Newmann,Elizabeth Adams,Doug A. Archbald,Tyrell Burgess,John Raven,1992-02-06 The authors of this book question the assumptions of the psychometric paradigm that underlie virtually all criterion referenced and standardized tests used in North American schools They make a compelling case for a new science of educational testing and assessment one that shifts decision making from central administration to individual schools and communities Harold Berlak argues that the concept of tests as scientific instruments validated by technical experts is anachronistic and self contradictory He makes a case for a contextual paradigm an approach which assumes that consensus on educational goals and national testing programs is neither possible nor desirable Assessment practices in a democratic society must acknowledge and affirm differences in values beliefs and material interests among individuals and groups over the purposes and practices of schooling *The Intelligence* ,1896 Journal of Education ,1883 *The Business Educator* ,1920 South Korean Education and Learning Excellence as a Hallyu Young Chun Kim,Jae-seong Jo,Jung-Hoon Jung,2023-08-11 This book constitutes a sociological anthropological and curricular inquiry into the factors surrounding high academic achievement rates of students in South Korea Taking root in similar studies conducted around the exemplary nature of the Finnish education model it explores the phenomenon of success in South Korea uniquely connecting it to the scholarship and models for examining the recent shift in attention and popularity of Korean culture The authors argue that Korean education or K edu can also be studied and understood as a Hallyu and an exemplary form of education Drawing on longitudinal qualitative studies spanning over 15 years the authors advance understandings of Korean academic success beyond more generalized understandings of how Asian students learn and towards a holistic explanation for the case of Korea As such the book challenges the perception of Korean students as passive learners with a controlled learning culture and instead advocates the ways in which Korean students are leading a changing culture by utilizing all available resources and opportunities in the space of South Korea s evolving ecological system of education In addition this book provides one explanation as to how students from East Asian countries achieve such excellent academic performance A crucial exploration of the culture and growth of education systems in Asian countries this book will appeal to scholars and researchers with interests in Korean education and Korean students academic achievement as an emerging inquiry for both Korean studies and East Asian Cultural Studies In addition this book will also be informative for scholars of comparative education sociology of education
