Reefer Madness Eric Schlosser,2004-04-01 New York Times Bestseller The shadowy world of off the books businesses from marijuana to migrant workers brought to life by the author of Fast Food Nation America s black market is much larger than we realize and it affects us all deeply whether or not we smoke pot rent a risqu video or pay our kids nannies in cash In Reefer Madness the award winning investigative journalist Eric Schlosser turns his exacting eye to the underbelly of American capitalism and its far reaching influence on our society Exposing three American mainstays pot porn

and illegal immigrants Schlosser shows how the black market has burgeoned over the past several decades He also draws compelling parallels between underground and overground how tycoons and gangsters rise and fall how new technology shapes a market how government intervention can reinvigorate black markets as well as mainstream ones and how big business learns and profits from the underground Captivating Compelling tales of crime and punishment as well as an illuminating glimpse at the inner workings of the underground economy The book revolves around two figures Mark Young of Indiana who was sentenced to life in prison without parole for his relatively minor role in a marijuana deal and Reuben Sturman an enigmatic Ohio man who built and controlled a formidable pornography distribution empire before finally being convicted of tax evasion Schlosser unravels an American society that has become alienated and at odds with itself Like Fast Food Nation this is an eye opening book offering the same high level of reporting and research Publishers Weekly **The**

Handbook of Research on the Illicit Drug Traffic F. LaMond Tullis,LaMond Tullis,United Nations Research Institute for Social Development,1991-09-30 Focusing on a highly controversial and fiercely debated subject this survey tracks the social and economic consequences of the production trafficking and consumption of cocaine heroin and cannabis From a growing body of literature LaMond Tullis has extracted the most salient economic social and political themes currently under discussion in both scholarly publications and in the responsible press The two part volume consisting of a lengthy review of relevant literature and an annotated bibliography helps its users understand the major issues Can and should consumption

be curtailed supplies suppressed and traffickers eliminated Can the unintended economic social and political consequences of curtailing suppressing and eliminating somehow be mitigated Should these drugs be legalized Would legalization produce its own array of unintended and largely unacceptable consequences Although tentative answers to these questions abound this excellent resource is testimony to the fact that there is still little agreement on how to deal with these powerful substances and the problems they generate Tullis s compilation presents the best overview of this complex subject to date The first half of this two part reference consists of a survey of the published literature on the production and consumption of the three illicit drugs Chapters are devoted to the global patterns of production and consumption of cocaine heroin and cannabis to the consequences both positive and negative of drug consumption and production and to the policy measures that have been adopted or are under consideration in both consuming and producing countries These chapters will be of interest to those wishing to obtain an overall view of the subject and to specialists seeking a guide to the literature outside their particular area of knowledge The second half of the book contains an annotated bibliography of about 2 000 items covering works published in English plus a few in Spanish as books articles or press reports This section will be invaluable to researchers working on the frontiers of the subject and to general readers who wish to pursue particular topics in greater depth The volume should be at the fingertips of policy makers legislators law enforcement officials judges and social workers as well as students and teachers

Innovation in Food Ecosystems Paola De Bernardi,Danny Azucar,2019-11-28 This book addresses the intersections of entrepreneurship innovation and sustainability in food systems and presents high quality research illustrating the central role that food consumption and production play in achieving sustainability goals Entrepreneurship and innovation have become particularly relevant aspects in the European Union EU especially since the Sustainable Development Goals SDGs were announced in 2015 In many cases innovations tend to arise from small and medium sized enterprises and from completely new entrepreneurial endeavors This book represents essential reading for researchers and young academics seeking to reduce disparities and inequalities in food production and consumptions patterns By encouraging sustainable entrepreneurship and innovation it will also help young scholars find support for their startup ideas
