readings of women s place in society An innovative and wide ranging compilation this book provides a template for those wishing to apply performativity to women s lives in historical context This book was originally published as a special issue of *Women s History Review*

*Marie Stopes, a Biography* Ruth Hall, 1977 Of the woman whose pioneering work on sex education and birth control were to bring her fame and notoriety during the 1920 s

**Sexual Knowledge, Sexual Science** Roy Porter, Mikulas Teich, 1994-09 This volume is about those who have investigated sex from antiquity to the present day

*Outspoken Women* Lesley A. Hall, 2014-05-01 Studying a broader period than its contemporaries this comprehensive study reveals a neglected tradition of British women s writing from the Victorian era to the sexual revolution of the 1960s *Outspoken Women* brings together the many and varied non fictional writings of British women on sexual attitudes and behaviour beginning nearly a hundred years prior to the second wave of feminism Commentators cover a broad range of perspectives and include Darwinists sexologists and campaigners against the spread of VD as well as women writing about their own lives and experiences Covering all aspects of the debate from marriage female desire and pleasure to lesbianism prostitution STDs and sexual ignorance Lesley A Hall studies how the works of this era didn t just criticise male defined

mores and the dark side of sex but how they increasingly promoted the possibility of a brighter view and an informed understanding of the sexual life Hall's remarkable anthology is an engaging examination of this fascinating subject and it provides students and scholars with an invaluable source of primary material

**Love's Creation** Marie Carmichael Stopes, 2012 There is nothing that helps so much with the economic emancipation of woman as a knowledge of how to control her maternity Marie Stopes Marie Stopes work in the area of sexual health and contraception has left a lasting legacy and she is widely acknowledged as one of the most significant figures of the 20th century Her *Married Love A New Contribution to the Solution of Sex Difficulties* was first published in 1918 translated into 13 languages and sold over a million copies Stopes also ardently pursued her enthusiasm for literature throughout her life writing novels plays and poetry Her novel *Love's Creation* published in 1928 the year women obtained the right to vote is a working through of the debates which she addressed both in her personal and public life sexual relations the relationship between the arts and sciences and the quest for female sexual fulfillment Her campaigning on behalf of a more open attitude to women's sexuality equality in marriage and sex

*Married Love* Marie Carmichael Stopes, 2004 In my own marriage I paid such a terrible price for sex ignorance that I feel that knowledge gained at such a cost should be placed at the service of humanity The book that was to become *Married Love* grew from Marie Stopes's conviction that the state of modern middle class marriage was like her own desperate and that the cause of this desperation was sexual unhappiness She knew her book would probably electrify this country and it remains one of the best known sex manuals ever written It combines a lyrical evocation of marital love with a no nonsense and detailed account of sexual intercourse and sexual pleasure that was a sensation when it was published in 1918 Stopes advocated equality in marriage and the importance of women's sexuality and sexual desire as well as openly supporting birth control In this edition of Stopes's ground breaking work Ross McKibbin's introduction reveals fascinating insights into Stopes and prevailing attitudes to class religion science and above all sex

**Historical perspective of early twentieth century Carboniferous paleobotany in North America** William Culp Darrah, Paul C, Robert Herman Wagner, 1995

**International Women in Science** Catherine M.C. Haines, 2001-11-20 A comprehensive biographical guide to the scientific achievements personal lives and struggles of women scientists from around the globe *International Women in Science A Bibliographical Dictionary to 1950* presents the enormous contributions of women outside North America in fields ranging from aviation to computer science to zoology It provides fascinating profiles of nearly 400 women scientists both renowned figures like Florence Nightingale and Marie Curie and women we should know better like Rosalind Franklin who along with James Watson and Francis Crick uncovered the structure of DNA Students and researchers will see how the lives of these remarkable women unfolded and how they made their place in fields often stubbornly guarded by men overcoming everything from limited education and professional opportunities to indifference ridicule and cultural prejudice to outright hostility and discrimination Included are a number of living scientists many of whom provide insights into their

lives and scientific times Those contributions plus additional previously unavailable material make this a volume of unprecedented scope and richness *The Emergence of Brand-Name Capitalism in Late Colonial India* Douglas E. Haynes, 2022-09-22 This book examines the emergence of professional advertising in western India during the interwar period It explores the ways in which global manufacturers advanced a brand name capitalism among the Indian middle class by promoting the sale of global commodities during the 1920s and 1930s a time when advertising was first introduced in India as a profession and underwent critical transformations Analysing the cultural strategies both verbal and visual used by foreign businesses in their advertisements to capture urban consumers Haynes argues that the promoters of various commodities crystalized their campaigns around principles of modern conjugality He also highlights the limitations of brand name capitalism during this period examining both its inability to cultivate markets in the countryside or among the urban poor and its failure to secure middle class customers With numerous examples of illustrated advertisements taken from Indian newspapers the book discusses campaigns for male sex tonics and women s medicines hot drinks such as Ovaltine and Horlicks soaps such as Lifebuoy Lux and Sunlight cooking mediums such as Dalda and electrical household technologies By examining the formation of brand name capitalism and two key structures that accompanied it the advertising agency and the field of professional advertising this book sheds new light on the global consumer economy in interwar India and places developments in South Asia into a larger global history of consumer capitalism **Bibliography of the History of**

**Medicine** ,1979 **Friend Beloved** Laura Jean Cameron, 2021-04-15 *Friend Beloved* invites readers to enter the imaginative worlds of two ambitious young scientists Marie Carmichael Stopes the paleobotanist who found international fame as a birth control advocate and feminist icon and Charles Gordon Hewitt the housefly expert who became one of Canada s trailblazers of nature conservation before he died in the Spanish flu pandemic Ecology was a new science that connected Stopes and Hewitt the word coming from oikos the Greek term for home Reproducing a small but significant cache of letters written before the First World War the book unearths their respective versions of home and shows how these mattered in both domestic affairs and scientific passions Their co authored 1909 scientific article which Hewitt called the one little sin is reprinted as an appendix along with a chapter of Stopes s unpublished novel *A Man s Mate* entitled *Friends* Laura Jean Cameron provides a lively thought provoking introduction Her epilogue considers why Stopes and Hewitt s friendship was largely forgotten and how its recollection reveals early ecology s revolutionary promise but also its colonial and eugenic entanglements Weaving accounts not only of the professional worlds the correspondents traversed in Britain Japan and Canada but also of intensely personal relationships involved in the changing nature of their field *Friend Beloved* connects careers and emotional trajectories at a key moment in the women s suffrage movement and the making of modern science

*Paleontology in Ecology and Conservation* Julien Louys, 2012-04-25 The fossil record contains unique long term insights into how ecosystems form and function which cannot be determined simply by examining modern systems It also provides a

record of endangered species through time which allow us to make conservation decisions based on thousands to millions of years of information The aim of this book is to demonstrate how palaeontological data has been or could be incorporated into ecological or conservation scientific studies This book will be written by palaeontologists for modern ecologists and conservation scientists Manuscripts will fall into one or a combination of four broad categories case studies review articles practical considerations and future directions This book will serve as both a how to guide and provide the current state of knowledge for this type of research It will highlight the unique and critical insights that can be gained by the inclusion of palaeontological data into modern ecological or conservation studies

**History of Palaeobotany** A. J. Bowden, Cynthia V. Burek, R. Wilding, 2005 Often regarded as the Cinderella of palaeontological studies palaeobotany has a history that contains some fascinating insights into scientific endeavour especially by palaeontologists who were perusing a personal interest rather than a career The problems of maintaining research facilities in universities especially in the modern era are described and reveal a noticeable absence of a national UK strategy to preserve centres of excellence in an avowedly specialist area Accounts of some of the pioneers demonstrate the importance of collaboration between taxonomists and illustrators The importance of palaeobotany in the rise of geoconservation is outlined as well as the significant and influential role of women in the discipline Although this volume has a predominantly UK focus two very interesting studies outline the history of palaeobotanical work in Argentina and China

The Real Facts Of Life Margaret Jackson, 2005-08-04 During the last twenty years feminist research into the history of sexuality has made important contributions to the theoretical understanding of the relationship between sexuality and male power When sexology became established as a science feminists had for many years been engaged in a struggle to change male sexuality by waging campaigns against male sexual violence and abuse of women and children by challenging the institutions of marriage and prostitution and by asserting in theory and in practice the right to female sexual autonomy Despite the excellent research published in this important and fascinating aspect of feminist history there are still gaps in our knowledge The Real Facts of Life aims to fill these gaps Why and when did sexuality become an important political issue for the 19th century feminist What was the history of campaigns against double standards of sexual morality Why were feminists so divided in their views about sexual freedom and its relationship to women's emancipation The analysis of these issues illuminates past and present feminists ideas and theories about sexuality Margaret Jackson's main aims in The Real Facts of Life are to make a contribution towards understanding the history of the struggle for female sexual autonomy to provide a revolutionary feminist analysis of the social construction of sexuality and its relationship to male power and to provide a critique of sexology and the male defined concept of sexual liberation
