operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping
them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness
The journey to change this involves confronting some long standing beliefs and structures in education When supported with
the right structures instructional shifts coalition building and educator training and support the detracking of mathematics
courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in
higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and
