Tackling Marine Debris in the 21st Century National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on the Effectiveness of International and National Measures to Prevent and Reduce Marine Debris and Its Impacts,2009-01-17 Marine debris from ships and other ocean based sources including trash and lost fishing gear

contributes to the spoiling of beaches fouling of surface waters and the seafloor and harm to marine animals among other effects Unfortunately international conventions and domestic laws intended to control marine debris have not been successful in part because the laws as written provide little incentive to change behavior This book identifies ways to reduce waste improve waste disposal at ports and strengthen the regulatory framework toward a goal of zero waste discharge into the marine environment Progress will depend on a commitment to sustained funding and appropriate institutional support The Interagency Marine Debris Coordinating Committee should through planning and prioritization target research to understand the sources fates and impacts of marine debris It should support the establishment of scalable and statistically rigorous protocols that allow monitoring at a variety of temporal and spatial scales These protocols should contain evaluative metrics that allow assessment of progress in marine debris mitigation The United States through leadership in the international arena should provide technical assistance and support for the establishment of additional monitoring and research programs worldwide

Marine Pollution Tobias N. Hofer, 2008 Marine pollution is the harmful effect caused by the entry into the ocean of chemicals or particles An associated problem is that many potentially toxic chemicals adhere to tiny particles which are then taken up by plankton and benthos animals most of which are either deposit or filter feeders concentrating upward within ocean food chains Also because most animal feeds contain high fish meal and fish oil content toxins can be found a few weeks later in commonly consumed food items derived from livestock and animal husbandry such as meat eggs milk butter and margarine One common path of entry by contaminants to the sea are rivers Many particles combine chemically in a manner highly depletive of oxygen causing estuaries to become anoxic This book presents the latest research in the field from around the world

Analysis of Nanoplastics and Microplastics in Food

Leo M.L. Nollet, Khwaja Salahuddin Siddiqi, 2020-12-03 The world's ever increasing use of plastics has created large areas of floating plastic waste in the oceans so called plastic soup This floating plastic debris is gradually fragmenting into smaller particles which eventually become microplastics and even nanoplastics Analysis of Nanoplastics and Microplastics in Food compiles data on nanoplastics and microplastics in food To date there is some data on this particularly for the marine environment Fish show high concentrations but because microplastics are mostly present in the stomach and intestines they are usually removed and consumers are not exposed But in crustaceans and bivalve molluscs like oysters and mussels the digestive tract is consumed so there is some exposure Microplastics have also been reported in honey beer and table salt Key Features Discusses sampling and analysis of nano and microplastics Details the impacts of plastic residues in diverse compartments of the environment Includes a discussion of microplastics in freshwater Discusses interactions of microplastics and POPs This book brings to light the reality and dangers of microplastics in food Pollutants like polychlorinated biphenyls PCBs and polycyclic aromatic hydrocarbons PAHs can accumulate in microplastics Some studies suggest that after consuming microplastics in food these substances may transfer into tissues So it is important to estimate the average intake Since engineered nanoparticles from different types of nanomaterials can enter human cells this reality can pose consequences for human health Also available in the Food Analysis and Properties Series Mass Spectrometry Imaging in Food Analysis edited by Leo M L Nollet ISBN 978 1 138 37069 2 Proteomics for Food Authentication edited by Leo M L Nollet and Semih tle ISBN 978 0 367 20505 8 Food Aroma Evolution During Food Processing Cooking and Aging edited by Matteo Bordiga and Leo M L Nollet ISBN 978 1 138 33824 1 For a complete list of books in this series please visit our website at www.crcpress.com Food Analysis Properties book series CRCFOODANPRO
