Markedness and Economy in a Derivational Model of Phonology Andrea Calabrese,2008-08-22 This book proposes a new model of phonology that integrates rules and repairs triggered by markedness constraints in a classical derivational model In developing this theory the book offers new solutions to many long standing problems involving syllabic and segmental phonology with analyses of natural language data both well known and relatively unknown The book also includes a new treatment of Palatalization and Affrication processes a novel theory of feature visibility as an alternative to feature underspecification and an extensive critique of Optimality Theory

Generative Phonology Michael Kenstowicz,Charles Kisseeberth,2014-05-10 Generative Phonology Description and Theory provides a basic understanding of the fundamental concepts of generative phonology and the applications of these concepts in further study of phonological structure This book is composed of 10 chapters and begins with a survey of phonology in the overall model of generative grammar and introduces the principles of phonetics to The subsequent chapters introduce the fundamental concept of a phonological rule that relates an underlying representation to a phonetic representation and this concept is applied to the analysis of morphophonemic alternation These topics are followed by a presentation of phonological sketches of four diverse languages in terms of rules relating underlying and phonetic representations as well as the major corpus internal principles and techniques of phonological analysis The discussion then shifts to the theoretical aspects of phonology the various degrees of abstractness and the proposals to limit the divergence between underlying and phonetic representation Other chapters deal with some of the issues revolving around the representation of sounds and the various hypotheses as to how phonological rules apply to convert the underlying representation to the phonetic representation particularly the kinds of considerations that motivate rule ordering statements The last chapters explore the major notational devices commonly employed in the formulation of phonological rules and the role of syntactic and lexical information in controlling the application of phonological rules This book is intended primarily for linguistics and phonologists

Concreteness in Generative Phonology Bernard Tranel,2024-06-04 Concreteness in Generative Phonology presents major topics in French phonology and morphology within the theoretical framework of generative grammar The concrete analyses advocated in Bernard Tranel's study constitute a radical departure from the abstract solutions proposed in previous generative treatments Abundant internal and external evidence anchors the concrete approach which is based on the recognition of the lexical nature of nasal vowels the absence of protective schwas and the necessity of a rule feature analysis for h aspirate words French phonology has been a well known subject of controversy both because French is an influential Indo European language and because the complexity of the data

has made it difficult to decide certain issues This integrated account brings to bear data generally omitted from consideration demonstrates the critical role that substantive evidence plays as a tool of investigation and provides a data based comparison between two approaches within the same broad generative framework Taking advantage of certain theoretical developments Tranel presents each problem set of data alongside previous and logical possible analyses and clearly lays out the arguments for and against each analysis This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1981 [Generative Morphology](#) Sergio Scalise,1986-01-01
