China as a Sea Power, 1127-1368 Lo Jung-pang, 2012-01-01 Lo Jung pang argues that during each of the three periods when imperial China embarked on maritime enterprises the Qin and Han dynasties the Sui and early Tang dynasties and Song Yuan and early Ming dynasties coastal states took the initiative at a time when China was divided maritime trade and exploration subsequently peaked when China was strong and unified and declined as Chinese power weakened At such times China's people became absorbed by internal affairs and state policy focused on threats from the north and the west These cycles of maritime activity each lasting roughly five hundred years corresponded with cycles of cohesion and division strength and weakness prosperity and impoverishment expansion and contraction In the early 21st century a strong and outward looking China is again building up its navy and seeking maritime dominance with important implications for trade diplomacy and naval affairs Events will not necessarily follow the same course as in the past but Lo Jung pang's analysis suggests useful questions for the study of events as they unfold and decades to come

From Colonial Seaports to Modern Coastal

Cities Edmund Li Sheng, 2024-01-10 This book explores China's ambition to build itself into a maritime power. Despite having a continental coastline of 18,000 kilometers and territorial waters that cover an area one-third the size of its land mass, China has traditionally been considered a continental power. However, Beijing is currently trying to change this historical situation through two national strategies. This book will use the world island and sea power theories to explore the development of China's maritime power from historical and geopolitical perspectives. Using fieldwork in depth interviews and comprehensive data collection, this book will present a series of compelling examples and vivid stories to help readers understand China's maritime strategies with interest for China scholars, historians, and economists alike. *The Cambridge History of the Pacific Ocean: Volume 1, The Pacific Ocean to 1800* Ryan Tucker Jones, Matt K. Admiral Zheng He commanded the fifteenth century world's largest fleet. In the course of seven voyages made between 1405 and 1433, his massive ships visited over thirty present-day countries in Asia and Africa. Those voyages reflected and reinforced the development of complex networks of trade, migration, cultural exchange, and political interactions between China and the Indian Ocean world. This bibliography lists sources in thirteen languages, including both scholarly studies and popular works like Gavin Menzies's controversial bestsellers claiming the Chinese sailed around the world before Columbus. Relevant translations, transliterations, and annotations are provided to aid the reader. **China and the Silk Roads (ca. 100 BCE to 1800 CE)** Angela Schottenhammer, 2023-09-14 The book investigates China's relations to the outside world between ca. 100 BCE and 1800 CE. In contrast to most histories of the Silk Roads, the focus of this book clearly lies on the maritime Silk Road and on the period between Tang and high Qing, selecting aspects that have so far been neglected in research on the history of China's relations with the outside world. The author examines, for example, the issue of imperialism in imperial China, the specific role of frontier tribal troops during Song times, the interrelationship between maritime commerce, military expansion, and environmental factors during the Yuan, the question of whether or not early Ming China can be considered a proto-colonialist country, the role of force and violence played during the Zheng He expeditions, and the significance the Asia-Pacific world possessed for late Ming and early Qing rulers.

Why Did Europe Conquer the World? Philip T. Hoffman, 2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914 Europeans conquered 84 percent of the globe But why did Europe establish global dominance when for centuries the Chinese Japanese Ottomans and South Asians were far more advanced In *Why Did Europe Conquer the World* Philip Hoffman demonstrates that conventional explanations such as geography epidemic disease and the Industrial Revolution fail to provide answers Arguing instead for the pivotal role of economic and political history Hoffman shows that if certain variables had been different Europe would have been eclipsed and another power could have become master of the world Hoffman sheds light on the two millennia of economic political and historical changes that set European states on a distinctive path of development military rivalry and war This resulted in astonishingly rapid growth in Europe's military sector and produced an insurmountable lead in gunpowder technology The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize Debunking traditional arguments *Why Did Europe Conquer the World* reveals the startling reasons behind Europe's historic global supremacy

Southeast Asia between China and Japan Lam Peng Er, Victor Teo, 2011-11-15 Triangular relations which frame China and Japan as two sides of an isosceles triangle usually focus on the United States as the significant third side This edited book examines another relatively underexplored set of triangular relations those between China Japan and Southeast Asia The region comprised of eleven small and medium size states is often considered inconsequential in the tempestuous world of international politics where political clout economic prowess military strength and soft power matter most Often seen as easily dominated by extra regional great powers this volume reconsiders the region's relationship with China and Japan their two Asian neighbours to the northeast which also happen to be the world's second and third largest economies While China and Japan do compete for turf in Southeast Asia states in the region do not perceive themselves as strategic pawns of these two great Asian powers but instead as proactively engaging China and Japan in the region The country specific case studies of this book collectively support the thesis that the Southeast Asian states actively seek to manoeuvre between China and Japan for their own advantage and at the same time grapple with developments in Northeast Asia through regional integration efforts Through the establishment of benchmark norms and values Southeast Asia attempts to socialise China and Japan and other external powers to the ASEAN way Indeed Southeast Asia as a region is now the driver of East Asian multilateralism and regionalism and the East Asian reality is that Southeast Asia is a major political economic and cultural player in its own right vis vis the great powers

question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather educated gents practitioners instrument makers craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental commercial and cognitive resources required to pursue innovative production projects
