Human Rights and Asian Values Ole Bruun, Michael Jacobsen, 2000 The Asian challenge to the universality of human rights has caused intense debate Here is a clear stand for universal rights theoretically and empirically through an analysis of social and political processes in Asia Asian values are linked to the struggle between authoritarian and democratic forces which both tend to convey stereotyped images of the West but with reversed meanings Liberal Rights and Political Culture Zhenghuan Zhou, 2013-10-14 This book argues that the liberal concept of rights presupposes and is grounded in an individualistic culture or shared way of relating and that this particular shared way of relating emerged only in the wake of the Reformation in the modern West Handbook on Human Rights in China Sarah Biddulph, Joshua Rosenzweig, 2019 This Handbook gives a wide ranging account of the theory and practice of human rights in China viewed against international standards and China's international engagements around human rights The Handbook is organised into the following sections contested meanings international dimensions economic and social rights civil and political rights rights in action and access to justice political dimensions of human rights in Greater China and new frontiers **Human Rights in China** Eva Pils, 2017-11-10 How can we make sense of human rights in China's authoritarian Party State system Eva Pils offers a nuanced account of this contentious area examining human rights as a set of social practices Drawing on a wide range of resources including years of interaction with Chinese human rights defenders Pils discusses what gives rise to systematic human rights violations what institutional avenues of protection are available and how social practices of human rights defence have evolved Three central areas are addressed liberty and integrity of the person freedom of thought and expression and inequality and socio economic rights Pils argues that the Party State system is inherently opposed to human rights principles in all these areas and that contributing to a global trend it is becoming more repressive Yet despite authoritarianism's lengthening shadows China's human rights movement has so far proved resourceful and resilient The trajectories discussed here will continue to shape the struggle for human rights in China and beyond its borders **Social Media and Ordinary Life** Cara Wallis, 2025-04-29 How Chinese citizens use social media Focusing on domestic workers rural microentrepreneurs disadvantaged young creatives and young feminists Social Media and Ordinary Life is a deeply moving ethnography of how digital media infrastructures and platforms are woven into the rhythms of ordinary everyday life

In choosing to foreground marginalized groups and communities Cara Wallis gently shifts our attention away from the world of social media influencers and tech centric discourses of entrepreneurial lives towards a decidedly ambivalent terrain of routine life practices *Social Media and Ordinary Life* argues that understanding these individual experiences of the everyday enables greater insight into larger transformations taking place in contemporary China Through long term ethnographic fieldwork across China Wallis foregrounds the entanglement of affect emotion ordinary ethical decisions and desires connected to social media as it is used for self expression self representation fights for equality maintenance of community and economic livelihood Four case studies show how social media is integrated into the articulation of affects by a wide variety of ordinary Chinese subjects disadvantaged young creatives who migrate to Beijing from rural areas and use social media to cultivate their personal aesthetics micro entrepreneurs in rural Shandong province especially women whose affective ties to the patriarchal family constrain their use of technology for economic enhancement domestic workers all women in urban homes who use social media to build community and construct themselves as ethical subjects and young feminists spread across China who engage in various types of cultural production and deploy social media in their fight for gender equality often facing social and or political marginalization in the process Amid daunting forces big data artificial intelligence massive surveillance this book centers the small showing how structural inequality the urban rural divide patriarchal gender norms and generational differences lead to contradictory or ambivalent outcomes of technology use Even so for these individuals and many others social media is deeply intertwined with aspirations for a better future

Remapping Gender, Place and Mobility Stine Thidemann Faber, Helene Pristed Nielsen, 2016-03-03 Enhancing our understanding of how people and places are affected by globalization at the level of everyday interactions within Nordic Peripheries this book sheds light on local particularities as well as global confluences by illuminating how gender mobility and belonging contribute to ruptures and or stability in the lives of men and women living in and or moving within these northern localities Crossing disciplinary and geographical boundaries the focus of the book is specifically on how global processes shape and influence the Nordic countries at the social level Denmark Norway Sweden Iceland Finland as well as the Faroe Islands The book starts from the premise that the Nordic peripheries offer an especially powerful lens on peripherality in a globalized and globalizing world because the region as a whole is traditionally perceived as relatively affluent stable and with high levels of social equality Yet as the different chapters in the book demonstrate with case studies that illuminate diverse gendered processes globalization produces ruptures and new social constellations also at the rims of Nordic societies well beyond the cushioning of comprehensive social welfare regimes By elevating the empirical findings to more general debates about the gendered effects of globalization the book invites the reader to reflect upon not only Nordic particularities but also how insights from this part of the world can be instructive for understanding the nuances and complexities of global confluences at large Minjian Sebastian Veg, 2019-04-23 Who are the new Chinese intellectuals In

the wake of the crackdown on the 1989 democracy movement and the rapid marketization of the 1990s a novel type of grassroots intellectual emerged Instead of harking back to the traditional role of the literati or pronouncing on democracy and modernity like 1980s public intellectuals they derive legitimacy from their work with the vulnerable and the marginalized often proclaiming their independence with a heavy dose of anti elitist rhetoric They are proudly minjian unofficial unaffiliated and among the people In this book Sebastian Veg explores the rise of minjian intellectuals and how they have profoundly transformed China s public culture An intellectual history of contemporary China Minjian documents how amid deep structural shifts grassroots thinker activists began to work outside academia or policy institutions in an embryonic public sphere Veg explores the work of amateur historians who question official accounts independent documentarians who let ordinary people speak for themselves and grassroots lawyers and NGO workers who spread practical knowledge Their interventions are specific rather than universal with a focus on concrete problems among disenfranchised populations such as victims of Maoism migrant workers and others without residence permits and petitioners Drawing on careful analysis of public texts by grassroots intellectuals and the networks and publics among which they circulate Minjian is a groundbreaking transdisciplinary exploration of crucial trends developing under the surface of contemporary Chinese society

Mapping Media in China Wanning Sun, Jenny Chio, 2012-07-26 Mapping Media in China is the first book length study that goes below the national scale to focus on the rich diversity of media in China from local provincial and regional angles China s media has played a crucial role in shaping and directing the country s social and cultural changes and whilst these shifts have often been discussed as a single and coherent phenomenon this ignores the vast array of local and regional variations within the country s borders This book explores media as both a reflection of the diversity within China and as an active agent behind these growing differences It examines the role of media in shaping regional provincial and local identities through the prism of media economics and technology media practices audiences as well as media discourses The book covers a wide range of themes including civil society political resistance state power and the production and consumption of place specific memory and imagination With contributions from around the world including original ethnographic material from scholars based in China Mapping Media in China is an original book which spans a broad range of disciplines It will be invaluable to both students and scholars of Chinese and Asian studies media and communication studies geography anthropology and cultural studies

Civility in Politics and Education Deborah Mower, Wade L. Robison, 2013-03-01 This book examines the concept of civility and the conditions of civil disagreement in politics and education Although many assume that civility is merely polite behavior it functions to aid rational discourse Building on this basic assumption the book offers multiple accounts of civility and its contribution to citizenship deliberative democracy and education from Eastern and Western as well as classic and modern perspectives Given that civility is essential to all aspects of public life it is important to address how civility may be taught While much of the book is theoretical contributors also apply theory to practice offering concrete methods for

teaching civility at the high school and collegiate levels **Nationalism and Human Rights** G. Cheng, 2012-02-14 By critically addressing the tension between nationalism and human rights that is presumed in much of the existing literature the essays in this volume confront the question of how we should construe human rights as a normative challenge to the excesses of modernity particularly those associated with the modern nation state or as an adjunct of globalization with its attendant goal of constructing a universal civilization based on neoliberal economic principles and individual liberty **Dog Days** Ivan Franceschini, Nicholas Loubere, 2019-04-05 According to the Chinese zodiac 2018 was the year of the earthly dog In the middle of the long hot and feverish dog days of the summer of 2018 some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union While this action was met by the harshest repression it also led to extraordinary demonstrations of solidarity from small groups of radical students from all over the country which in turn were immediately and severely suppressed China's year of the dog was also imbued with the spirit of another canine Cerberus the three headed hound of Hades with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society starting from the northwestern region of Xinjiang This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour civil society and human rights in China and beyond penned by leading scholars and practitioners from around the world **Modern China** Xiaobing Li, 2015-11-23 Providing an indispensable resource for students educators businessmen and officials investigating the transformative experience of modern China this book provides a comprehensive summary of the culture institutions traditions and international relations that have shaped today's China In Modern China author Xiaobing Li offers a resource far beyond a conventional encyclopedia providing not only comprehensive coverage of Chinese civilization and traditions but also addressing the values issues and critical views of China As a result readers will better understand the transformative experience of the most populous country in the world and will grasp the complexity of the progress and problems behind the rise of China to a world superpower in less than 30 years Written by an author who lived in China for three decades this encyclopedia addresses 16 key topics regarding China such as its geography government social classes and ethnicities gender based identities arts media and food each followed by roughly 250 short entries related to each topic All the entries are placed within a broad sociopolitical and socioeconomic contextual framework The format and writing consistency through the book reflects a Chinese perspective and allows students to compare Chinese with Western and American views **Thinking Heritage Through China** Andrew Scott Johnston, 2024-12-30 Thinking Heritage Through China explores major themes in international heritage through the lens of heritage practice in China China is a dynamic proving ground of heritage practice where international ideas are debated fought over and realized in many forms within the context of complex economic political and reputational forces Preservation in China engages with many of the central themes of international heritage practice shedding new light on considerations of authenticity and intangible heritage politics and nationalism and tourism and development These forces lie

at the heart of contemporary heritage practice not only in China but also all over the world Written by an architectural historian architect and heritage professional with experience in China this book uses an architecturally and spatially focused analysis bridging critical heritage studies and the study of the built environment as shaped through heritage practice exploring a wide range of contemporary heritage themes for a broad audience including China scholars This book will be of interest to scholars practitioners and both undergraduate and post graduate students interested in contemporary international heritage practice heritage studies theory and methods of heritage comparative heritage practice and heritage practice in China and Asia

Embattled Visions Jan Eckel, Daniel Stahl, 2022-05-02 Die komplexen Wandlungen der Menschenrechte in der jüngsten Zeitgeschichte Nach 1990 gewannen Menschenrechte national wie international ein wohl vorher nie erreichtes Gewicht Immer mehr Akteure begriffen gesellschaftliche Probleme als Menschenrechtsfragen Der Universalanspruch erfuhr weltweite Zustimmung und beförderte eine Vielzahl neuer interventionistischer Praktiken über nationalstaatliche Grenzen hinweg Nicht zuletzt machten zahlreiche wissenschaftliche Disziplinen Menschenrechte in einer vielschichtigen Wechselwirkung mit den gleichzeitigen politischen Veränderungen zum Gegenstand der Forschung Die Phase zukunftsgehemmer Aufbrüche endete jedoch bereits vor der Jahrhundertwende Zugleich sah sich die Idee universal gültiger Rechte heftigen Anfechtungen und Gegenentwürfen ausgesetzt Dieser Band will eine neue empirische Grundlage für das Nachdenken über die jüngste Menschenrechtsgeschichte legen indem zentrale Entwicklungen der letzten dreißig Jahre beleuchtet werden Dabei bewegen sich die Beiträge über dichotomische Deutungsangebote von einerseits Triumph und Erfolg andererseits Scheitern und Niedergang hinaus und schärfen den Blick für komplexe Wandlungsprozesse und gegenläufige Entwicklungen Der Band erscheint vollständig in englischer Sprache

____ The complex trajectory of human rights in the history of the past three decades The 1990s saw an extraordinary surge in the significance that various actors attributed to the concept of human rights A growing number of activists and politicians began framing their concerns as human rights issues The universal claim of human rights received unprecedented support and spurred new interventionist practices across national borders Numerous academic disciplines made human rights a subject of research both reflecting on and influencing the emerging human rights policies Yet the moment of enthusiastic new departures waned even before the advent of the new century At the same time and often as a direct consequence of its new prominence critics opposed the idea of universal rights with an unprecedented fierceness This volume breaks new ground in examining important developments that have unfolded in human rights history over the past thirty years In situating these events the volume looks beyond dichotomous interpretations of either triumph and success or failure sharpening our view of complexities and contradictions The volume is published entirely in English
