Liability for Bunker Oil Pollution Damage Dan Malika Gunasekera, 2010 This book deals with the liability conventions brought into existence by the International Maritime Organization and concentrates on the newly adopted instrument dealing with bunker oil pollution as an area of great concern for every stakeholder involved in shipping business The work covers a wide spectrum ranging from the Convention itself to its scope of application liable and aggrieved parties jurisdiction requirements of liability and admissibility of claims defences and exoneration from liability It addresses many areas of interest and of importance to international and national legal advisors lawyers law students and anyone interested in the relevant field such as shipowners charterers shipbrokers ship personnel and associated contractors and sub contractors

Maritime Safety Law and Policies of the European Union and the United States of America: Antagonism or Synergy? Iliana Christodoulou-Varotsi, 2008-12-18 The International Maritime Organization IMO as the United Nations specialized agency responsible for the regulation of shipping engaged in international trade from the points of view of maritime safety

and the prevention and control of pollution by ships recognizes that these goals can only be effectively achieved if each and every link in the corresponding chain of responsibility meets fully its obligations. Flag port and coastal States as well as the shipping industry itself all have roles to play in collectively improving safety and protecting the environment both marine and atmospheric through the development, adoption and uniform implementation and enforcement of global standards. In this book Dr Christodoulou Varotsi sets out to explore the extent to which the actions of the European Union and the United States as the main originators of high standards in these fields constitute a paradigm to the rest of the international maritime community. In this regard while underscoring the need for a holistic multilateral approach to maritime regulation as epitomized by the work of IMO the author explores how standards could be enhanced through the use of unilateral action.

Environmental Liability and the Interplay between EU Law and International Law Emanuela Orlando, 2023-07-24 The role of law in responding to global environmental problems and the interplay between different levels of regulation and governance is becoming increasingly relevant in the field of liability and reparation for environmental damage. This book examines the relationship and reciprocal influences between the EU and the international legal order in a multilevel and comparative perspective in relation to the ongoing efforts to elaborate effective regimes of liability and reparation for environmental damage. It offers a comparative analysis of legal developments in the field of environmental liability within the EU and at the international law level and addresses questions concerning the impact of such interaction on the development, implementation and enforcement of appropriate responses to environmental damage within the respective legal orders and on a global level. Given the book's focus and the transnational legal dimension of the issues covered this volume will be of great interest to legal academics and researchers working in the environmental law field from an EU law and international law perspective as well as more generally to scholars interested in the study of the relationship between EU and international law. Outside academia the book will also be of great interest to practitioners wishing to get insights into the application of the law of environmental liability in the EU and at the international law level.

Liability for Damage to Public Natural Resources: Standing, Damage and Damage Assessment Edward Brans, 2001-10-17 This book focuses on liability for damage to those natural resources that are of interest to the public and are protected by national, European or international law. It provides an overview of the law of the United States and of certain EU Member States on the recovery of damages for injury to natural resources. The international civil liability conventions that cover environmental harm and the recently published European Commission's White Paper on environmental liability are also discussed. The ongoing development in various international forums of treaties or protocols dealing with liability for environmental damage are analyzed as are the principles developed by the UNEP Working Group established in response to the 1990 Gulf War to advise the UNCC on claims for damage to natural resources. The book addresses assessment and valuation issues, the issue of standing in cases of injury to unowned natural resources and the determination of ways to repair, restore and compensate for natural resource

injuries and the associated loss of ecological and human services It also explains why such a difference exists between the US and most European jurisdictions and inter national liability conventions as to the recovery of damages for injury to natural resources **Environmental Protection and Transitions from Conflict to Peace** Carsten Stahn,Jennifer S.

Easterday,Jens Iverson,2017 This book examines the protection of the environment in post conflict societies with regard both to the maintenance of natural ecosystems and to the function of environmental protection in the peace building process addressing the strengths and weaknesses of different bodies of law **The Oxford Handbook of International**

Responsibilities and Liabilities for Commercial Activity in the Arctic Vibe Ulfbeck,Anders Möllmann,Bent Ole Gram Mortensen,2016-03-02 Given the magnitude of the risks associated with commercial activities in the Arctic arising as a result of the milder climate new business opportunities raise important questions of responsibility and liability This book analyses the issues of responsibility and liability connected with the exploitation of natural resources marine transport and other activities in the Arctic Applying a combined private and public law perspective on these issues it considers both the business and societal interests related to Arctic development using Greenland as an example The book focuses on problems that are specific to Greenland and wider issues that affect all Arctic states *Environmental Damage in International and Comparative Law* Michael Bowman,Alan E. Boyle,2002 This study considers the problems of defining and valuing

environmental damage from the perspective of international and comparative law The need for a broad and systematic evaluation of this issue is illustrated by the number of topics presently on the international law making agenda to which it is relevant including the UN Compensation Commission s decisions on compensation for environmental losses suffered by Kuwait in the Gulf War nuclear and oil pollution liability regimes the development of an environmental liability protocol to the Antarctic Treaty and other agreements on bio safety and genetically modified organisms It is thus an important element in contemporary efforts to strengthen legal remedies for environmental harm which does not necessarily come within traditional categories of legally protected personal or property rights **Research Handbook on Climate Change Law and Loss & Damage** Doelle, Meinhard,Seck, Sara L.,2021-11-17 This timely Research Handbook offers an insightful review of how legal systems whether domestic international or transnational can and should adjust to fairly and effectively support
