## **Marital Communication And Decision Making Analysis Assessment And Change:**

**Marital Communication and Decision Making** Edwin John Thomas,1979 *The Handbook of Marriage and Marital Therapy* G. Pirooz Sholevar,2013-11-11 **Understanding Family Process** Carlfred B. Broderick,1993-03-09 Systems theory is the basic theoretical model underlying most contemporary family therapy In this accessible introduction the author traces how systems theory gave rise to family systems theory outlines the basic propositions of family systems and links it both to other family theory literature and to clinical practice Among the topics covered are relational space family boundaries family stratification and child socialization Family meanings and such shared realities as family folklore stories myths and memorabilia are discussed Family rituals are also explored **Research and Practice in Social Skills Training** A.S. Bellack,M. Hersen,2013-11-11 It is perhaps trite to refer to human beings as social animals but never theless it is true A substantial portion of our lives is spent in interactions with other people Moreover the nature quality and quantity of those interactions have a tremendous impact on behavior mood and the adequacy of adjustment Faulty interpersonal relationship patterns have reliably been associated with a wide variety of behavioral psychological dysfunctions ranging from simple loneliness to schizophrenia Most traditional analyses of interpersonal failures have viewed them as consequences or by products of other difficulties such as anxiety depression intrapsychic conflict or thought disorder Consequently remedial efforts have rarely been directed to interpersonal behavior per se Rather it has been expected that interpersonal relationships would improve when the source disorder was eliminated While this model does account for some interpersonal dysfunctions e g social anxiety can inhibit interpersonal behavior it is not adequate to account for the vast majority of interpersonal difficulties In fact in many cases those difficulties either are independent of or underlie other dysfunctions e g repeated social failure may produce depression or social anxiety **Family Assessment: Rationale, Methods and Future Directions** Theodore Jacob,Daniel L. Tennenbaum,2013-11-21 The purpose of this book is to review existing and developing family assessment methods relevant to the study of psychopathology It is our intention not only to inform clinical researchers of the many valuable family assessment methods that are available but also to encourage the incorporation of such procedures into future research efforts In so doing we believe that our understanding of the etiology course treatment and prevention of adult and childhood disorders will be greatly enriched The book begins with an overview of the larger social and intellectual forces which have led to the current interest in studying family influences on psychopathology in children and adolescence For each stream of influence we attempt to highlight theoretical and methodological contributions relevant to the family's role in the etiology exacerbation and treatment of childhood disorders Next a framework for classifying family measurement procedures is introduced in which three major dimensions are emphasized unit of analysis source of data and construct assessed The third and most important chapter provides detailed reviews of a selected number of methods within each of the major groupings that have been delimited references and brief

descriptions of other measures that cannot be reviewed in detail and a discussion of the promising and developing techniques that are known to the authors      *Strategic Interpersonal Communication* John A. Daly, John M.

Wiemann, 2013-01-11 This book discusses how people go about achieving their social goals through human symbolic interaction. The editors' collective presumption is that there are more or less typical ways that people attempt to obtain desired outcomes be they persuasive, informative, conflictive, or the like through communication. Representing a first summary of research done by scholars primarily in the communication discipline, this volume seeks to identify and understand how it is that people achieve what they want through social interaction. Under the very broad label of strategies, this research has sought to identify critical social goals such as gaining compliance, generating affinity, resolving social conflict, and offering information. Specify for each goal the ways or strategies by which people can go about achieving these goals, determine predictors of strategy selection, that is, why does a person opt for one strategy over others to obtain the desired end. The research also reflects the attention the field of communication has given to strategy issues in the past 15 years. The chapters describe research on the ways in which people achieve different goals and summarize existing research and theory on the attainment of social goals. Readers will gain insight into many of the issues that exist regardless of the strategy being discussed. Thus, this volume may not include chapters on topics such as ways people elicit or offer disclosure, ways people demonstrate anger, or ways people create guilt, but the issues that appear consistently throughout the various chapters should apply equally to these. Finally, the essays in this volume provide not only a summary of what has been accomplished to date but also an initial theoretic map for future research concerning strategic interpersonal communication.

*Marital and Family Therapy* Ira D. Glick, Ellen M. Berman, John F. Clarkin, 2003-09-01 *Marital and Family Therapy* now in its Fourth Edition continues its tradition as a classic resource for psychiatrists and family therapists, trainees and practitioners alike by combining psychiatric and integrative family models into a single framework. The recent growth and changes in the field, especially the movement away from narrowly based schools of therapy toward an integrative approach, prompted the authors to expand and rewrite the text. The authors have included the results of 20 years of successful field testing by trainees and have supplemented the text with well-placed case vignettes and charts. The authors have further renewed the appeal of this definitive text by 1) rewriting the discussion of how new attitudes and information about gender, culture, class, and race are affecting family theory building; 2) updating their text for compatibility with DSM-IV-TR and ICD-10; 3) adding a section on treating Axis I disorders by combining family therapy with medication; 4) adding a section on the new subspecialty of family systems medicine; 5) offering the latest on family therapy effectiveness and training; and 6) discussing afresh the ethical, financial, and professional issues facing therapists today. With two new authors, up-to-date references for the advanced therapist, and suggested readings for both instructor and student, this volume will spend little time on the shelf. Psychiatrists, family therapists, social workers, nurses, family education teachers, counselors, family physicians, and family law professionals

will turn to this practical reference time and time again as they seek a better understanding of the evolving field of marital and family therapy

**Handbook of Closeness and Intimacy** Debra J. Mashek, Arthur Aron, 2004-04-13 This handbook brings together the latest thinking on the scientific study of closeness and intimacy from some of the most active and widely recognized relationship scholars in social and clinical psychology communication studies and related disciplines Each contributing author defines their understanding of the meaning of closeness and intimacy summarizes existing research and provides an overview of a theoretical framework presents new ideas applications and previously unstated theoretical connections and provides cross references to other chapters to further integrate the material The Handbook of Closeness and Intimacy will be of interest to researchers practitioners and students from social clinical and developmental psychology family studies counseling and communication

**Marital Therapy** R. Segraves, 2012-12-06 This book is welcomed to the series as a truly unique contribution to the literature on marital therapy It is written for the empirically oriented psychotherapist regardless of his or her discipline who encounters patients with marital discord and has been distressed by the absence of an acceptable conceptual model for treatment Psychoanalysis behavior therapy general system theory and social learning theory have all made important contributions to treatment But all too often these approaches have focused either on individual psychopathology or on the formal elements of marital interaction This volume is the first to propose an approach to marital therapy which is clinically sophisticated empirically based and which integrates important elements of seemingly disparate theoretical systems The result is a cognitive behavioral model for the treatment of marital discord which borrows from both psychoanalytic and behavioral contributions by translating them into the language of cognitive social psychology The author documents the toll in human suffering as well as the ubiquitous nature of marriage related problems Despite the frequency with which marital dissatisfaction and discord are encountered in clinical practice an amazingly high percentage of mental health professionals have received inadequate training in either the theory or technique of effective clinical intervention The absence of a conceptual framework linking individual psychopathology to interactional difficulties has worsened the problem for clinicians interested in conjoint treatment

**Intervention Research** Edwin J Thomas, Jack Rothman, 2013-04-03 This interdisciplinary book presents a comprehensive conceptual and methodological treatment of intervention research a developing area of empirical inquiry that aims to make research more directly relevant and applicable to practice Intervention Research contains original chapters by the most highly regarded scholars in the field These experts explain how to distinguish intervention research from other modalities demonstrate a new model of research for the design and development of interventions and provide guidelines for conducting intervention research in practice with individuals families and community organizations Providing useful observations and a wealth of ideas authors offer conceptual schemes results from recent design and development studies and strategies and methodologies to help professionals make their research more usable and meaningful Chapters cover such important topics as the acquisition of

relevant knowledge meta analysis in intervention research methods and issues in designing and developing interventions and field testing and evaluating innovative practice interventions The book depicts intervention research through case illustrations and promotes the use of new technologies for developing innovative practice methods Intervention Research focuses on Intervention Design and Development the part of intervention research involving the creation of reliable practical tools of social intervention in user ready form It sets forth systematic procedures for designing testing evaluating and refining needed social technology and for disseminating proven techniques and programs to professionals in the community Intervention Research has a base in social work but is highly interdisciplinary Authors contributing to this text come from a variety of fields including psychology sociology education information science and communications Professors and educators working in schools of public health education urban planning nursing and public administration or teaching courses in psychology sociology or upper level social work will find this book full of comprehensive and practical information that is advantageous for their work

**Generalist Practice** Eleanor Reardon Tolson, William James Reid, Charles D. Garvin, 2003 This basic textbook seeks to establish a task centered methodology a structured short term problem solving approach applicable across systems at five levels of practice the individual the family the group organizations and communities The second edition offers more information on systems theories and includes case studies with each chapter Checklists are provided for each level of practice along with questions for consideration and practice exercises to help students monitor their understanding and skill development University of Michigan Official Publication University of Michigan, 1978 Each number is the catalogue of a specific school or college of the University

Family Problem Solving William James Reid, 1985 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese

government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

*Social Exchange in Developing Relationships* Robert L. Burgess, Ted L. Huston, 2013-09-11 Social Exchange in Developing Relationships is a collection of papers that deals with the systematic study of the development of relationships The papers discuss several theoretical perspectives such as evolutionary theory personality theory cognitive developmental theory equity theory role theory and attribution theory One paper discusses romantic relationships the evolution of first acquaintance to close or intimate commitment Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes eventually influencing the nature of the relationship Commitment requires specific concepts such as input levels contributed to the relationship duration of these inputs and their consistency of occurrence The equity theory suggests that equity principles determine the selection of one's mate and how they the partners will get along in the future One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a parameter of a social relationship can affect the choice of data collection techniques and other matters Sociologists psychologists historians students and academicians doing sociological research can benefit greatly from this collection

**Compatible and Incompatible Relationships** W. Ickes, 2012-12-06 Several years ago two of my colleagues and I had the opportunity to interview Fritz Heider perhaps the most influential theorist in the field of social psychology Harvey Ickes Kidd 1976 During our interview Heider affirmed a belief that had guided his career since the 1920s the belief that the study of human relationships is the most important task in which social scientists can engage Although many social scientists would profess to share this belief it is nonetheless true that the study of human relationships has been one of the most neglected tasks in the history of the social sciences including psychology What Heider found in the 1920s that most psychologists acknowledged the importance of studying human relationships but at the same time tended to focus their own research on more tractable topics such as memory and cognition is still very much evident in the 1980s Even within the more specific domain of social psychology a majority of researchers still choose to address those hybrid topics social cognition social categorization and stereotyping person memory etc that relate most directly to traditional areas of psychological research Still other researchers while choosing to study such important interpersonal phenomena as altruism aggression conflict and interpersonal attraction tend to focus so exclusively on these isolated and abstracted phenomena that they fail to provide a more inclusive view of the relationships in which these phenomena occur

*Miscommunication* C. David Mortensen, Carter M. Ayres, 1997-01-31 In this extensive study on the impact of factors that enable or disable communication between people author C David Mortensen's helps us to discover that successful communication is a collective and collaborative achievement of the highest order Miscommunication progresses from a

theoretical examination of the complex conditions that cause miscommunication to occur highlighting implication distortion disruption and confusion as specific categories and then moves on to more refined definitions and practical applications of the theory Mortensen includes succinct and engaging real life examples that enhance and fortify the author's highly original contribution to our knowledge of interpersonal communication Miscommunication takes a fascinating look at the way we communicate and makes a distinct contribution to understanding miscommunication and its remedies Highly recommended for students and practitioners in communication language and discourse interpersonal communication speech and social psychology

*Handbook of Prevention* Barry A. Edelstein, Larry Michelson, 2012-12-06 Americans are healing themselves Heckler 1985 and prevention has taken root McGinnis 1985a We are altering our lifestyle to reduce physical and mental health risks Perhaps as important is the fact that the science of prevention is beginning to catch up with the practices of prevention although some might argue that the popularity of these practices far outstrips sound theoretical and empirical foundations The chapter authors in this volume examine the theoretical and empirical foundations of many current prevention practices and where data exist discuss the status of prevention efforts Where substantial prevention is not yet on the horizon the authors attempt to point us in the right direction or at least share with the reader some of the risk factors that should be addressed in our research We hope that readers will be stimulated to discuss the issues raised advance the current research and where possible adopt the prevention and health promotion strategies that are supported by sound theoretical and empirical work This volume can in no way be comprehensive with respect to the current work in prevention however we hope that we have provided a sampling of prevention activities and issues that appear together in one volume for perhaps the first time The primary intent of this volume is modest and the reader should not attempt to find continuity among the various chapters The only binding among these contributions is their focus on prevention
