China's and India's strategic interests overlap in this region both in maritime strategic competition or conflict which might be played out in the Bay of Bengal the Malacca and Singapore Straits and the South China Sea The sea lines of communication SLOCs through Southeast Asian waters constitute vital choke points between the Indian and Pacific Oceans carrying essential energy supplies for China and other Northeast Asian countries Any strategic competition between China and India has implications for other major maritime players in the Pacific and Indian Oceans especially Australia the Republic of Korea and Japan as well as the US This book identifies possible cooperative and confidence building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition

Southeast Asia Transformed Chia Lin Sien, 2003 Southeast Asia with a total population of 520 million remains a region characterized by fragmentation, diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations (ASEAN) formed some thirty five years ago. In the new millennium it has lost the distinction of being one of the world's faster growing group of economies since the 1997 financial crisis. While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes.

Piracy in Southeast Asia Carolin Liss, Ted Biggs, 2016-11-25 This book combines multi disciplinary ethnographic and theoretical approaches to examine piracy in Southeast Asia and the regional and international responses to this threat. During the piracy boom of the early to mid 2000s the issue of piracy in Southeast Asia received substantial academic attention. Recent scholarship however has shifted the focus to Somali piracy and the resurgence of piracy in Southeast Asia has largely been neglected in the academic community. This volume seeks to remedy this gap in the current literature. The primary aim is to examine how piracy has evolved in Southeast Asia over the past ten years to address why piracy has re-emerged as a security threat, to evaluate efforts at maintaining security in regional waters and to offer an analysis of what might be expected in the next decade. The contributions are drawn from academics, policy makers and military officers covering a range of disciplines including international relations, socio cultural anthropology, security studies, history, law and Asian studies. Taken together the contributions in this volume provide a better understanding of
