to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts **Elementary Linear Algebra** Stephen Andrilli, David Hecker, 2010-02-04 Elementary Linear Algebra develops and explains in careful detail the computational techniques and fundamental theoretical results central to a first course in linear algebra This highly acclaimed text focuses on developing the abstract thinking essential for further mathematical study The authors give early intensive attention to the skills necessary to make students comfortable with mathematical proofs The text builds a gradual and smooth transition from computational results to general theory of abstract vector spaces It also provides flexible coverage of practical applications exploring a comprehensive range of topics Ancillary list Maple Algorithmic testing Maple TA www.maplesoft.com Includes a wide variety of applications technology tips and exercises organized in chart format for easy reference More than 310 numbered examples in the text at least one for each new concept or application Exercise sets ordered by increasing difficulty many with multiple parts for a total of more than 2135 questions Provides an early introduction to eigenvalues eigenvectors A Student solutions manual containing fully worked out solutions and instructors manual available [Applied Mechanics Reviews](#) ,1955
