Marxism, China, and Development A. James Gregor, 2017-07-05 China has always been something of a mystery to Westerners For one generation Mao Zedong and his followers were simple agrarian reformers while for another

they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao's Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theorists asserted that Maoism was nothing more than a feudal fascism and had absolutely nothing positive to teach Marxism China and Development provides a plausible explanation of these developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leadership of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperialism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scientists economists sociologists and Sinologists

The Modern Chinese State David Shambaugh, 2000-05-08 Publisher Description [The Labors of Sisyphus](#) Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People's Republic of China In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China In that time too the PRC's most powerful ally and mentor the Soviet Union has dismantled and announced that communism had failed Today China fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism It is a country precariously suspended between past and future Maria Hsia Chang's *The Labors of Sisyphus* is a long overdue reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform Prior accounts of communist China have failed to capture China's evolving present In all its complexity and variety misrepresenting Maoist China In the process Information shortfall was partly to blame as recently as August 1994 the Chinese government itself decried falsification of statistics by government officials and cadres Sinologists in the 1960s and 1970s had to approach analysis of contemporary China with clear recognition of the limitations involved and the questionable

Finding a Path for China's Rise Philippe Lionnet, 2023-01-02 The rise of China is ever present in debates on globalisation and ongoing power shifts In a time of rising international tensions understanding the interdependencies between China's course and the world economy is ever more important Often the economic reforms under Deng Xiaoping after 1978 are emphasised They initiated dramatic changes in China's economy and contributed to its ascent as a world power In contrast less attention has been given to the context in which these reforms were implemented Philippe Lionnet analyses important adjustments in China's agricultural industrial and foreign trade policies in the course of the 1970s as well as their origins He shows how policy experiments and their limits shaped the path of the socialist state

The Labors of Sisyphus Maria Hsia Chang, 1999-10-01 Maria Hsia Chang's *The Labors of Sisyphus* is a reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform

markets an economic market for the exchange of products and factors and a political market for the diversion to private interests of state assets and authorities Lin reveals their concurrent development through an account of how industrial firms competed their way out of the plan through exchange relations with one another and with state agents He argues that the two markets were mutually accommodating that the political market grew also from a decay of the state's self-monitoring capacity and that economic actors' competition for special favors from state agents constituted a major driving force of economic institutional change

Reform in China and Other Socialist Economies Jan S. Prybyla, 1990

Two Societies in Opposition: The Republic of China and the People's Republic of China After Forty Years Ramon Hawley Myers, 1991

How China Became Capitalist R. Coase, N. Wang, 2016-04-30 How China Became Capitalist details the extraordinary and often unanticipated journey that China has taken over the past thirty five years in transforming itself from a closed agrarian socialist economy to an indomitable economic force in the international arena The authors revitalise the debate around the rise of the Chinese economy through the use of primary sources persuasively arguing that the reforms implemented by the Chinese leaders did not represent a concerted attempt to create a capitalist economy and that it was marginal revolutions that introduced the market and entrepreneurship back to China Lessons from the West were guided by the traditional Chinese principle of seeking truth from facts By turning to capitalism China re-embraced her own cultural roots How China Became Capitalist challenges received wisdom about the future of the Chinese economy warning that while China has enormous potential for further growth the future is clouded by the government's monopoly of ideas and power Coase and Wang argue that the development of a market for ideas which has a long and revered tradition in China would be integral in bringing about the Chinese dream of social harmony
